- 1 GLOSSARY

see Grades of Release in this glossary.

1.0 the numerical designation for féar on the Tone Scale. See also Tone Scale in this glossary. It would get on up the line, and it would cut out as the only process possible-the only process possible-at 1.0. -TwoWay Communication (1 Nov. 54)

means basically to err, to make mistakes, or more specifically to have fixed ideas which are not true. The word is also used in its scientific sense. It means departure from a straight line. If a line should go from A to B, then if it is aberrated it would go from A to some other point, to some other point, to some other point, to some other point, to some other point, and finally arrive at B. Taken in its scientific sense, it would also mean the lack of straightness or to see crookedly as, for example, a man sees a horse but thinks he sees an elephant. Aberrated conduct would be wrong conduct, or conduct not supported by reason. Aberration is opposed to sanity, which would be its opposite. From the Latin, aberrare, to wander

Do not distribute

from; Latin, ab, away, errare, to wander. People are aberrated because of misunderstood words.

10 ²	(mathematics) ten to the twenty-first power; ten multiplied by itself twenty-one times. The power is a small figure or symbol placed at the upper right of another figure or symbol to show how many times the latter is to be multiplied by itself. (Example 10 ² = 10 x 10)
135 Proof	the strength of liquor based upon the ratio of its alcohol content to water. The US standard is 100 proof, which equals a mixture usually containing 50 percent alcohol. Thus, 135 proof rum would be 67 1/2 percent alcohol.
14th and F Streets	an intersection of two streets in Washington, DC, USA, 14th Street and F Street. This intersection is two city blocks from the White House, the official residence of the President of the United States.
cubic yards (of gravel)	a measurement of the size of a pile of gravel, expressed in how many yards tall, long and wide it is. Cubic as used here means three-dimensional. Any object's size can be calculated by measuring these three dimensions. For example, if a cube of a material is 2 feet wide, 3 feet tall and 4 feet long, the three measurements are combined (2 x 3 x 4 feet) and the final figure (24) is its cubic size, or the cubic space it occupies (24 cubic feet). When a pile of gravel is said to be 150.7-9 cubic yards it means the combination of its height, length and width equals 150 yards plus an additional 7/10 to 9/10 cubic yards.
163 Holland Park	once the street address of the first Hubbard Association of Scientologists (HASI) in London, England. During the early 1950s HASI grew to such an extent that by late 1955 it moved its headquarters to larger premises.
1682-44-ump	a made-up name for a form.
16mm	a type of cinematography film which measures 16 millimeters in width.
1789	a reference to the year in which the French Revolution began, or to the Revolution itself.
17th ACC	an Advanced Clinical Course held in Washington, DC from 25 February through 31 March 1957. See also ACC in this glossary. Take one datum and try to teach it to somebody with the old

educational processes of the 17th ACC. -Training Duplication (24 Jan. 62)

- 18121 a reference to the War of 1812, a conflict between the United States and Britain over the rights of the US at sea that lasted from 1812 to 1815. The war was said to be caused by the attempts of the US to maintain the freedom of the seas against British and French interference and the desire to seize Canada from Great Britain. Between the years of 1793 and 1815 England and France fought intermittently, and both countries were interfering with US trade and its right to freely use the sea. The British cut off American trade routes to Europe. Unable to settle differences, the United States declared war on Britain. American soldiers attacked Canada unsuccessfully and the British retaliated by burning the White House and other buildings in Washington, DC. The war lasted until 1815, when a treaty was signed restoring prewar conditions.
- 1827 reference to 1827 Nineteenth Street NW, the street address of LRH's residence in Washington, DC in the 50s and early 60s.
1866. The university has three campuses one in the city of Lawrence, one in Kansas City and one in Wichita. Its main campus in Lawrence offers subjects including the arts and sciences, architecture, business, education, law, journalism and pharmacy. The Kansas City campus has additional schools of medicine and health, and the Wichita campus runs clinical programs in medicine.
- 18-inch gun large, heavy gun with a barrel 18 inches in diameter.
- 18-point (printing) approximately twice the average size of type (8 points). A point is about 1/72 of an inch.
- 1917 reference to the Russian Revolution (1917@1918) that overthrew the czar of Russia and brought the Bolsheviks, a Communist Party, to power. One of the leaders of the revolution was Vladimir I. Lenin (1870@1924), a founder of the Bolshevik party. See also Lenin in this glossary.
- 1917 revolution the revolution in Russia (1917--1918) that overthrew the emperor of Russia and brought the communists to power. They weren't in on the 1917 revolution.
- 1917 Revolution the revolution in Russia (1917@1918) that overthrew the emperor of Russia and brought the communists to power. They weren't in on the 1917 Revolution. ⇐Study Evaluation of Information (11 Aug. 64)

=Study Evaluation of Information (11 Aug. 64)

1929 a reference to the year in which the stock market crashed in the United States and the beginning of the Great Depression—that period of economic crisis and lowered business activity occurring in the United States from 1929 through most of the 1930s. The Depression began in 1929 when stock values in the US dropped rapidly and thousands of stockholders lost large sums of money. Numerous banks, factories and stores closed, leaving millions of Americans jobless. It ranked as the worst and longest period of low business activity and high unemployment in modern times.

1930s. For instance, in April of 1932, in a radio address, Roosevelt stated “These unhappy times call for the building of plans...that build from the bottom up and not from the top down, that put their faith once more in the forgotten man...” 2. a person or category of persons who are given less consideration or attention than is merited.

1971 when England changed its currency the use of the shilling was discontinued and the value of pence changed—the pound became a monetary unit made up of 100 pence. The new five pence piece (equal to five pennies) replaced the shilling and remained 1/20th of the pound.

1A Routine 1A, a procedure developed in 1961 consisting of any combination of problems processes and Security Checks. For more information on Routine 1A see HCOB 6 July 61 in the Technical Bulletins of Dianetics and Scientology. Now, a pc will sit there and endlessly run 1A. -Basics of Auditing (29 Aug. 61)

short for 5th American Advanced Clinical Course, given by L. Ron Hubbard in Phoenix, Arizona, 29 March - 7 May 1954.

6 o'clock, number three ring a reference to a position located vertically below the center point of a circular target. 6 o'clock refers to a position that would be the same as the number 6 on a clock face. Number three ring refers to one of the rings around the bull's-eye of a target, as used in archery or sometimes on a rifle range. The target has concentric rings formed around a circle in the center (called the bull's-eye). The number three ring is the third ring in towards the bull's-eye, counting from the outside of the target. In archery, points are assigned based on the ring that is hit. The object is to hit the bull's-eye, which gives the highest points possible.

6 o'clock, number three ring reference to a low position away from the bull's-eye on a target hit in rifle target shooting. Six o'clock refers to the position on the face of a target which would be the same as the number 6 on the face of a clock. The number three ring is the third ring from the center of the target.

603-F a made-up designation for a license.

69 Merrion Square the address of the first Personal Efficiency Foundation in Dublin, Ireland. The square has a central park, a National Gallery and numerous elegant buildings. It is almost exclusively occupied by offices and clubs and organizations. It has been the residence of numerous well-known personalities from nineteenth-century Ireland.

7. Scientology and effective Knowledge “Northeast by north” is not defined in common Norwegian dictionaries or encyclopedias, so we are adding it. I have simplified it, to avoid MUs.

71 short for issue 71 of the Ability magazine, entitled “Being Clear and How to Get There,” issued in 1958. It contained a large article on Clear by LRH, a question and answer section on basic Scientology data, and other promotional and orientation material.

See also Ability in this glossary. And it has maybe a 71 and a questionnaire and something of the sort.

- 747 short for Boeing Model 747 Jumbo-Jet, the world's first wide-body transport aircraft.
- 7X50 a numerical designation used in describing the power of binoculars. Binoculars are used to observe objects which, to the naked eye, are far away but when seen through the binoculars appear closer. Binoculars consist of two small telescopes with a separate viewing tube for each eye. The tubes are mounted with hinges to a single frame to allow the eyepieces to be moved closer together or further apart (since the distance between the eyes varies from person to person). In the numerical designation 7X50, the first figure (7) gives the actual magnification (the apparent enlargement of objects seen through a lens) of that being viewed. For example, if an object appears to be one inch high with the naked eye, it would appear 7 inches high when viewed with 7X50 binoculars. The second figure (50) gives the diameter (the distance of a line passing from one side of a circle through the center to the other side) of the binocular lens in millimeters. Binoculars of this magnification (7X50) can be used for viewing such things as ships at sea, whereas binoculars with lower magnifications would be used for viewing things at a closer distance such as bird watching, sports, etc. Example Even though I was in the very last row at the opera, the actors looked huge thanks to my 7X50 binoculars! So anyway, it just goes on at this mad rate, and at the end of it, finally concludes, without any preamble of any kind whatsoever, that a yachtsman needs a 7X50 type pair of binoculars-an authoritative conclusion based on all of the optical formulas.
- 8 30 a.m. or 8 30 p.m. Ocho means “eight,” y means “and,” and media means “half.”
- 8.0 the numerical designation for hiding on the Tone Scale. See also Tone Scale in this glossary. Two-way communication cuts in at the Tone Scale at -8.0. -Two-Way Communication (1 Nov. 54)
- 8-C the name of a Scientology process which gives the preclear reality on the environment, control in following directions and havingness. The pc and auditor are both ambulant for the process. See also havingness in this glossary. In 8-C for instance, which ran with the person’s arm further and further away from him when he touched the wall.

8-DDT a humorous reference to DDT, which is a type of insecticide.

8-O SOP 8-O, a technique which simply drills up the capabilities of the thetan on a gradient scale so he can see, hear, speak, get out electricity, throw out postulates, control bodies other than his own and do other things which are well within his abilities.

90% dynamite n. a very volatile dynamite. Dynamite is an explosive made from an oily liquid called nitroglycerin. This liquid is highly sensitive to jolts, shocks and friction and likely to explode if treated improperly. To lessen this sensitivity and the dangers connected with it, nitroglycerin is mixed with an absorbent substance, such as sawdust or wood pulp, and thus made safe for handling,

Do not distribute

transporting, etc. This mixture is called dynamite and can be detonated by heat (fire) or percussion (sharp impact). The very first dynamite was 75 percent nitroglycerin and 25 percent absorbent material, but later with other chemical improvements to the mixture the percentages varied, such as 40 to 60. A 90 percent mixture of dynamite would only have 10 percent absorbent material and would only be slightly more stable than straight nitroglycerine, so would need careful handling.

910 North Yale, Wichita, Kansas the address of L. Ron Hubbard's home from May, 1951 until the end of March, 1952.

A abbreviation for Affinity. See affinity in this glossary.

That's the man's name.

Yes.

Who!

A (trait) a trait of a pc's personality as plotted on an OCA (Oxford Capacity Analysis) graph. Trait A ranges from Unstable/Dispersed to Stable.

aberration Irrational behavior or computation (thinking). They are stimulus-response in nature and may be prosurvival or contrasurvival. The engram is the basic source of aberrations.

departures from rational thought or behavior. From the Latin, aberrare, to wander from; Latin, ab, away, errare, to wander. It means basically to err, to make mistakes, or more specifically to have fixed ideas which are not true. The word is also used in its scientific sense. It means departures from a straight line. If a line should go from A to B, then if it is "aberrated" it would go from A to some other point, to some other point, to some other point, to some other point, to some other point and finally arrive at B. Taken in its scientific sense, it would also mean the lack of

Do not distribute

straightness or to see crookedly as, in example, a man sees a horse but thinks he sees an elephant. Aberrated conduct would be wrong conduct, or conduct not supported by reason. When a person has engrams, these tend to deflect what would be his normal ability to perceive truth and bring about an aberrated view of situations which then would cause an aberrated reaction to them. Aberration is opposed to sanity, which would be its opposite. This is the most fundamental level of aberration “If the food smells good, go away from it!” This is directly against the survival intention of the organism.

departures from rational thought or behavior. From the Latin, aberrare, to wander from; Latin, ab, away, errare, to wander. It means basically to err, to make mistakes, or more specifically to have fixed ideas which are not true. The word is also used in its scientific sense. It means departure from a straight line. If a line should go from A to B, then if it is aberrated it would go from A to some other point, to some other point, to some other point, to some other point, to some other point, and finally arrive at B. Taken in its scientific sense, it would also mean the lack of straightness or to see crookedly as, in example, a man sees a horse but thinks he sees an elephant. A4 n. an international standard size of paper measuring approximately 21 x 29.7 centimeters or 8 1/4 x 11 3/4 inches. "A" is an arbitrary designation for a series of standard paper sizes, ranging from A0 to A6. The series is based on a large rectangular piece of paper called "A0," which is 1 square meter in area (84.1 x 118.9 cm or 33 1/8 x 46 3/4 in). This piece of paper is cut in half to produce A1, A1 is cut in half to produce A2, and so on (see illustration). All sheets in this series have the same rectangular shape and one-half the surface area of the next size larger. The main use of the A series of paper is for writing paper, books and magazines, etc. There is also a B series for posters and C for envelopes.

AAs abbreviation for Attempted Abortions, especially in referring to the engrams created by such attempts.

Alcoholics Anonymous an organization of alcoholics and former alcoholics who seek, through mutual counseling, to avoid lapses into drinking.

attempted abortions.

aback to be taken aback To very surprised or shocked by something. [ex - For a moment, I was completely taken aback by her request.]

made-up name of a race of people. And I think if you were to take somebody who was Clear and try to convince him that he ought to declare war personally, you see, on the Abaflubians or somebody like that, don't you see, it would just puzzle him no end why.

abased	reduced or lowered, as in rank, office, reputation or estimation; humbled, degraded.
abbey	a monastery under the supervision of an abbot or a convent under the supervision of an abbess.
Abbot	Yes.
Abbott	Abbott Laboratories, a major US pharmaceutical manufacturer which produces and distributes a variety of medical drugs as well as highly dangerous and destructive "psychiatric" drugs. See Parke, Lilly, Abbott.
Abbott and Costello	Bud Abbott (1895–1974) and Lou Costello (1908?–1959), a popular American comedy team who, beginning in the 1920s, performed on stage, radio, television as well as in motion pictures. Abbott played the fasttalking swindler and Costello the baby-faced, simple-minded sucker. Abbott and Costello made more than thirty films and continued in partnership into the mid-fifties.
abbreviate	shorten by cutting off a part; cut short.
ABC blocks	n. a reference to children's blocks which teach the basics of the alphabet and numbers. Small blocks made from wood or plastic are labeled with letters of the alphabet, A, B, C and so on through Z and are used to teach a child the alphabet. In addition to letters the blocks often have numbers or pictures so the child can also learn numbers and how to count at the same time. The term ABCs refers to the basic skill of spelling, reading and writing or, by extension, the elementary facts or principles of any subject.
ABCD	reference to four steps of Routine 3 Revised, Engram Running by Chains, used to run through an incident as needed after the incident has been contacted and gone through the first time. The letters stand for the commands which the auditor gives the pc (A) "Move to the beginning of the incident," (B) "Tell me when you are there," (C) "Scan through to the end of the incident," (D) "Tell me what happened." If the incident is the earliest incident on that chain, this procedure is repeated until the incident erases. Repeated use of these commands when the incident is not erasing

the Japanese to surrender. See also Hiroshima and war, last in this glossary. Who's the only country on Earth with an overt act with an A-bomb, huh? ~~z~~Zones of Control and Responsibility of Governments (3 Jan. 60)

aborigines the original or earliest known inhabitants of a country or region.

about, leaving the person with the Scientology books, tapes, cassettes,

about. A withhold is always the

Above and Beyond a movie released in 1953, based on the true story of Colonel Paul W. Tibbets (1915–), a pilot who commanded a mission during World War II (1939–1945) to drop the first atomic bomb on Hiroshima. The story follows Tibbets (played by American actor Robert Taylor) through an extensive and secretive training program to prepare him for his mission. Unable to reveal any information to his wife (played by American actress Eleanor Parker), the relationship becomes strained to the point where she overreacts to his preoccupation and moods of withdrawal and leaves him. The day of the mission arrives, the bomb is dropped and Tibbets returns to a wife who now understands all.

above board In the open, without dishonesty or fraud. The word “board” in this phrase means “table.” The expression comes from the idea that gamblers can cheat at cards when their hands are under the table. (see Brewer)

above the cut a variation of the phrase a cut above, meaning a degree or stage above someone or something. In this sense the word cut means a grade, step or degree (as in an economical or social scale).

a coined variation of the phrase a cut above.

abracadabra a supposed magic formula or spell.

abracadabra, hocus-pocus two words with supposedly special or magic qualities. Abracadabra is a term said to be made up of the initial letters of the Hebrew words for Father, Son and Holy Spirit. The word was written on parchment and hung from the neck as a charm to ward off various ills. Hocus-pocus is the opening of a ridiculous string of mock-Latin words used by conjurers to divert audience attention when performing a trick. -Brewer's Dictionary of Phrase and Fable.

abrase v. to rub down, scrape off or wear away the surface of something by friction; to make something smooth or clean of marks by scraping or rubbing. Common examples of this include the

abstracts	ideas or terms considered apart from some material basis or object.
abstruse	hard to understand.
Abwehr	<p>a German military intelligence and counter-intelligence organization originally established in 1920. Abwehr means defense in German, and the organization's original purpose was to serve as Germany's defense against foreign espionage. In 1935, the Abwehr was put under the charge of German Captain (later Admiral) Wilhelm Canaris (1887–1945), and during World War II (1939–1945) its functions included espionage operations in foreign countries, such as the United States, Portugal and Spain. The organization was dissolved in June of 1944 and Canaris, due to his anti- Hitler views, was arrested, imprisoned and eventually hung by the Nazis in April of 1945.</p>
abyss	anything too deep for measurement; profound depth.

accafluence	a made-up word.
accelerator ring	a device in which atomic particles are spun around and around in a circle, picking up speed with each revolution.
accelerator-ring	n. a reference to a ring-shaped machine, called a particle accelerator, that takes tiny bits of matter, specifically atoms or the tiny particles that make up atoms, and causes them to travel around in a large circular path, continuously boosting their speed until they approach the speed of light. These particles are then directed at a stationary object or into another speeding particle, resulting in a destructive collision. Scientists study the fragments of these collisions, measure the energy they release, and use them for research purposes.
accelerator-ring booster	a circular machine that greatly increases the speed and energy of atomic particles and directs them in a steady stream at a target.you'll find enough data to sort of upset things.
Accept and Reject	a process in which the auditor has the pc find things, etc., which he can accept and then find things, etc., which he can reject. For more data about this process see the book The Creation of Human Ability by L. Ron Hubbard.

Do not distribute

Acceptance Level	that process which discovers the lowest level of acceptance of the individual and discovers there the prevailing hunger and feeds that hunger by means of mock-ups until it is satiated. The process is not a separate process itself, but is actually a version of Expanded GITA. See also Expanded GITA on page ____ in this book.
Acceptance Level processes	those processes which discover the lowest level of acceptance of the individual and discover there the prevailing hunger and feed that hunger by means of mock-ups until it is satiated. One has the preclear mock up, no matter how blackly or how crudely, items for himself to accept, then have others in his mock-ups mock up things for them to accept, and others to mock up things for others to accept. This extends to having the preclear also mock up things for others to accept and others to mock up things for the preclear to accept. See also mock up in this glossary.
accessibility	The desire of the preclear to be raised on the Tone Scale by processing. (In a past publication, the word “accessibility” was used to mean not only the above but also the accessibility of entheta on the case to various methods of processing. This last meaning is not used in the present work.) A case is considered accessible when it will work willingly with the auditor, no matter how occluded the case may be.
accessibility	<p>the desire of the preclear to be raised on the Tone Scale by processing. A case is considered accessible when it will work willingly with the auditor, no matter how occluded the case may be.</p> <p>the state of being willing to be processed (technical sense). The state of being willing to have interpersonal relations (social sense). For the individual himself, accessibility with self means whether or not an individual can recontact his past experiences or data. A man with a “bad memory” (interposed blocks between control center and facsimiles) has memories which are not accessible to him.</p> <p>the state of being willing to be processed (technical sense). ace	to have an ace up one's sleeve To have a secret or powerful advantage which could help you win or be successful. (see Longman and Brewer)
ace of spades, black as the	(blacker than the)an expression used to show that something is very dark or very black. An ace is a playing card marked in the center with one large mark or spot (usually black or red in color) and an "A" marked in two of its corners. Depending on the game played, it can have the highest or lowest value in a pack of cards. A spade is a black figure shaped like an upside-down heart with a short stem opposite the point, and is one of the symbols used on playing cards. Thus, the phrase black as the ace of spades means that something is very black, like the blackness of the spade in a pack of cards.
ace of, within an	almost but not quite; very close to; nearly.

almost but not quite; very close to; nearly. They as a matter of fact found out that Scientologists could cause them to come within an ace of losing all the seats they had. ⇐Study Evaluation of Information (11 Aug. 64)

aces up (slang) in a good or profitable position.

m. in high favor or esteem; first rate, fine or outstanding in some way. In some card games, the ace is the highest valued playing card and aces up alludes to the fact that the card player has aces in his hand (the cards dealt to or held by each player) and thus a very good chance of winning.

(slang) in a good or profitable position. I don't care what you tell them in advice, you see, give them something practical, give them something they can do and that sort of thing and you'll find out that you're just aces up and your life will start running very, very smoothly indeed. ⇐Organizational Operation (15 July 64)

ach (German) oh.

(German) oh. Wundt “Ach, mein Gott! He has taken my wallet...”

Achilles in Greek legend, a hero and one of the foremost of the Greek warriors who fought in the Trojan War.

Achilles heel a portion, spot, area or the like, that is especially or solely vulnerable. In Greek mythology, Achilles was an illustrious Greek warrior. He had been dipped in the river Styx (one of the mythological rivers of Hell) by his mother, which rendered him invulnerable except in the heel by which she held him. He was fatally wounded by an arrow in that heel.

acid biting, sarcastic or scornful.

(slang) LSD. See also LSD in this glossary.

acid test a severe or conclusive test. The phrase comes from the practice of applying acid to a metal to test whether it is gold or not.

severe or conclusive test. The term comes from the practice of applying acid to a metal to test whether it is gold or not.

n. a severe or decisive test, as for value, effectiveness, authenticity, truth, etc. The term dates back to the 1800s when peddlers used acid to distinguish gold from cheap metal that someone might be trying to pass off on them. The acid would

Do not distribute

corrode such metals as iron or copper, but would do nothing to real gold. The term acid test soon came to be commonly used to mean a stern test of reliability.

ack-ack (slang) antiaircraft fire. It comes from the British telephone code AA, which is the abbreviation for antiaircraft.

acknowledgment something said or done to inform another that his statement or action has been noted, understood and received.

something said or done to inform another that his statement or action has been noted, understood and received. "Very good," "Okay," and other such phrases are intended to inform another who has spoken or acted that his statement or action has been accepted. An acknowledgment also tends to confirm that the statement has been made or the action has been done and so brings about a condition not only of communication but of reality between two or more people. Applause at a theater is an acknowledgment of the actor or act plus approval. Acknowledgment itself does not necessarily imply an approval or disapproval or any other thing beyond the knowledge that an action or a statement has been observed and is received.

a stage of auditing. Applies solely to the particular process in use at a certain case level.

Act Four a stage of processing used at the time of this lecture which established the accessibility of the preclear with himself. It included past, present and future problems. See also preclear and process in this glossary.

Act Six a stage of processing given in the Handbook for Preclears which deals with effort and counter-effort, emotion and counter-emotion. For more information read the book Handbook for Preclears by L. Ron Hubbard.

Act Three a stage of processing used at the time of this lecture which consisted of cleaning present time facsimilies for the preclear so that the environment was not confused. See also process, facsimile and preclear in this glossary.

act together, get one's If you say someone needs to get his act together, you mean that he needs to take control of himself and to organize his affairs more effectively so that he can deal successfully with things and can avoid failure. [ex - We are going to lose the game if we don't get our act together.]

ACTH-azol a reference to ACTH—adrenocorticotrophic hormone—a hormone which stimulates the growth and secretions of the adrenal glands (glands located on the upper end of each kidney). Secreted by a gland in the head ACTH enters the bloodstream and travels to the adrenal glands, causing them to secrete different hormones which keep various bodily functions occurring, such as metabolism, the body's resistance to infection and the alleviation of the symptoms of allergies. A synthesized form of ACTH is used as a drug in treating arthritis, asthma and several other disorders.

from Adam indicates that a person is as unfamiliar to one as Adam would be, since no one could be

Adams	a reference to Polish-born American philosopher and teacher George Adamski (1891–1965). In 1953, Adamski and Desmond Leslie (1921–?, Irish student of supernatural phenomena) co-authored <i>Flying Saucers Have Landed</i> , a controversial book on unidentified flying objects (UFOs). Adamski was a supposed UFO contactee and became well-known for his accounts of personal encounters with space people. On one occasion, Adamski was reportedly taking pictures of a flying saucer and a spaceman took one of his photographic plates. It was returned a few weeks later but the original picture had been replaced with strange writing that was thought to be a brief technical account of the flying saucer and its method of propulsion.
Adams, Sherman	(1899–1986) American politician and assistant to US President Dwight Eisenhower (1890–1969) between 1953 and 1958. During Adams' tenure as presidential assistant, Eisenhower had a heart attack and Adams took over many of his functions while the president recuperated. In 1958 Adams was accused of accepting money and gifts from a businessman who was apparently seeking favors. The President came to Adams' defense, stating that Adams could have been more prudent, but he was needed in his position and should not be dismissed. At this time, the President was also dealing with mounting tensions in the Middle East. The king of Iraq had been killed by an Iraqi army, there was fighting between rebels and the Lebanese army in Beirut and Britain and the US sent fighter planes and troops into the area. Adams continued to work with the President during this period; however, at the end of 1958 he submitted his resignation and retired from politics completely.
add up	seem reasonable. If something doesn't add up, it does not make sense; no reasonable answer can be arrived at from the known facts. So, if something "adds up," the known facts make sense. (see Brewer and Longman)
adder	a small, poisonous snake.

affinities the attractions which exist between two human beings, or between human beings and other life organisms.

affinity The attraction which exists between two human beings, or between a human being and another life organism, or between a human being and MEST or theta or the Supreme Being. It has a rough parallel in the physical universe in magnetic and gravitic attraction. The affinity or lack of affinity between an organism and the environment or between the theta and MEST of an organism and within the theta (including entheta) of the organism brings about what we have referred to as emotions, in the past. The affinity scale includes most of the common emotions, apathy, grief, fear, anger, hostility, boredom, relief, contentment, enthusiasm, exhilaration, inspiration.

love, liking or any other emotional attitude; the degree of liking. The basic definition of affinity is the consideration of distance, whether good or bad.

a degree of liking or affection or lack of it. Affinity is a tolerance of distance. A great affinity would be a tolerance of or liking of close proximity. A lack of affinity would be an intolerance of or dislike of close proximity. Affinity is one of the components of understanding.

the feeling of love or liking for something or someone. It's affinity, reality, communication—these things are all out. -- ARC Breaks and the Comm Cycle

*the feeling of love or liking for something or someone. Affinity is a phenomena of space in that it expresses the willingness to occupy the same place as the thing which is loved or liked. The reverse of it would be antipathy, "dislike" or rejection, which would be the unwillingness to occupy the same space as or the unwillingness to approach something or someone. It comes from the French *affinité*, "affinity, kindred, alliance, nearness" and also from the Latin *affinis*, meaning "near, bordering upon."*

the subject of Aladdin and the Wonderful Lamp, one of the bestknown stories in the Arabian Nights (a collection of approximately 200 Persian-Indian-Arabian tales of magical adventures, genies and love, dating from the 10th century AD). In most versions of the story, Aladdin, the hero of the story, is the lazy son of a poor widow. He meets a magician who poses as his uncle and persuades Aladdin to retrieve a wonderful lamp from a hidden cave. The magician gives Aladdin a magic ring for his safety and sends him to carry out his task. Aladdin enters the cave and finds the lamp but when he refuses to give the magician the lamp until safely out of the cave, the magician becomes enraged and closes the cave with Aladdin still in it. Aladdin soon discovers that by rubbing the lamp or the ring, powerful genies appear who grant him every wish. Aladdin gets free from the cave and with the help of the genies, becomes immensely wealthy, marries a sultan's daughter and succeeds the sultan to the throne.

Alamo	a fortified mission in San Antonio, Texas. In 1836, during the Texas rebellion (against Mexico—as Texas was originally Spanish territory), a force of Texans was besieged at the Alamo by a much larger Mexican army. After 13 days of fighting, the Mexicans were able to break into the Alamo and every remaining defender was killed in hand-to-hand combat.

The book attacks the optimistic theories of a German philosopher who advocated that the universe was the “best of all possible worlds,” and that “whatever is, is right.” Well, I’m not trying to tell you it’s all for the best in this best of all possible worlds, because that would tell you at the same time that I never make any mistakes.

All Hallows’ Eve the name given to the customs celebrated on the evening of October 31 in many parts of the world. Hallows’ Eve originated from the autumn festival of the Druids (an ancient people of Britain, Ireland and Northern Europe). The calendar marked the new year on November 1st and the last evening of October was thought to be the night when all witches, demons and spirits of the dead roamed the earth. To safeguard themselves, Druids dressed up like witches and ghosts to trick the evil spirits into thinking that they were one of them. Much later the Christian church established November 1st as All Saints Day in honor of the saints and the evening before became known as All Hallows’ Eve (hallow means to honor as holy, sacred, etc.). This was later shortened to Halloween.

all hands In the language used on ships, “all hands” means the whole crew, as in the phrase, “All hands on deck”. (see Brewer)

(colloquial) all the members of a party, especially when collectively engaged in work.

all in good time In due course; when conditions are right.

allusion is to a Biblical passage describing an image seen in a dream The image's head was of gold, breast and arms of silver, belly and thighs of brass, legs of iron, and the feet were part iron and part clay. In the dream, the feet of the image were broken to pieces by a stone, then the whole image broke and the pieces were carried away by the wind.

alma mater the school, college or university that one has attended. From Latin, for fostering mother.

Along the briny [salty] beach We cannot do with more than four, To give a hand to each.'
The eldest Oyster looked at him,

Alpha (case) a made-up term.

Alphabetic Foundation a made-up name for an organization.

Alpine (ALpine) a reference to a telephone exchange in Phoenix, Arizona, USA. An exchange is a facility where the telephone lines of an area are connected and phone calls are routed; it also refers to the geographical area (such as a city or neighborhood) serviced by the exchange. In earlier methods of telecommunications, a person would make a phone call by first dialing the numbers corresponding to the first two or three letters of the exchange name, followed by the rest of the phone number. For example, to connect with the Alpine exchange in Phoenix, a person would dial the numbers on a telephone corresponding to "AL," specifically "2" and "5," and then the rest of the phone number to reach the person he wished to talk to.

alpineer a person skilled in climbing high mountains, especially the Alps.

a person skilled in mountain climbing. Valences, Circuits,
Approved April 1991

n. a person who is devoted to climbing the Alps or other high mountains; a mountain climber. The Alps are a large mountain system in south-central Europe, approximately 750 miles long (1,207 km). Known for their towering peaks and peaceful valleys, they form a great arc through parts of France, Italy, Switzerland, Germany and Austria. The term alpineer is formed from Alpine, meaning of or pertaining to the Alps, or of high mountains in general, and the suffix -eer, used to show someone who does something or one who works with or is concerned with a particular activity.

Anaconda Mining	a reference to the Anaconda Company.
anaesthosed	made insensible, deprived of sensibility.
analog	things or parts that are similar or comparable in certain respects.
analogy	explanation of something by comparing it point by point with something similar. an explaining of something by comparing it point by point with something similar.
analyst	a psychoanalyst. Psychoanalysis is a system of mental therapy developed by Sigmund Freud in Austria in 1894. It depended upon the following practices for its effects The patient was made to talk about and recall his childhood for years while the practitioner brought about a transfer of the patient's personality to his own and searched for hidden sexual incidents believed by Freud to be the only cause of aberration. The practitioner read sexual significances into all statements and evaluated them for the patient along sexual lines. Each of these points later proved to be based upon false premises and incomplete research, accounting for their lack of result and the subsequent failure of the subject and its offshoots.
analytical attenuation	a diminution (lessening) or weakening of the analytical awareness of an individual for a brief or extensive period of time. If sufficiently great, it can result in unconsciousness. (It stems from the restimulation of an engram which contains pain and

which contains pain and unconsciousness.) \nexists Scientology
Abridged Dictionary.

an abbreviation of analytical attenuation, meaning diminution (lessening) or weakening of the analytical awareness of an individual for a brief or extensive period of time. If sufficiently great, it can result in unconsciousness. (It stems from the restimulation of an engram which contains pain and unconsciousness.)

anathema a person or thing accursed or damned. Used here specifically in reference to a formal curse or condemnation excommunicating a person from a church.

anatomical of or connected with the structure of an organism or body.

anatomy of maybe anatomy of uncertainty. An uncertainty is the product of two certainties. One can be sure that something is and one can be sure that something is not. He can be sure that there is something, no matter what it is, present, and that there is nothing present. These two certainties commingling create a condition of uncertainty known as “maybe.” A “maybe” continues to be held in suspense in an individual's mind simply because he cannot decide whether it is nothing or something.

anchor point an assigned or agreed-upon point of boundary, which is conceived to be motionless by the individual; those points which demark the outermost boundaries of a space or its corners.

an assigned or agreed-upon point of boundary, which is conceived to be motionless by the individual; one of the points which demark the outermost boundaries of a space or its corners for an individual.

an assigned or agreed-upon point of boundary, which is conceived to be motionless by the individual; those points which demark the outermost boundaries of a space or its corners. This Qual will be so popular nobody will think of reducing it or scanting it, because it's hung on the solid anchor point there of Department 13 Word Clearing.

a specialized kind of dimension point. Those points which demark the outermost boundaries of the space or its corners are called in Scientology anchor points.

Anchorage the largest city in Alaska, situated in the south central part of the state.

- Ancient Mariner** a character in a poem by Samuel Taylor Coleridge which deals with the supernatural punishment and penance of a seaman who had heartlessly shot an albatross, a bird of good omen, in the Antarctic regions.
- the main character of the poem *The Rime of the Ancient Mariner*, written in the late 1700s by English poet and philosopher Samuel Taylor Coleridge (1772–1834). In the poem, the ancient mariner is a crewman on a ship who inexplicably shoots down a friendly albatross. Consequently, after a curse falls on the ship and it is stranded under the burning sun, the crew condemn the mariner hanging the dead albatross around his neck. Soon a ghost ship passes and all of the mariner's shipmates die, leaving him alone. The curse is finally lifted when the mariner repents, and his ship miraculously sails home. However, for penance he must wander the world recounting his tale as a warning to others.
- And all the men and women merely players They have their exits and their entrances;
And one man in his time plays many parts. His acts being seven ages. At first the infant..." The speech goes on to cover man's years as a schoolboy, lover, soldier, judge, foolish old man, and finally "second childishness and mere oblivion," in which man is "sans [without] teeth, sans eyes, sans taste, sans everything."
- They have their exits and their entrances; And one man in his time plays many parts, His acts being seven ages. At first the infant ..." The speech goes on to cover man's years as a schoolboy, lover, soldier, judge, foolish old man, and finally "second childishness and mere oblivion," in which man is "sans [without] teeth, sans eyes, sans taste, sans everything."
- and Computer** the first large-scale electronic digital computer (one using numbers to perform calculations) ever built. The first ENIAC was completed in 1946.
- And ends with the verse** "He went for water with a sieve, But soon it all ran through; And now poor Simple Simon Bids you all adieu." The term Simple Simon has since been used to refer to any foolish or gullible person or to a simpleton. 2. a reference to the children's story Epaminondas, which tells of a young boy, Epaminondas, who lives with his mother on one side of a hill. The story relates how the little boy travels to his grandmother's house on the other side of the hill and is given items, such as bread and cake, to take home. On his first journey he carries a cake home to his mother but, by the time he reaches home the cake is nothing but crumbs. Noticing the crumbs his mother instructs him how to correctly carry a cake. The following week he is given a block of butter.

anoxemia	<p>a reduction in the normal amount of oxygen in the blood, as at high altitudes.</p> <p>n. LRH def. a disease gotten by pilots when they go above normal breathing altitudes and when they get around 16, 17, 18 thousand feet and up they get this disease called anoxemia which means no oxygen. And they are up so high in the rarefied air that they do the goddamnedest things and they don't realize that they are</p>

Do not distribute

simply running out of oxygen or that their mask has slipped or they don't have one on. And they start flying upside down and reading their instruments all cross-eyed and controlling the plane fine and they get in this sort of a euphoria, a sort of a "whee." And yet the airplane is all upside down and the engines are overheating and everything but it's all "whee," and they crash. So a lot of experiments were carried out on this earlier by air forces and so on and they found out that's what it was. High altitude flying. So now they take vast precautions, lights flash and bells ring when there isn't enough oxygen. Anyway, this dread disease called anoxemia is something that very often gets into the heads of executives and you take some guy and you suddenly shoot him up into a high altitude or in a PR line you suddenly put him into a diplomatic or very important person zone and he gets anoxemia. The altitude is too great for him and he will give you the damndest reports and he will do the weirdest things and he is very hard to get back to battery because he's "one of the great ones now." You'll see it occasionally in an org where guys are appointed Dissemination Secretary from a Shipping Clerk or he's made an executive or something. He was a perfectly good Shipping Clerk and you wonder what the hell happened to this guy. It's anoxemia, rarefied air. [LRH Notes 14 July 72]

ant heap	a mound of earth formed by a colony of ants in digging or constructing an underground nest and heaped around the entrance. Also known as an anthill.
antag	(1) short for antagonistic. (2) short for antagonist.
antagonistic	hostile-, unfriendly.
Antarctica	the continent surrounding the South Pole. It is covered by an ice cap up to 13,000 feet thick.
Anthony, Mr.	a reference to John J. Anthony, a radio show host of the early to mid- 1900s. Anthony, whose real name was Lester Kroll, hosted "The Goodwill Hour," an American radio program which began in the mid- 1930s and ran for many years. "The Goodwill Hour" was an advice show where people visiting the studio would anonymously state their problems over the air. Mr. Anthony would then give them advice and solutions to assist them with these. Throughout the decades of the show, "Ask Mr. Anthony" came to be part of the language.

imitate or mimic.

A-plus (+) n. a grade indicating the highest excellence. In US schools, a grade refers to a letter indicating the quality of a student's work. The system consists of a scale starting at the bottom with F (failing) and moving up through D (poor or barely passing), C (average or satisfactory), B (good or above average), with A (excellent) at the top. Plus (+) and minus (-) are used to modify the basic grades and mean "more than" and "less than" respectively. Thus, C- would indicate less than average or satisfactory and A+ would indicate more than excellent. Such grades are given by teachers for specific assignments (as a test or essay) as well as for performance in a subject during an established period of study.

Apocalypse, Four Horsemen of the four riders on white, red, black and pale horses, symbolizing the pestilence, war, famine and death which are prophesied in the Apocalypse, or book of Revelation, the last book of the New Testament in the Bible. Used figuratively in this lecture.

apple, sad	a gloomy person, frequently irritable, introverted, or pessimistic.
applecart, upset this old	(informal) ruin a plan or what is being done; change how things are or are being done, often unexpectedly; ruin or mix up another person's success or plan for success. This phrase comes from the fact that until the nineteenth century roads were generally rough and streets were narrow. For country people, the mere act of getting themselves and their goods to market safely over considerable distances was quite an achievement. One can imagine how annoyed they must have been when the carts containing their precious produce were toppled over, particularly if they had perishable items such as apples, which would become damaged when scattered and ruin the hopes of a profitable sale.
applications	ways of applying or methods of applying or using; specific uses.
Applied Scholastics	social reform groups involved in rehabilitating the field of education through the dissemination and application of L. Ron Hubbard's study technology.
appointments	equipment, furnishings or accouterments (personal clothing, accessories, etc.).
appparency	something that seems to be, that appears to be a certain way; something that appears to be but is different from the way it looks. It is from the Latin, apparere, to appear. In Dianetics and Scientology it is used to mean something that looks one way but is in actual fact something else. "Gives an appparency of health" whereas it is actually sick.
apprehensive	uneasy or fearful about the future.

Do not distribute

apprised	given notice; informed; advised. informed or notified.
appropriated	set aside for a specific use.
appropriations	public funds set aside for specific purposes.
approximated, being	coming near to; being almost the same as.
apropos of, in	with reference to; in respect or regard to.
ApS	an abbreviation of anpartsselskab, the Danish word used to designate a privately owned company that is organized in such a way that financial responsibility is limited to the amount invested by each party.
aptitude curve	<p>a graphic representation showing variations occurring in aptitude as measured by an aptitude test (a timed, written test originally developed in the 1950s to administer to people being examined for driver's licenses). It shows at once whether the individual is accident prone and also tests his ability to duplicate.</p> <p>a graphic representation showing variations occurring in aptitude as measured by an aptitude test (a timed, written test originally developed in the 1950s to administer to people being examined for driver's licenses). It shows at once whether the individual is accident prone and also tests his ability to duplicate. So the existing philosophy in the HGC at this time is "I'll tell you anything you want to know about any case you want to talk about, but it's your job to raise the aptitude curve, and to raise that IQ."</p>
aquiline	(of the nose) curving; hooked; prominent, like the beak of an eagle.
Aquinas, St. Thomas	(1226–74) Italian religious philosopher who revolutionized the theology and philosophy of his time with his writings on religion and the nature of man.
Arabian	<p>of Arabia (a peninsula in southwest Asia) or the Arabs (natives or inhabitants of Arabia).</p> <p>of or pertaining to Arabia, a peninsula in southwest Asia).</p>
Arabic	a language consisting of numerous dialects that is the principal language of Saudi Arabia and the surrounding countries as well as part of northern Africa.

ARC '63 the name of a Scientology process issued in 1963 with repetitive commands addressing Affinity, Reality and Communication. For further information see HCOBs 27 May 1963 and 21 July 1963 in The Technical Bulletins of Dianetics and Scientology.

ARC Break Assessment a process where an auditor calls off items pertaining to Affinity, Reality and Communication, to a preclear in order to locate the charged item(s) by meter read (reaction on the meter when the item is said by the auditor). See also ARC break, charge, meter and process in this glossary.

a process where an auditor calls off items pertaining to Affinity, Reality and Communication, to a preclear in order to locate the charged item(s) by meter read (reaction on the meter when the item is said by the auditor). See also ARC break, charge, meter and process in this glossary. So that is not much to teach, since if he can do this he can also do ARC Break Assessments, you see, and he can do a lot of other things.

ARC break assessment an action done by an auditor using an E-Meter to handle an ARC break. It consists of reading a list of questions (issued in an HCO Bulletin) to the preclear so as to locate and indicate bypassed charge (the source of all ARC breaks). Various lists have been issued which cover the types of charge that can be missed in different auditing activities, and the list appropriate to the type of auditing the preclear has been receiving would be used. In doing this action, the auditor does not take up or handle the questions that react on the E-Meter he does nothing but locate and then indicate the charges found by telling the preclear what registered on the needle. See also bypassed charge and bypassed charge assessment in this glossary. There is a thing called an ARC break assessment and there's a bypassed charge assessment and hardly one of you monkeys have ever been able to tell the two apart or do either one of them.

It's called an ARC break instead of an upset because if one discovers which of the three points of understanding have been cut, one can bring about a rapid recovery in the person's state of mind.

ARC Locks

“Permanent” encystments of entheta resulting from the enturbulation of theta by enforcements or inhibitions of affinity, reality or communication and the trapping of this enturbulated theta by the physical pain of some engram or chain of engrams

Do not distribute

whose perceptics are approximated in the present time enturbulation. Locks are analytical experiences. If there were no physical pain to trap the enturbulated theta, it would disenturbulate, with a greater or lesser display of emotion.

ARC processes processes in which the auditor causes the preclear by straight memory to recall moments when he actually felt he was receiving or giving affinity or communication, or actually experiencing reality.

ARC secondaries ARC locks of such magnitude that they must be run as engrams in processing. Or, since locks are often run as engrams, ARC locks of great magnitude.

ARC Straightwire a type of processing in which a Scientology practitioner has a person recall moments when he actually felt he was receiving or giving affinity (A) or communication (C) or actually experiencing reality (R). It is called Straightwire because the practitioner directs the person's memory and in doing so is stringing wire, much on the order of a telephone line, between the person and the standard memory bank in the person's mind. See also processing in this glossary. **ARC triangle** a triangle which is a symbol of the fact that affinity, reality and communication act together to bring about understanding. No point of the triangle can be raised without also raising the other two points, and no point of it can be lowered without also lowering the other two points.

another name for ARC Processing at the time of this lecture. Straightwire is the act of stringing a line between present time and some incident in the past, and stringing that line directly and without any detours. The auditor is stringing a straight "wire" of memory between the actual genus (origin) of a condition and present time, thus demonstrating that there is a difference of time and space in the condition then and the condition now, and that the preclear, conceding this difference, then rids himself of the condition or at least is able to handle it. See also ARC Processing in this glossary.

a recall process which gets the preclear to remember times of affinity, reality, communication and understanding.

a recall process which gets the preclear to remember times of affinity, reality, communication and understanding. Now, if you just took the last ARC Straightwire list on Self Analysis and sent the thing to the fellow and indicated this and said, "Just read these questions to the person in order and get an answer to each one," you'll have had somebody feeling better, and the next thing you know he'd have been in for training.

ARC triangle

a triangle which is a symbol of the fact that affinity, reality and communication act together as a whole entity and that one of them cannot be considered unless the other two are also taken into account. Without affinity there is no reality or communication. Without reality or some agreement, affinity and communication are absent. Without communication there can be no affinity or reality. It is only necessary to improve one corner of this very valuable triangle in Scientology in order to improve the remaining two corners.

a triangle which is a symbol of the fact that affinity, reality and communication act together as a whole entity and that one of them cannot be considered unless the other two are also taken into account. a symbol of the fact that affinity, reality and communication act together as a whole entity and that one of them cannot be considered unless the other two are also taken into account. (It is called a triangle because of these three related points.) Unless we have two corners of a triangle, there cannot be a third corner. Desiring any corner of the triangle, one must include the other two. The triangle is not an equilateral triangle. Affinity and reality are very much less important than communication. It might be said that the triangle begins with communication, which brings into existence affinity and reality. One can't cut down one without cutting down the other two and one can't rehabilitate one without rehabilitating the other two. On the positive side, one can rehabilitate any point on the triangle by rehabilitating any other point on it. Only when all three points are present can understanding occur.

a triangle which is a symbol of the fact that affinity, reality and communication act together to bring about understanding. No point of the triangle can be raised without also raising the other two points, and no point of it can be lowered without also lowering the other two points.

archaeologically	through archaeology, the systematic recovery by scientific methods of material evidence remaining from man's life and culture in past ages, and the detailed study of this evidence.
archaeology	the scientific study of the people, customs and life of ancient times.

- Archangel Michael in Christian legend, the title of the chief opponent of Satan and his angels and the champion of the church of Christ on Earth. An archangel is a chief angel or angel of high rank.
- same as Michael (the archangel).
- Archbishop of Canterbury the highest-ranking bishop in England. Canterbury is a city located in Kent, England, and has long been the spiritual center of England.
- Archimedes (287?–212 b.c.) Greek mathematician, physicist and inventor. He is famous for his work in geometry, physics and mechanics.
- Archipelagan peninsula a made-up name for a place. An archipelago is a group of many islands and a peninsula is a piece of land almost entirely surrounded by water, connected with the mainland by an isthmus.
- Archipelagian peninsula a reference to a peninsula of land bordering the Aegean Sea. Also known as the Archipelago, the Aegean lies between Greece and Turkey and contains many islands. Archipelagian means of the Archipelago. Archipelago literally means “chief sea” and was used by the ancient Greeks for their main sea, the Aegean. It has since come to be used in a more general sense for any broad expanse of water containing many islands or for the islands themselves.
- archy and mehitabel fictional characters originally appearing in the newspaper columns of American journalist, poet and playwright, Don Marquis (1878– 1937) in 1916. “archy” (a reincarnated poet) is a philosophical cockroach who types letters to the author in lower case letters (as he is unable to operate the shift mechanism on a typewriter) and “mehitabel,” a free-spirited alley cat, is his friend. The cockroach mocked many subjects (specifically those that irritated Marquis), such as technology and popular science writers and the cat, whose motto was toujours gai (a French phrase meaning “always cheerful”), ridiculed things such as pretentious social attitudes. After publication in newspapers, the works appeared in three “archy and mehitabel” books in the late 1920s and early 1930s. Following Marquis’ death the “archy and mehitabel” stories were combined into one illustrated volume, and released as *The Life and Times of archy and mehitabel* (1940).
- arcing forming an electric arc, a curved stream of brilliant light or sparks that is formed as a strong electric current jumps from one conductor to another.

'arf, not

(colloquial) a variation of not half, very, very much. 'arf is Cockney for half.

Argosis

a made-up word.

argot

the specialized vocabulary and idioms of a particular group, as the secret slang of criminals.

arguesify

v. a humorous coined variation of argufy.

argufy

(colloquial) argue, especially merely for the sake of arguing.

(colloquial) argue, especially merely for the sake of arguing. And he said, "Well, didn't I argufy and sputefy enough?"

v. to dispute or contend, often stubbornly or merely for the sake of arguing. Chiefly used in southern US dialects, it is formed from the word argue and the suffix -fy, meaning to make or produce; cause to be.

argumentation

the process of developing or presenting an argument.

Do not distribute

the act of forming reasons, making inductions, drawing conclusions and applying them to the case in discussion.

Aristotelian

belonging to or having some relation to Aristotle (384–322 b.c.), Greek philosopher noted for his works on logic, ethics, politics, etc. Aristotle's book Ethics contains the doctrine that virtue consists in a mean between excess and deficiency.

belonging to or having some relation to Aristotle (384–322 b.c.), Greek philosopher noted for his works on logic, ethics, politics, etc.

belonging to or having some relation to Aristotle (384–322 b.c.), Greek philosopher noted for his works on logic, ethics, politics, etc. He disagreed with his teacher, Plato (427–347 b.c.) over the existence of ideal forms or ideas, such as truth or good. Plato held that these exist in a realm beyond the material world, while Aristotle believed that form and matter are always joined.

belonging to or having some relation to Aristotle. See also Aristotle in this glossary.

like Aristotle (384–322 b.c.), Greek philosopher noted for his works on logic, ethics, politics, etc.

of or like Aristotle (384–322 B.C.), Greek philosopher noted for his works on logic, ethics, politics, etc. He developed a system of logic which excluded anything but the two values of truth and falsity, and his book Ethics contains the doctrine that virtue consists in a mean between excess and deficiency.

Aristotelian syllogism the basis of the system of logic created by Aristotle (384–322 b.c.), Greek philosopher. A syllogism is an argument or form of reasoning in which two statements or premises are made and a logical conclusion is drawn from them. Example All mammals are warmblooded (major premise); whales are mammals (minor premise); therefore, whales are warmblooded (conclusion).

Aristotle's (Aristotelian) pendulum a reference to a principle called the law of the excluded middle, formulated by Greek philosopher Aristotle (384–322 B.C.). Essentially, it states that there is no middle ground and that something is either true or false, yes or no, is or is not the same as something else, somewhat like the extremes of the swing of a pendulum.

Arkansas a state in the south central United States.

Arlington a county in northern Virginia across the Potomac River from Washington, DC (the capital of the United States).

Arlington Cemetery short for Arlington National Cemetery, one of the largest and most famous United States national burial grounds. Located in Arlington, Virginia, across the Potomac River from Washington, DC, the cemetery is reserved primarily for military personnel, high-ranking government officials, such as US Presidents William H. Taft and John F. Kennedy and their families. It also has several memorials, such as the Tomb of the Unknown Soldier (which honors unidentified soldiers who were killed in action). Arlington National Cemetery covers 612 acres and holds more than 200,000 graves. It was created in 1864 and the first men buried there were two soldiers, one from each side of the American Civil War (1861–1865).

arm of the U.S. government, formerly called the Bureau of Internal Revenue. [Note
infernally means hellish, fiendish or inhuman. Ravening
means greedily searching for prey.] -Editor.

armadillo any of a family of burrowing mammals of Texas and Central and South America, that have an armorlike covering of bony plates and are active mostly at night.

any of several small, burrowing mammals of South America and some parts of southern North America, with a protective shell of small, bony plates. The armadillo feeds chiefly at night, and some kinds when attacked can roll themselves into a ball inside this armor.

any of a family of burrowing mammals of Texas, and Central and South America, that have an armorlike covering of bony plates and are active mostly at night. An armadillo?

Armageddon per the Bible, the place where the final battle between the forces of good and evil will take place. Armageddon comes from the Hebrew word Har-Megiddo, meaning “Hill of Megiddo,” probably a reference to the city of Megiddo in the mountains of northern Israel, the site of many battles in Biblical times. “Hill” is possibly a reference to the hill on which the city fortress stood. Armageddon is also used to name the battle itself, which is predicted to be the final, and completely destructive, conflict at

Army Alpha	a timed test developed during World War I (1914–1918) and used by the United States Army in testing recruits for general intelligence and ability. The Army Alpha was designed to test literate recruits while other tests were given to those who could not read and write. The Alpha contained eight sections that tested a person on such areas as arithmetic and practical judgment, as well as on his understanding of language, solving disarranged sentences, etc. The test was graded on a numbering system and, for practical reasons, a person also received a letter grade. For example, if one scored between 135 and 212 (the highest score possible), he received an “A” grade and was considered “very superior.” The next level down, 105 to 134, received a “B,” etc.

Do not distribute

Army Alpha Test a written intelligence test, developed by the US Army in 1917 for measuring the intelligence of new recruits.

Arnold, Benedict (1741–1801) American general of the Revolutionary War (war for American independence from Britain, fought from 1775 to 1781). He performed notably in the early days of the war, but became bitter over several setbacks to his career. After receiving command of the American fort at West Point, New York, Arnold plotted to betray it to the British. The plan was revealed when the American forces captured Major John Andr' of the British army, who was carrying messages between Arnold and the British. Arnold escaped to England and continued a military career, but was widely scorned by the English.

(1741–1801) American general of the Revolutionary War (war for American independence from Britain, fought from 1775 to 1781). submarines. Its name comes from the group that suggested it the Allied Submarine Detection Investigation Committee, a joint English-French project set up in 1918, immediately after World War I (1914@1918). Now called sonar. A QCB-1 antisubmarine electronic echo device, an ASDIC QCB-1—this is the way it is built. —Study Evaluation of Information (11 Aug. 64)

the name of a system developed by the British and first used in 1921 that transmits a pulse of sound into the ocean and uses its rebounding echo to detect submarines. “ASDIC” comes from the initials of the group that first

abbreviation for Anti-Submarine Detection Investigation Committee, a committee which British sonar was named after. I tried to explain it to them—`a QCB-1 antisubmarine electronic echo device, an ASDIC QCB-1. This is the way it is built." —Study Evaluation of Information (11 Aug. 64)

ASDIC QCB-1

a reference to the QBC-1.

Ash August

a humorous alteration of Ash Wednesday, that Wednesday approximately seven weeks before Easter that denotes the first day of Lent in most Western Christian churches. Lent is a period of fasting and penitence for one's sins. It lasts for forty weekdays and commemorates a story from the Bible where Jesus spent forty days and nights in the wilderness being tempted by the devil, during which time he fasted. Ash Wednesday gets its name from the Roman Catholic practice of a priest placing ashes on the foreheads of worshippers on that day as a sign of penitence.

Ashdown Forest

a large wooded area near Saint Hill. See also Saint Hill in this glossary. But you're probably not aware of the fact that the main battles fought for the possession of the British Isles were fought just a few miles from Saint Hill here, over in the Ashdown Forest.

ashes to ashes and dust to dust a phrase spoken in certain burial services, used sometimes to denote total finality. Ashes to ashes, dust to dust is based upon biblical texts, such as in “Genesis” (the first book of the Bible) where God sent Adam and Eve, the first man and woman to inhabit the earth, out of the Garden of Eden (a paradise created by God) after they had disobeyed him. God stated to Adam “Dust thou art, and unto dust shalt thou return” reminding Adam that he had been created by God from the dust of the ground and due to their disobedience they had brought death upon themselves.

a person who has ambition toward something.

asponding respondo

a made-up word.

a humorous alteration of astounding response. Astounding means causing or capable of causing wonder or amazement. Respondo (I reply) is a form of the Spanish verb responder which means to reply.

Assassins

a secret terrorist sect of Muslims of the 11th to 13th century who killed their political enemies as a religious duty. The word “assassin” comes from the Arabic name for this group, “Hashshashin,” meaning “addicts of the drug hashish,” as hashish was used by the leaders of the group to incite members to

Do not distribute

assassinate intended victims.

members of a secret order of Muslim fanatics around the time of the eleventh, twelfth and thirteenth centuries who terrorized and killed Christian Crusaders, political enemies and others as a religious duty. The order was founded around 1090 in Persia by al-Hasan ibn-al-Sabbah (also known as Old Man of the Mountain) when he gained control of an almost impregnable mountain fortress 10,000 feet (3,048 m) above the Caspian Sea. Occupying a string of such strongholds throughout Persia the order spread. Its members were given the drug hashish and taken to an earthly paradise (being told it was heaven), where they indulged in sensual pleasures. They were then given more hashish and told that if they carried out their religious duty (murdering selected targets such as Christian Crusaders) they could return to paradise in a glorious afterlife. Yearning for this paradise and fearless of death, they went out and assassinated the targets. The order, however, was eventually destroyed in the mid-1200s. The word assassin originally came from the Arabic word hashshashin meaning hashish-eater, and later came to mean in English, someone who murders politically important people.

assay balance n. a specially made, highly sensitive instrument used for weighing extremely small amounts of matter. Assaying is the analysis of a substance by weighing, measuring, calculating, etc., so as to determine the proportions of some valuable or potent constituent, such as a metal contained in an ore or a chemical substance in a pharmaceutical.

a sensitive balance (scale) used in the analysis of gold, silver and other precious metals.

assayed attempted; tried.

assembly line an arrangement in many factories whereby each worker performs a specialized operation in assembling the work as it is passed along, often on a slowly moving belt or track.

assertive characterized by mere assertion (the act of making positive statements or declarations, often without support or reason).

assess by elimination assess a list of items on a preclear, marking down which items read. Then go over the list as many times as needed, each time only calling off those items that read on the previous assessment until there is one reading item remaining on the list. Atlantic	<p>of, pertaining to or situated on the eastern coast of the United States.</p> <p>short for Atlantic Ocean an ocean bounded by North and South America in the Western Hemisphere and by Europe and Africa in the Eastern Hemisphere. It is approximately 31 million square miles in area with its greatest known depth being over 30,000 feet.</p>
Atlantic cables	<p>a reference to the Atlantic Telegraph Company, an organization established in 1854 by American businessman Cyrus W. Field (1819–1892). This company executed a project to lay permanent underwater cables under the Atlantic Ocean to transmit telegraph messages between North America and Europe. The project took more than twelve years to complete. The first two cables broke, a third was initially successful but failed after four weeks of service, and the fourth broke when almost completed. For the fifth attempt, Field laid the cable from Ireland to Newfoundland along a route where the ocean bed was muddy and fairly level and by 1866 the cable was in successful operation.</p>
Atlas Mountains	<p>a large range of mountains extending 1,500 miles through three countries of northwestern Africa (Morocco, Algeria and Tunisia). This range is made up of several chains of mountains, the most rugged and tallest being in Morocco, with one peak around 14,000 feet high (4,267 m). The mountains were named after Atlas, the Greek god (famous for his strength). Atlas was one of the Titans, a group of gods who fought an unsuccessful war against the gods of Olympus (a mountain in Greece believed to be the home of the major Greek gods, including Zeus, the king of the gods). To punish Atlas for his part in this war, Zeus condemned him to hold the sky upon his shoulders for eternity. The Atlas Mountains are where Atlas was believed to have stood and are themselves mythically regarded as supporting the sky.</p>
Atlas1	<p>in Greek mythology, one of the Titans, a group of gods who fought an unsuccessful war against the gods of Olympus (a mountain in Greece believed to be the home of the major Greek gods, including Zeus, the king of the gods). To punish Atlas (famous for his strength) for his part in this war, Zeus condemned him to hold the sky upon his shoulders for eternity. Since about the sixteenth century, pictures of Atlas and the burden he supports (usually represented as the earth rather than the sky) have been used to decorate maps or as the first page of books containing them. The word atlas has thus come to be used as the name for a book consisting of maps.</p>

the splitting of the nucleus of an atom into nuclei of lighter atoms, accompanied by the release of energy. This is the principle of the atomic bomb.

the splitting of the central parts of atoms with the release of great amounts of energy. This is the principle of the atomic bomb.

the splitting of the nucleus of an atom into nuclei of lighter atoms, accompanied by the release of energy. This is the principle of the atomic bomb. See also A-bomb in this glossary. But I had a very, very well educated, apparently very learned professor of physics of Columbia University tell me that he had never worried about atomic fission particularly, because if he'd be dead before anything happened to Earth. Overts and Withholds (1 Jan. 60)

the splitting of the nucleus of an atom into nuclei of lighter atoms, accompanied by the release of energy. This is the principle of the atomic bomb. See also A-bomb in this glossary. But I had a very, very well educated, apparently very learned professor of physics of Columbia University tell me that he had never worried about atomic fission particularly, because if he'd be dead before anything happened to Earth. Overts and Withholds (1 Jan. 60)

atomic fusion	the combining of the centers of two atoms to produce a center of greater mass. Atomic fusion releases vast amounts of energy and is used to produce the reaction in the hydrogen bomb.
atomic jet propulsion	n. jet propulsion using nuclear power. In the mid- 1900s a series of research projects were begun by the United States government to determine the feasibility of using a nuclear reactor in a jet engine to provide the heat and force to propel the craft as opposed to other conventional methods. Although the potential of atomic jet propulsion was realized, production of such engines remained in the experimental stages throughout the twentieth century.
atomic numbers	numbers representing the relative position of elements in the periodic table, in which the elements are arranged in the order of their nuclear charges; numbers represent the positive charge or the number of protons in the nucleus of the atoms of an element.
atomic physics	<p>the branch of physics that deals with the behavior, structure and component parts of atoms.</p> <p>the science dealing with the properties, changes and interactions etc., of atoms. An atom is the smallest component of an element having the chemical properties of that element. It comes from the Greek word atomos, undivided.</p>

the branch of physics that deals with the behavior, structure and component parts of atoms and from which the atom bomb was developed. So, I imagine the poor kid being educated right up now in Birmingham on the subject of atomic physics, is probably already 10, 15 years behind the mark. -A Summary of Study (4 Aug. 64)

that branch of physics which deals with atoms, their structure and the behavior of atomic particles.

atomic project	the series of atomic bomb tests carried out by the military during 1957, which were the largest tests that had been done up to that time. There were a great number of soldiers that performed simulated war-time maneuvers at the times of the nuclear blasts in the area surrounding the test sites. The operations carried out in 1957 marked the end of large-scale participation by soldiers in atomic bomb maneuvers. At the time of this lecture, the public was also becoming more aware of the hazards of nuclear testing and many people were beginning to call for a ban on nuclear bomb testing.
atomic sub	short for atomic submarine, a submarine driven by atomic power, capable of remaining under water for long periods of time.
atomic weapons	weapons using atomic energy the energy released when the nuclei of atoms are split or fused. An example is the atomic bomb, which uses the splitting of atoms to cause an explosion of tremendous force accompanied by a blinding light.
atomic fission	the splitting of the nucleus of an atom into nuclei of lighter atoms, accompanied by the release of energy. This is the principle of the atomic bomb. See also atom bomb in this glossary. I am actually researching some sort of a technology that if you kicked off from Earth or it billiard-balled under atomic fission or something like that, you wouldn't have to make an E-Meter in order to clear somebody, see? - E-Meter Reads and ARC Breaks (17 July 62)
atoms	the smallest component of an element having the chemical properties of that element. It comes from the Greek word atomos, undivided.
attaboy	(slang) an exclamation of approval or encouragement. (A corruption of "that's the boy," this expression is also seen as "that's a boy" and "thataboy.") (slang) a variation of that's the boy. See that's the boy in this

create, every time you take a workman and chain him to the machine and do an Augustus. FDR Augustus I think he was one of the early things. Create and Confront (3 Jan. 60)

Augustus, FDR	a humorous combination of the initials of Franklin Delano Roosevelt (1882–1945), thirty-second president of the United States (1933– 1945) and Augustus Caesar (63 BC–14 AD) emperor of Rome (27 BC–14 AD). Augustus' ideology was described as a place for everyone and everyone in his place, he regulated social mobility with men of Roman stock given preferential treatment, made it difficult for slaves to be freed and strictly controlled the number, condition and status of freedmen.
Aunt Mabel	a made-up name.
auraed	v. a coined word meaning existed as an aura, an influence, force or pervasive quality or atmosphere that emanates from or surrounds a person or thing. Aura comes from a Greek word meaning breath, breeze.
aural	of or received through the ear or the sense of hearing.
Aureomycetin	reference to Aureomycin, trademark for a type of antibiotic which may cause indigestion and may also increase susceptibility to bleeding and hemorrhaging if taken at the same time as certain other drugs. a reference to Aureomycin, a trademark for an antibiotic. Yellow in color and crystalline in form, Aureomycin is derived from a microorganism found in soil and has been prescribed to treat pneumonia and infections of the stomach and intestines.
aureomycin	an antibiotic substance made from a mold, used in medical treatment, especially of lung and rickettsial diseases (those caused by a bacteria transmitted to humans by parasitic insects such as fleas, ticks, etc.).
aurora borealis	streamers or bands of light appearing in the northern skies at night, especially in the polar region, probably due to the impact of streams of particles from the sun on the upper regions of the Earth's atmosphere.
Aussies	(informal) natives or inhabitants of Australia.
Austin	a car manufactured by Herbert Austin (1866 - 1941), an English motor car pioneer. His highly successful Baby Austin was the first of a line of small cars which revolutionized the pattern of car manufacture and ownership throughout Europe.

any of several vehicles manufactured by the Austin Motor Company Ltd. in Great Britain. Founded in 1905 by engineer Herbert Austin (1866–1941), the company became known for the “Baby Austin,” which it introduced in the 1920s. This car was a crude, small and relatively slow vehicle that became the subject of many jokes; however, it was low-priced and one of the first practical small cars. A quarter of a million were sold in the sixteen years it was manufactured.

Australian ACC reference to the First Melbourne Advanced Clinical Course, given by L. Ron Hubbard in Melbourne, Australia, 9 - 30 November 1959.

author of several books, including The Theatre Three Thousand Years of Drama, Acting and Stagecraft (1929).

author, Rudyard Kipling (1865–1936). It reads in part “For the Colonel’s Lady an’ Judy O’Grady Are sisters under their skins!”

authoritarian believing in, relating to or characterized by unquestioning obedience to an expert on a subject.

favoring complete obedience to authority as opposed to individual freedom.

authoritative reliable due to coming from an authority or expert.

Authors League of America a professional organization of authors of books, magazine materials and plays, founded in 1912.

a membership organization for authors and playwrights, founded in New York, USA, in 1912.

autochrome (photography) a material once used for color photography, consisting of a photographic emulsion applied over a multicolored screen of minute starch grains dyed red, green and blue-violet.

(photography) a material once used for color photography, consisting of a photographic emulsion (light-sensitive coating) applied over a multicolored screen of very small starch grains dyed red, green and blue-violet. It was advancing so rapidly that to expect of the individual, without modernizing the text, that he would have to know all about autochrome-haven't had any autochrome since 1920-it didn't even take a picture then.

avidly eagerly and enthusiastically.

Avis United States-based automobile rental service that started in 1946 by Warren Avis. The first Avis rent-a-car office, named Avis Airline Rent-a-Car system, was opened at an airport near Detroit, Michigan in 1946. One of Avis' key competitors was the number one automobile rental service named Hertz. To compete against Hertz, Avis started a marketing campaign, positioning themselves 2nd to Hertz, as "Avis is only No. 2 in rent-a-cars, so why go with us? We try harder." This successful advertising campaign brought Avis fame and they expanded from a national company to one with branch offices around the world.

ax (axe) to grind, have an	to have a special interest or reason for being involved in something; a personal interest in something; an ulterior motive. This expression comes from a story entitled “Who’ll Turn the Grindstone?” first published in 1811. In the story, a man with a dull ax tricks a young boy. By flattering the boy’s good looks and intelligence, the man gets him to sharpen the ax on his father’s grindstone. Once the ax is sharpened the man rudely sends the boy off with no thanks or recompense. The author closes his tale with the comment, “When I see a merchant overpolite to his customers, begging them to taste a little brandy and throwing half his goods on the counter—thinks I, that man has an ax to grind.”

axes to grind, have a lot of (colloquial) have a lot of special reasons of one's own for being involved in something. This expression is from a story entitled "Who'll Turn the Grindstone?" first published in 1811. It purports to relate an incident in the boyhood of the author. One morning a man with an ax over his shoulder greeted the boy most pleasantly and asked if his father had a grindstone. When the boy said, "Yes," the man complimented him upon his good looks and intelligence and asked if he might borrow the use of the stone. The boy, flattered by the attention, was sure that he could. The man then remarked that the boy appeared to be unusually strong for his age. The lad fell for all this flattery, and before he knew it he had been tricked into turning the stone until the very dull ax was as sharp as a razor. Just then the school bell was heard to ring; the man's manner changed abruptly, and without a word of thanks or a coin, he berated the boy for being a sluggard and ordered him to be off instantly so as not to be late for school.

Summary of Study (4 Aug. 64)

n. figuratively, the circumstances or data surrounding, preceding or intimately related to an event, situation, development, etc., especially in regards to its causes or history. Literally, the term means music playing at the back or behind something else, such as music which accompanies some other activity. The term especially refers to music that accompanies the action and dialog of a film, television show, radio show, etc., but also can include the music played over a loudspeaker system in a store, elevator or restaurant that is intended to provide a soothing background.

backing sheet n. a heavy sheet of high-quality, hard-surfaced, smooth paper upon which a stencil sheet is mounted when typing. The backing sheet is used to compensate for or smooth out any irregularities in the typewriter roller, and thus gives a smooth typing job.

backlash instance of something hitting or jumping back with speed and force. Also called backflash.

backlogged built up as a backlog, an accumulation, especially of unfinished work or unfilled orders.

built up as a backlog, an accumulation, especially of unfinished work or unfilled orders. @If traffic or bodies begin to be backlogged, one can stall completely just handling the queries about the backlog without getting anything really done.

backs almost snapped, had their had them almost overcome; had them almost defeated. Variation of the phrase break the back of.

backs, all over (one's) (colloquial) annoying or causing trouble to (one).

back-seat driving interfering in affairs that are not one's concern or responsibility by means of criticism, unsolicited advice or the like. The term comes from automobile passengers offering the driver unsolicited advice, warnings, criticism, etc., especially from the back seat.

bird commonly found in the region. The Orioles team has remained in Baltimore for more than a hundred years.

Balzac	<p>Honoré de Balzac (1799 - 1850), French novelist. In total, his literary output amounted to about 100 novels, six plays, many pamphlets and a huge amount of correspondence. The romantic and the realistic coexisted in both Balzac's character and his writings. Considered to be the founder of the realistic school, he used vast reams of meticulous detail and faithfully depicted ordinary and undistinguished lives.</p> <p>Honoré de Balzac (1799–1850), famous French writer and novelist of the 1800s who is considered one of the greatest fiction writers of all time. He is best known for his mammoth work, <i>The Human Comedy</i>, a series of nearly one-hundred novels and short stories, begun in 1834, in which he attempted to create an extensive view of the factors governing French life from the time of the French Revolution in the late 1700s to his own day. His realistic stories tried to depict every aspect and phase of French society, including private life, military life, political life and country life. In total <i>The Human Comedy</i> contained more than 2,400 characters, the most important of which appeared throughout the work.</p>
bamboo stick	<p>n. a small bamboo rod used in an Oriental tally system to keep count of the amount of loads a worker carries. For example, a worker unloading bags of rice from a ship collects a bamboo stick for each bag unloaded. When finished with his work, he hands the sticks in to the paymaster and collects his money.</p>
bamboo, under the	<p>beaten or caned with bamboo.</p> <p>a coined term meaning being tortured with a stick of bamboo. This is a reference to a form of punishment or torture used in Middle and Far Eastern countries, such as Turkey and China, where a person is repeatedly beaten with a bamboo stick, especially on the buttocks or the soles of the feet. Under as used here means subject to the force of.</p>
Ban the Bombers	<p>a made-up name for a group which would get rid of nuclear weapons.</p>
ban, the	<p>a reference to a ban imposed in 1968 on the entry of foreign students of Scientology to England. Several years later, the ban was lifted as no sufficient cause could be found to justify it.</p>

bands	ranges; levels. Because these bands through which they come up are not social bands! ranges; levels.
bandwagon, jump (climb, get, etc.) on the	to join what appears likely to be a successful endeavor or enterprise or to attempt to join the winning side, used in reference to social, political or cultural movements, fashionable or current trends, etc. A bandwagon is a large wagon that is capable of carrying a band of musicians, as in a parade or en route to a political rally. To jump (climb, get, etc.) on the bandwagon originated in the early 1900s when supporters of presidential candidate William Jennings Bryan (1860–1925) climbed on his bandwagons as they rolled through town, to show their support and enthusiasm.
bandwagon, on the	(colloquial) on the popular or apparently winning side, as in an election. The expression comes from the fact that, in the mid-nineteenth century, it was customary in the United States, especially in the southern states, for a band to play on a wagon through the streets to advertise a forthcoming meeting, political or otherwise. At election time local leaders would show their support of a candidate by climbing on the wagon and riding with the band.

bank holiday

(British) any of several legal holidays, usually on a Monday, when banks, schools, etc., are closed.

(British) weekdays which are recognized as legal holidays for banks, schools, government offices and other businesses to allow employees time off. The term originated from a practice at the Bank of England in the early 19th century which, at that time, gave its employees forty weekday holidays per year in recognition of certain Saint's days that occurred throughout the year. In 1830 this number was reduced to eighteen days by the bank and in 1834 it was again reduced by the bank to only four days. Later, in the year 1871, a law was passed by the British government in an effort to improve social conditions for workers in Britain. The law made certain days “Bank holidays,” for the whole country not just for banks. A memorable day, because it's the day after bank holiday parade and nobody has pneumonia from the usual rain that they have on bank holiday. -A Summary of Study (4 Aug. 64)

banky being influenced by bank and displaying bad temper, irritability, lack of cooperation and the signs of dramatization; irrational. See also dramatization; engram bank.

being influenced by bank and displaying bad temper, irritability, lack of cooperation and the signs of dramatization; irrational.

banned in Boston a phrase describing literature censored by the ultraconservative Watch and Ward Society of Boston, Massachusetts, USA. During the late nineteenth and early twentieth centuries, this society, by official agreement, acted as a censor getting literature banned if it did not meet strict moral and religious standards. Such censorship was tolerated within Boston, however, throughout the rest of the United States the practice was viewed with either humor or annoyance. Writers, editors and publishers went to court to defend books and magazines against the ban while others simply defied the rules. By the 1920s the phrase "Banned in Boston" had become a national joke. It was eventually adjusted to match the more popular standards prevalent in the United States.

barber basin medicine	<p>refers to the practice of surgery by barbers in earlier centuries. Generally untrained in medical procedures, their “treatments” were very painful with severe infections and often death resulting from unsanitary conditions.</p> <p>n. a reference to the crude medical services that barbers delivered for many hundreds of years. As early as the fifth century, barbers not only cut hair but also engaged in dentistry and surgery, a practice which continued until the mid-eighteenth century when it became prohibited. Bloodletting was one of the very common treatments they performed. During this period, a broad assortment of ailments were believed to be caused by an overabundance of blood in the system or by impurities in the blood. To relieve this, the patient would usually be cut at the bend of the elbow to allow extra or impure blood to flow out of the body and into a basin, hence the term “barber basin medicine.” Practicing at a time when most people could not read, barbers were recognized by the red and white spiral pole, projecting from the front of their shops. The white stripe on the pole represented the bandages used in bloodletting, the red represented the blood. A basin hung from the pole to represent the vessel used to catch the blood. Although most barbers discontinued the practice of dentistry and surgery in the 1700s, they retained this symbol for their profession.</p>

of his own wife. Death (in human form) next comes to claim Barrymore but is chased up a tree and is unable to come down until Barrymore releases him. Barrymore and Death engage in long philosophical discussions about life and death and Barrymore begins to realize that while Death has been trapped up the tree, nobody in his town has died—something which is both good and bad. Realizing he can not hold Death up the tree forever, Barrymore begins to prepare himself for dying. Death tricks the grandson into climbing up the tree and makes him fall and break his neck. Unable to die, the boy is faced with living the rest of his life as a paralyzed cripple. Barrymore seeing the foolishness of his actions lets Death down from the tree to claim both of them. The last scene is Barrymore and his grandson walking together in a heavenly sheep pasture.

bars obstructs; shuts off; closes.

bars, lower the lock away in prison. Used figuratively in this lecture.

a coined term meaning to punish, penalize or discipline (a person). This is an allusion to the bars of a cage or prison cell being closed on someone.

barter deal n. a reference to an advertiser making arrangements to trade something (such as a product or service) for advertising time, as opposed to paying for it with cash. For example, a local car dealer could give a new car to a radio station in exchange for free advertising. The radio station could then use this car for its employees or as a contest prize, etc., without having to buy it.

Base Order Sea Org issue type which originally began coming out in 1967 from the Base Organization which was the controlling organization of the Sea Project (now known as the Sea Organization). Base Orders have been used interchangeably with Flag Orders. See also FO in this glossary.

an issue type which has been used interchangeably with Flag Orders. See also Flag Order in this glossary.

base, off m. 1. unawares, unprepared, by surprise or off one's guard. This phrase comes from the game of baseball where a batter (batsman), after having hit a ball, attempts to run to one or more bases, ultimately returning to the place from which he hit the ball in order to score. Once having made it to a base, if he incautiously steps off it while waiting for the opportunity to run again, the opposing team may tag him (catch him off base) with the ball and put him out of play. 2. inaccurate or wrong in some way; mistaken. 3. out of the ordinary or unusual.

baseball a game where a base is one of four stations, laid out in the form of a diamond, which must be touched by a player after hitting the ball with a wooden bat.

the round, hide-covered ball used in the game of the same name, played with the ball and a bat by two opposing teams of nine players each, on a field with four bases forming a diamond.

bash (colloquial) strike with a violent blow; smash.

bastions	projections from a fortification to give the defenders a wider firing range.
bat (one™s) head out	try very hard to understand or think out something difficult; tire (oneself) out by thinking. A variation of beat (one™s) brains out.
bat 1000 (one thousand)	figuratively, to have a perfect record of achievement, accomplishment or performance; to attain perfection. This term originated in baseball where a player's effectiveness is reflected in his batting average. Batting average refers to a player's success at hitting the ball, in comparison to the number of chances to do so. For example, a player who has 100 turns to hit the ball and is successful on 40 of those opportunities, has a batting average of .400 (spoken as “four hundred”). This average is considered

Do not distribute

exceptional and few players have ever scored higher. If a player was batting 1.000 (spoken as “one thousand”), it would mean he was successful every turn at bat. The phrase bat 1000 came to be used more generally to indicate a perfect record of achievement, performance, etc. For example, if a person passed every one of his exams in an entire school year, he could be said to be batting 1000.

bat one thousand

do the right or correct thing each and every time. From the sport of baseball where the percentage of hits of the ball by the batter is kept in 3 figures (e.g., if a batter hit the ball fifty percent of his times at bat his percentage would be written .500 and would be said “five hundred” in the language of the sport). Thus for a person to hit 100 percent of the time (1.000) would be to bat “one thousand.”

do the right or correct thing each and every time. From the sport of baseball where the percentage of hits of the ball by the batter is kept in 3 figures (eg. fifty percent would be written .500 and would be said “five hundred” in the language of the sport). Thus a person hitting 100 percent of the time (1.000) would be batting “one thousand.”

bat, blind as a

unable to observe or perceive something directly before one or which is within one's powers of observation or perception. Literally, it means to be unable to see anything with the eyes or to have extremely poor vision. Although the origin of this phrase is unknown, it was first seen in the late 1500s and is probably an allusion to the bat, earlier thought to be blind or unable to see. The bat is actually not “blind,” but relies on a different method of “sight” than the eyes. A bat moves and flies by a process, by which it sends out sounds (of a very high tone that cannot be heard by the human ear) which reflect off objects in the vicinity. The sounds bounce off the objects and by listening to the returning echoes of the sound, it can find the location of obstacles or prey.

bat, off the

without hesitation; immediately; quickly.

bat, old

a gossip or bad-tempered old woman.

a gossip or mean old woman.

n. an unattractive or repulsive old woman, especially one who is unpleasant, gossip and mean. The word bat originally (eighteenth century or earlier) referred to a prostitute, especially

batter up a phrase used in the game of baseball to call up a player to take his turn at bat. During a game, members of one team take turns trying to hit a ball pitched (thrown) towards them. The player attempting to hit the ball is called the batter. Up, as used here, means “having a turn; so as to have a turn.” The phrase batter up is called out by the umpire (the official who supervises the game and enforces the rules) to indicate that it is time for the batter to move into position to bat the ball so that play can start.

battier (slang) insaner; crazier; more eccentric.

batting about in the bottle like a bluefly same as batting around like the blue bottle in the cage.

batting average (baseball) a measure of a baseball player's hitting ability obtained by dividing the number of hits he makes by the number of times at bat. For example, if a player bats 100 times and makes a hit 35 times, then his batting average is .350. Used figuratively, this phrase means a degree of achievement or accomplishment in any activity. Now, that's their lowest acceptable batting average.

n. figuratively, a record of achievement, accomplishment or performance, specifically the number of times one is successful at something compared to the number of attempts at it; the level of success maintained by a person in any activity. The term batting average comes from certain games, such as baseball, in which a player's ability to hit a ball is measured so as to determine his effectiveness. The success a player has at hitting the ball, in comparison to the number of chances to do so, determines his batting average. For example, a player who has 100 turns to hit the ball and is successful on 30 of those opportunities has a batting average of .300 (spoken as "three hundred"). The phrase can also be applied to activities other than sport. For example, if one has a high batting average in some field, as teaching, sales, etc., he has a good record of success in that activity.

batting high (figurative) doing well; achieving a high rate of success. From baseball, where a player's rate of success in batting is recorded as a specific figure, known as his batting average; a player with a high figure is said to be "batting high."

a coined phrase meaning having a high batting average.

batting on a thousand a coined variation of bat 1000.

Bear Implants	goals implanted between 83 trillion trillion trillion years ago to about 40.7 trillion trillion trillion trillion years ago. These implants were given in an amusement park setting with either a mechanical or live bear present. See also goal and implant in this glossary.
bear in mind	see MIND, BEAR IN.
bear, bring (pressure) to	concentrate (pressure) on with a specific purpose.
bear, bring to	to exert or apply pressure, effort, etc., so as to bring about an effect; to cause to have an influence; to bring into effective operation on or against.
beard, pull a (my) long gray	a coined phrase meaning to show wisdom, experience, or the like; to act learned. This phrase may come from the fact that throughout history a beard has symbolized full manhood, dignity, wisdom and other such qualities. Philosophers, rulers and other notable persons in history have often been depicted as having beards. To pull a long gray beard literally gives the idea of a wise and experienced man stroking or pulling on his long gray beard when giving advice or speaking authoritatively on something.
beard, pull a long, gray	act the sage, or wise man. Beards have traditionally indicated age and experience. The image of this expression is that of a man who tugs or strokes his long, gray beard as he gives forth his wisdom.
bearing right down	working quite hard at; giving complete, full strength and attention to.
bear-trap memory	n. a coined term meaning a great capacity for retaining (and recalling) information, etc., in the mind. This is probably a humorous variation of the expression mind like a steel trap, meaning that one is very quick in grasping or understanding things or that one can easily learn a large number of facts about many different things. A steel trap is any of various traps used to catch animals consisting of spring-operated, sharp-toothed jaws that snap quickly and tightly shut on an animal's leg when it steps on the trap. A bear trap is a rugged steel trap designed to capture bears. The trap is chained to something such as a tree and when a bear comes by and steps on the trap, it triggers the release mechanism, the toothed jaws snap shut on his leg, and the bear is

having an increasing number of levels (on the Prehav Scale) becoming active on each successive assessment (thus not being able to obtain one reacting level). See also Itoutine 3 and Prehav Scale in this glossary. Now, the point I'm stressing here is that the list has another importance rather than its significance, is we don't want the list to be too beefed up.

beefs up

(slang) enlarges; becomes greater or more extensive.

(slang) gets stronger as by adding units. Used figuratively in this lecture in reference to adding units of charge.

(slang) makes stronger as by adding units. Used figuratively in this lecture in reference to adding units of charge.

a phrase which describes the sensation of increasing solidity of masses in the mind. When this occurs, we say "the bank is beefing up." -HCOB 19 January 1967.

(slang) enlarges; becomes greater or more extensive. Then your mail beefs up and you spend your time answering the letters and you don't outflow.

beefy

(slang) powerful.

solid; heavy.

Beefy

solid; heavy. The bank starts to become hard, beefy, lumpy. -Goals Listing (9 Aug. 62)

Beelzebub

the main character in the book Beelzebub's Tales to His Grandson, An Objectively Impartial Criticism of the Life of Man, by Russian-born mystic and philosopher, George Ivanovitch Gurdjieff (ca. 1872–1949). Beelzebub is a fallen angel who has been exiled to the planet Mars. He subsequently constructs an observatory on Mars, from which he observes the universe and particularly the planet Earth. Beelzebub describes what he sees on the planet and makes comment on the various characteristics and actions of its people.

Beery, Wallace

(1889 - 1949) American film actor and comedian.

(ca. 1886–1949) an American film actor who played in over 250 motion picture films throughout his career. First working in a circus and then the theater, Beery began his film career in 1913.

wagen,

Beetle (Bailey)

a cartoon character created by American cartoonist Mort Walker (1923–) and first introduced in 1950 under the name Spider. Beetle first appeared as a college student and later as a soldier at Camp Swampy, where he does his best to resist authority, avoid responsibility and goof off. In addition to Beetle, the strip features his archenemy, the crude but lovable bully Sergeant Snorkle, the ineffectual General Halftrack and numerous others. The strip has won many awards, generated numerous paperback books, games, toys and animated cartoons.

belligerent	showing readiness to fight or quarrel.
bells	see engine room telegraphs in this glossary.
bellwearer	n. a variation of bellwether, literally a male sheep who wears a bell around his neck and leads a flock. It can also be used figuratively to mean a leader or chief, especially of people or groups thought of resembling sheep in lack of intelligence, foresight, etc., or a noisy or clamorous person; one inclined or apt to express (something) in an intense or passionate manner.
belly laughs	(colloquial) hearty laughs.
bellyful	(informal) all that a person can tolerate.
Belsen	a Nazi concentration camp in Germany during World War II. See also Auschwitz in this glossary.

Nazi concentration camp in West Germany during World War II. This and similar Nazi camps such as Auschwitz were the sites for detention of many millions who the Nazis labelled undesirable (most notably the bulk of the Jews of Europe). More than six million people were eventually exterminated in these camps. Those who were not killed outright were ill treated, many subjected to cruel experimentation and torture, and great masses died of disease or starvation.

the name of one of the many concentration camps run by the Nazis during World War II (1939–1945). Belsen was established in 1943 in northern Germany for holding prisoners-of-war as well as Jews. Although built to accommodate only 10,000 prisoners, by the end of the war it was housing more than 40,000. The camp had some of the most horrific living conditions of any, with tens of thousands of prisoners dying from starvation, disease and

(British slang) insane; crazy. Just go overboard with it, just go crazy with it, drive everybody around the bend with it, see? ∇ A Summary of Study (4 Aug. 64)

(British slang) insane; crazy. Now, we had one case here, actually, that for about five months was driving us all around the bend. –Briefing of Review Auditors (14 Oct. 65)

insane; crazy. Now, while he's doing this, what drives some auditors around the bend is he puts in a lot of additional itsas. - The Itsa Line (20 Aug. 63)

(British colloquial) insane; crazy. And when it was applied to the Comm-Member system only, staff members—seeing that that was vital and that it would speed up their lines and make things much easier—tried to put it into the internal communication system of the organization, thereby driving the communicator halfway around the bend because all she could do was reject these despatches when they weren't comm-member despatches.

(British slang) insane; crazy. Just go overboard with it, just go crazy with it ∇ make ∇ drive everybody around the bend with it, see? ∇ A Summary of Study (4 Aug. 64)

bend, string one a long a coined variation of string along, meaning to deceive or fool; to lead on dishonestly, especially (of a person) to put or keep in a state of misplaced confidence by apparent compliance or

Do not distribute

encouragement. This phrase alludes to keeping someone dangling on the end of a string while one makes up one's mind. (A bend is a knot used to fasten one rope to another rope, or to fasten a rope to an object.)

Benedict Arnold	(1741 - 1801) American general of the Revolutionary War. He performed notably in the early days of the war, but became bitter over several setbacks to his career. After receiving command of the American fort at West Point, New York, Arnold plotted to betray it to the British. The plan was revealed when the American forces captured Major John André of the British army, who was carrying messages between Arnold and the British. Arnold escaped to England and continued a military career, but was widely scorned by the English. See also American Revolution in this glossary.
beneficent	doing good or causing good to be done; conferring benefits; kindly in action or purpose.
benevolent	wishing to do good to others, kindly and helpful.
Bengal	a region in the northeastern Indian peninsula. a region in the northeast Indian penninsula.
Ben-Hur	the main character of the historical novel Ben-Hur A Tale of Christ, written in 1880 by American author, Lew Wallace (1827–1905). The story centers on the young, wealthy Jewish nobleman, Judah Ben-Hur who is wrongly accused by a former Roman friend of seeking to murder the Roman governor of Palestine. His mother and sister are imprisoned and he is sent to work as a slave aboard a ship. Years later he escapes and becomes a Roman officer who engages in a chariot battle against his former betrayer. After winning the battle he is reunited with his mother and sister who have contracted the disease leprosy. Both, however, are cured of the disease on the day of the crucifixion of Jesus Christ and the family converts to Christianity. This well-known story has been performed on the stage and has, several times, been made into a motion picture.
benign	of a kind disposition, gracious, kindly. tending to promote well-being; beneficial.
Bennington	a battle of the American Revolutionary War in which U.S. troops defeated the British. It was fought in 1777 near Bennington, Vermont.

a battle of the American Revolutionary War in which US troops defeated the British. It was fought in 1777 near Bennington, Vermont. See also American Revolution in this glossary.

Benny, Jack	(1894–1974) a popular and well-known American comedian, born Benjamin Kubelsky. He began his career as a violinist performing in vaudeville (American light theater entertainment in the late nineteenth and early twentieth centuries, which consisted of a succession of short unrelated acts of all kinds, such as comedians, singers, dancers, jugglers and musicians). After serving in the navy during World War I (1914–1918), he returned to vaudeville with a comedy act. He toured for several years, gradually rising to stardom, and in 1929 appeared in his first movie. His first radio program began broadcasting in 1932 and continued for twenty-three years. Through radio, and later television, he became famous for his image as a miser, his comic timing, his mildly exasperated expression, “Well!” his continuing joke that after decades he was still only thirty-nine years old and his self-mockery as a violinist. His television program, “The Jack Benny Show,” which also starred his real-life wife, Mary Livingston, continued for fifteen years.
benonana	n. a made-up word rhyming with phenomena.
bent	(British slang) abnormal; perverted. determined; set; resolved.
bent one's elbow	drank alcoholic beverages. drank alcoholic beverages; drank to excess.
benzene	a colorless, flammable liquid obtained chiefly from coal tar. It is used for removing grease stains and in making dyes and synthetic rubber. Beowulf	<p>an epic (a long narrative poem in a dignified, formal style, about the deeds of a traditional or historical hero or heroes) in Old English, estimated as dating from as early as the eighth century; the earliest long work of literature in English. The critical events are the slaying of the monster Grendel and Grendel's mother by the hero Beowulf, and Beowulf's battle with a dragon, in which he is mortally wounded.</p> <p>a heroic poem thought to have been written in the eighth century by an unknown author, considered the greatest poem of that era. The poem is more than three thousand lines long and is written in Old English (the language spoken in England from about A.D. 500 to 1100). Beowulf tells the story of a Scandinavian prince of the same name who visits the king of Denmark and offers to rid him of an evil monster (called Grendel)—for twelve years the beast had been attacking and eating the king's warriors. The king accepts this offer and Beowulf engages Grendel when he enters the hall that evening and attacks and eats a man. The monster finds he cannot escape from the prince's powerful grip. Tearing off his own arm, he finally wrenches free and leaves mortally wounded. The following evening while the warriors sleep, Grendel's mother comes to avenge the death of her son and kills a man. Beowulf thus sets off to track down the monster's mother to kill her. Successful, he returns home, and in time, becomes king.</p>
berating	scolding or rebuking severely. -Webster's New World Dictionary.
bereft	<p>deprived or robbed; dispossessed.</p> <p>the past tense of bereave meaning to take away or deprive, as if by violence; rob or strip away. To take away by destroying or spoiling; to deprive of power.</p>
Bergson	Henri Louis Bergson (1859 - 1941), French philosopher. He is best known for his theory which holds that the world contains two opposing tendencies, the life force (élan vital) and the resistance of matter against the life force.
Beria	Lavrenty Pavlovich Beria (1899 - 1953), Soviet secret police chief (1938 - 1953) under Soviet premier and dictator Joseph Stalin (1879 - 1953). After the death of Stalin in March 1953, Beria was promoted to a top government position. In July, however, he was removed from his post, arrested and placed on trial for "criminal and anti-state activities." In December 1953, it was announced on Russian radio that Beria had confessed to "subversive activities" and had been executed.

Bibles, give (someone) a stack of (slang) ask (someone) to make a very solemn pledge of one's honesty. A variation of the phrase swear on a stack of Bibles. Official oaths are sometimes taken with one hand on a Bible. This phrase implies that more Bibles make an even stronger oath.

(slang) ask (someone) to make a very solemn pledge of one's honesty. A variation of the phrase swear on a stack of Bibles. Official oaths are sometimes taken with one hand on a Bible. This phrase implies that more Bibles make an even stronger oath. They—you give them a stack of Bibles a mile high and they'd do something about it. –The Failed Case (27 Oct. 64)

Bibles, lay your paw on a stack of a humorous coined variation of the phrase swear on a stack of Bibles. A paw is the foot of any animal and is used here to refer to a person’s hand, especially when it is large and clumsy.

Bibles, swear on a stack of to make a very earnest and solemn pledge of one’s truthfulness, honesty, etc.; to affirm (something) vigorously.

Do not distribute

Carried out when making a declaration or oath, this expression comes from the action of placing one's hand on a Bible or some other sacred object to outwardly show both a sense of responsibility and a solemn pledge to the Supreme Being. Such a practice is followed in some courtrooms where a witness giving testimony may be sworn to truth by putting his hand on a Bible (or some other sacred object) and being asked, "Do you swear to tell the truth, the whole truth, and nothing but the truth?" Swearing on a stack of Bibles would serve to place even more binding power on one's oath and make it that much stronger.

bibliophile a lover of books, especially one who likes to collect books. From the Greek biblion, book, and philos, friend.

a person who loves or collects books, especially as examples of fine or unusual printing, binding or the like.

“William the Conqueror.”

a made-up name for the first king of England, whose name was William. See also William in this glossary. I don't know who was the first bloke over here, in this present racial strain in England but it would be somebody. I suppose it would be William. I guess it'd be Bill “Bill the Bastard.”_

billiard ball	a small, solid ball used in the game of billiards which is knocked into other balls by a long, tapering stick called a cue.
billiard balls	hard, round balls used in the game of billiards. Used figuratively in this lecture.
Billings	a city in southern Montana, in the northwest United States.
billion-dollar question	a coined variation of the phrase sixty-four-thousanddollar question.
billycan	(Australian) any container in which water may be carried and boiled over a campfire, ranging from a makeshift tin can to a special earthenware kettle; any pot or kettle in which tea is boiled over a campfire. n. a chiefly Australian term for a cylindrical container usually made of tin or enamel, having a lid and wire handle and often used for making tea, outdoor cooking or for carrying food or liquid. This word comes from the native Australian word billa, meaning water and can (container).
billy-o flurry	a coined phrase meaning a flurry of activity and commotion. Billy-o is usually used in the phrase like billy-o meaning happening with great speed, vigor, etc., and flurry means sudden excitement, movement, etc.
billy-o, gives (someone)	(colloquial) gives (someone) trouble; makes (someone's) life unpleasant. A variation of gives (someone) hell.
billy-o's sake, for	(colloquial) an exclamation expressing impatience, annoyance or surprise, especially in questions or requests. A variation of for goodness sakes.
Bimburg	a made-up name for a town.
bimph	a made-up word.
binary digits	the numerals of a number system which uses a base of 2 rather than the base of 10 used in the customary number system. The

Do not distribute

binary system uses combinations of the digits 0 and 1 to express all other numbers. This results in large strings of figures to represent a number. For example, the number twenty would be written as 10100 in this system.

the numerals of a number system which uses a base of 2 rather than the base of 10 used in the customary number system. The binary system uses combinations of the digits 0 and 1 to express all other numbers. This results in large strings of figures to represent a number. For example, the number 20 would be written as 10100 in this system.

binary is a number system in which the base used is two, each number being expressed in powers of two by using only two digits, specifically 0 and 1. Because this system uses just two digits, it produces long numbers in comparison to a base ten (decimal) system. For example, the number fifty-nine would be expressed as the numeral 1110 11 in binary digits. -Editor.

bind (colloquial) a difficult or restrictive situation.

(informal) a difficult situation.

Bingblatt, Jing a made-up name.

Binghamton, New York a city in southern New York.

bingo an exclamation used to express sudden, swift action or change.

(slang) sudden, swift.

binnacle a fixed case and stand that supports and protects a ship's compass and is located near the helm (the steering gear of a ship). It is usually built of hardwood or a nonmagnetic metal. The upper part consists of a protective brass cover or hood. I've had such a chap walk aboard, take a look at the helm and say, ``So that is a wheel! Well, I've often wondered! And that is a binnacle, that's a compass!

a nonmagnetic stand for a ship's compass. ``And that is a binnacle, that's a compass!" ⇐Study and Intention (18 Aug. 66)

n. a fixed case, box or stand, positioned near a ship's helm, that houses a ship's compass and often a light to illuminate the compass. The body of the binnacle is normally made of hard wood or a nonmagnetic metal (to prevent influence on the compass' magnetic needle), with an uppermost section consisting

Do not distribute

of a protective brass cover or hood. In older ships the binnacle was also used for stowage of other items used on the deck, such as the ship's log book, candles and current charts. Originally spelled bittacle until the mid- 1700s, the term derives from the Italian word abitacola meaning little house or habitation (place where someone or something lives).

biochemical

of or pertaining to the interaction of life forms and chemical substances.

relating to the chemical substances occurring in living organisms.

of or pertaining to the interaction of life forms and chemical substances. "Man is an animal. He is a biochemical protoplasm which goes noplac." -The Itsa Line (20 Aug. 63)

biochemist

a person skilled in biochemistry, the branch of chemistry that deals with plants and animals and their life processes.

an expert in biochemistry (the study of chemical substances occurring in living organisms).

biocompound

n. a reference to an organic compound. Bio is a combining form meaning life, and a compound is a substance that contains more than one kind of atom with a definite composition that can be described by a chemical formula. Organic compounds contain carbon atoms, and included in such are proteins, fats and carbohydrates. Living things have the ability to add compounds together to form more complex compounds, and to break compounds down into simpler substances. Biocompound extracts from plants and animals have been used in the manufacture of certain drugs.

biologist

a specialist in biology, the science of life or living matter in all its forms and phenomena, especially with reference to origin, growth, reproduction, structure and behavior.

biophysics

the branch of biology that applies the methods of physics (the science that deals with matter, energy, motion and force) to the study of biological structures and processes.

biospectroscope

n. a made-up word.

biotin

a vitamin important in protein, carbohydrate and unsaturated fatty acid metabolism, normal growth and maintenance of skin, hair, nerves, bone marrow and various glands.

Do not distribute

a vitamin which helps the body break down fats and is an aid in producing energy. PART ONE, CHAPTER 11, #2

bird

(slang) a person. It just had to do with the fact that this bird who the field auditor wanted to have help him, you see—this guy could be sent into the org very cheaply.

(slang) a person.

(slang) a person, especially one having some peculiarity.

(slang) person.

(slang) a person, especially one who is odd or remarkable. Hippocrates “That old bird was no good anyway. Didn't pay his bills!”

(slang) a person, especially one having some peculiarity. This bird's around the bend or something like that. -Handling ARC Breaks(28 May 63)

(slang) a person. Many of them get away with it, but you'll find some bird who knows the proper thing to do is vary it. –Out-Tech (21 Sept. 65)

(slang) a person, especially one having some peculiarity. It was some such bird. -E-Meter Data Instant Reads, Part 1 (24 May 62)

a slang term for a person, especially a mildly eccentric one. -Webster's New World Dictionary.

(slang) a person. See how upsetting all this is to this bird?

(slang) person. All of a sudden this bird comes along, and he gets the idea of conquest.

bird entrails

n. a reference to the internal organs (entrails) of birds which, in ancient times, were studied in order to forecast future events, determine the disposition of the gods regarding a matter, etc. For example, in Rome, religious officials (called augurs) would cut open birds and give advice in accordance with the appearance of their entrails. This augury, as it was called, was used for such things as discovering whether or not the gods approved or disapproved of a course of action, especially one of a political or military nature.

bird, free as a

(colloquial) very free; with no limits.

black dog

n. 1. a counterfeit silver coin made from pewter, a silver-gray metal consisting of tin, lead and sometimes other cheap metals. Black here refers to bad money and the term black dog for counterfeit silver coins was common in the early eighteenth century. 2. a depression of spirits, melancholy or illhumor, etc. This term is often used in the phrase black dog on one's back, used to describe a person who is depressed or sulky (with the idea that there is an invisible black dog sitting on his shoulders). This phrase dates from the 1700s and is a reference to the superstition that bad luck supposedly accompanies a black dog and that the sight of a black dog and her pups is an unlucky omen.

Black Dragon Society

a Japanese nationalistic group. In the early twentieth century this group, made up of the more extreme militarist and nationalist elements of the country, advocated state socialism over capitalism and supported the annexation of Korea and Manchuria. During the 1930s, the military party extended its control over the government and brought about an increase in armaments, and later economic and political penetration of China.

a Japanese patriotic group founded to promote Japanese expansion.

a Japanese patriotic group founded to promote Japanese expansion. The government of Japan, for some vast, vast, vast period of time, was run by the Black Dragon Society. -Handling ARC Breaks (28 May 63)

a secret Japanese political organization established in 1901 and active up to and through World War II (1939–1945). The society promoted conquest and the expansion of the Japanese empire, obtained cooperation of Japanese officials through intimidation and assassination, and engaged in secret operations in various countries, including Korea and China. After World War II, the Black Dragon Society was dissolved by the United States authorities occupying Japan.

belief in persons, companies or nations. It is a common tool of agencies who are seeking to destroy real or fancied enemies or seek dominance in some field.

(black = bad or derogatory, propaganda pushing out statements or ideas) propaganda that is used to destroy reputation or public belief in persons, companies or nations. It is a common tool of agencies who are seeking to destroy real or fancied enemies or seek dominance in some field. It's also black propaganda, you see "I don't see why the D of P doesn't hire some auditors, you know?"

a covert operation where unknown authors publicly effect a derogatory reaction and then remain unknown. Basically it is an intelligence technique. Black propaganda (black = bad or derogatory, propaganda = pushing out statements or ideas) is the term used to destroy reputation or public belief in persons, companies or nations. It is a common tool of agencies who are seeking to destroy real or fancied enemies or seek dominance in some field. The technique seeks to bring a reputation so low that the person, company or nation is denied any rights whatever by ``general agreement," making it possible to then destroy the person, company or nation with a minor attack if the black propaganda itself has not already accomplished this.

Black Sea

a sea south of the USSR and north of Turkey.

black sun

(astronomy) an object (also known as black hole) so massive that nothing, not even light, can escape its gravitation. Black holes were given their name because they absorb all the light that falls on them. The existence of black holes was first predicted by the general theory of relativity, which states that gravity increases in proportion to mass and mass increases in proportion to density. Black holes are thought to arise from the death of very massive stars.

Black Watch Mary

reference to Death Watch Mary Mackleforth, a nurse in the novel Oh, Doctor! by Harry Leon Wilson. See also Oh, Doctor! and Wilson, Harry Leon in this glossary.

a reference to Death Watch Mary, a character in the novel Oh, Doctor! by American author, Harry Leon Wilson (1867–1939). Death Watch Mary is one of the nurses taking care of the main character, Rufus Billop. Death Watch Mary enters to inspect Billop who has taken to his bed to die in spite of having nothing wrong with him. Checking his temperature she disagrees with the first reading of the thermometer and requests a new one to replace

blackness	<p>a state or condition of being black, in terms of facsimiles or masses the preclear is looking at.</p> <p>heavily occluded state in which a person is so far gone he can't even see pictures anymore—he only sees blackness in front of him. See also mental image pictures in this glossary.</p> <p>a state or condition of being black, in terms of facsimiles or masses the preclear is looking at. All you have to do is make them mock up blacknesses and shove it into themselves. –Levels of Skill (6 July 1957)</p>
blackout	the extinguishing or concealment of all visible lights in a city, usually as a precaution against air raids.
blacksmith's bar	n. a reference to a bar of iron used by a blacksmith to form such things as horseshoes, door hinges, and other small metal objects. A blacksmith heats the bar in a furnace until it is red hot, pulls it out of the fire with a pair of tongs and then pounds it into the desired shape by hitting it with a hammer on an anvil (a heavy iron block with a smooth top).
blacktop	a type of material used for paving roads, parking lots, playgrounds, etc.
bland	unemotional, indifferent or casual.
blanketing	throwing oneself as a thetan over another thetan or over a mest body. Blanketing is done to obtain an emotional impact or even to kill.

Do not distribute

throwing oneself as a thetan over another thetan or over a mest body. Blanketing is done to obtain an emotional impact or even to kill. See also thetan and mest in this glossary.

blankety-blank-blank	(informal) a euphemism for unprintable or unspeakable words. From the practice in the late 1800s of leaving blank spaces to represent profanity. (informal) a euphemism for unprintable or un- speakable words. From the practice in the late 1800s of leaving blank spaces to represent profanity. His question—blankety-blank-blank it!— was, “Has he ever kicked a horse?” –Auditing by Lists (16 Apr. 64)
blasé	bored or unimpressed through overfamiliarity; insensitive. indifferent to or bored with life; unimpressed as or as if from an excess of worldly pleasures.
blasphemous	pertaining to words or actions showing disrespect or scorn for God or anything held sacred.
blast furnaces	furnaces in which ores are smelted (fused or melted in order to separate the metal contained in them), by blowing air under pressure into the furnace from the bottom to make an intense heat.
blasted	damned; cursed.
blasting	(informal) criticizing severely.
blasting powder	an explosive black powder used for blasting materials apart such as rock. Blasting is a process of splitting and breaking up any object by means of gunpowder or another powerful explosive. This process is employed extensively in mining and in separating large masses of stone or rock from the earth, in building, road making, etc. It requires a lot of leaning on these great, big “widow-maker” pneumatic drills and blasting powder and it's a very violent activity.
Blastonsteins	a made-up name for a store.
blasty	characterized by severe or violent outburst or the like.
blazes	(informal) hell. (informal) hell. What in blazes are you doing?

Do not distribute

blazes, like	(informal) very much, very hard, very fast, etc. (informal) very much, very hard, very fast, etc. Now, if you get the precision then—that's just an example of this—if you get the precision with which you split assessment and auditing and get how they never encroach on each other's borderlines, you'll be able to assess like blazes. –Auditing and Assessment (3 Mar. 64)
bleary eyed	having blurred or dimmed eyes, as from sleep or weariness.
bleed down	a coined phrase used figuratively to mean to drain, discharge or unburden a thing (of something); to extract or draw (something) out or off of.
bleeding	draining or drawing sap, water, electricity, etc., from (something). Used figuratively in this lecture. (slang, British) used as a substitute for a strong expletive. the operation of letting blood; a procedure that was used to cure diseases. A vein of the arm was cut and a small amount of blood was withdrawn. Sometimes leeches were used to draw out the blood. George Washington had contracted a severe cold and so bleeding was attempted to cure it. I don't think bleeding will help him, it may not be the proper treatment. draining or drawing sap, water, electricity, etc., from (something). Used figuratively in this lecture. And we dont keep bleeding gains. -ARC Breaks and the Comm Cycle (24 July 63) (slang, British) used as a substitute for a strong expletive. And the trouble with every bleeding, blinking organization since the beginning of time, has been that when it was right they inspected it! the operation of letting blood; a procedure that was used to cure diseases. A vein of the arm was cut and a small amount of blood was withdrawn. Sometimes leeches were used to draw out the blood. George Washington had contracted a severe cold and so bleeding was attempted to cure it. I don't think bleeding will help him, it may not be the proper treatment. Please stop it!
blessed	(slang) a euphemism for damned, deserving cursing; outrageous. word used to give emphasis to the following word or words. (slang) a euphemism for damned, deserving cursing; outrageous.

mate, who claimed Bligh's severity as a commanding officer as justification for the revolt.

William Bligh (1754–1817), British admiral and captain of the ship *Bounty*. During a trading voyage in 1789 while sailing the Pacific from Tahiti to the West Indies, Bligh and eighteen of his crew were overpowered by mutineers and set adrift in a small boat. The mutiny was led by Bligh's first mate, who claimed Bligh's severity as a commanding officer as justification for the revolt. Bligh and his men, however, managed to survive.

blighting disappointing or frustrating.

destroying.

blind without guidance or forethought.

blind as a bat —see BAT, BLIND AS A.

blind helping the blind, the a coined variation of the phrase, the blind leading the blind, referring to one who does not know or understand something advising or teaching another who does not know or understand it. This phrase comes from the Bible where Jesus while preaching to his followers

blind leading the blind people who give advice to others or who take the lead but who are not qualified to do so. The phrase refers to a passage in the Bible, (chapter 15 of the Book of Matthew, verse 14) where it is pointed out that if the blind lead the blind, both could fall into the ditch.

blind spot n. an area or subject where one's vision, perception or understanding are lacking; something that one is unable or unwilling to confront or understand. This figurative use comes from the blind spot of the eye, a small area of blindness present in the normal eye's field of vision which corresponds to a place at the back of the eyeball where the optic nerve enters. The blind spot does not react to light entering the eye and thus no image can be seen at that spot. This is present in all eyes but not normally noticeable by the person as it covers such a small area and the blind spot of either eye is compensated for through the vision of the other eye.

blind staggers any of several nervous diseases of horses, cattle, etc., that make them stagger or fall suddenly. Used figuratively in the lecture.

n. a disease of domestic animals such as horses and cattle, affecting the brain and spinal cord and producing such symptoms

Blood and Sand title of a silent movie featuring Rudolph Valentino.

a film, based on a novel of the same name, released in 1922 and featuring famous American silent film actor Rudolph Valentino (1895– 1926). Blood and Sand is a tragic story about Juan Gallardo (Valentino), an apprentice shoemaker who becomes a valiant bullfighter. During his rise to fame, he marries his childhood sweetheart, Carmen, but is unfaithful to her when he meets a rich widow. Carmen finds out about his affair and rejects him. Driven to drink and dissipated, he is fatally gored in the arena and is carried away, leaving a trail of blood in the sand. The now disinterested widow sits in the stands laughing and joking

with another (wealthy) man, as Carmen rushes to Juan's side and he dies in her arms, saying, "I love only you."

- blood brothers persons bound to one another by a ceremony of mixing their blood. Used figuratively in this lecture.
- blood poisoning a diseased condition of the blood caused by toxins, bacteria, etc., and characterized by chills, sweating, fever and extreme physical exhaustion.
- blood, sweat and tears of the Churchills a reference to a statement made by the English statesman, soldier and author, Sir Winston Churchill (1874 - 1965) upon becoming prime minister of Britain "I have nothing to offer but blood, toil, tears and sweat."
- a reference to part of a speech made on May 13, 1940, by Winston Churchill (1874–1965), on the occasion of his becoming prime minister of England. The full quotation, said in reference to the task of waging war against Hitler's tyranny in World War II (1939–1945), was "I would say..., 'I have nothing to offer but blood, toil, tears and sweat.' " From this developed the shortened phrase blood, sweat and tears, which is used to imply intense, hard work, enormous effort and sacrifice in some task or relationship.
- blood-and-thunder magazines(informal) magazines specializing in violence.
- magazines specializing in violence.
- bloodhounding v. following or pursuing something intently; looking into or investigating ruthlessly or relentlessly as does a bloodhound. A bloodhound is one of a breed of large, keen-scented dogs, approximately 26 inches (66 cm) in height and weighing about 90–110 pounds (41–50 kg). They are known for their wrinkled faces, loose skin and very long ears. Their coats are commonly black-and-tan. The name refers to the care taken in the original breeding, that is to say they are derived of ancestors of good blood. (Unmixed with other breeds.) Bloodhounds were formerly used to track cattle and are now more commonly used to track missing persons or criminals. Known to follow a human trail for more than 50 miles (80 km), they track by scent alone and can follow a scent over dry land where no tracks are visible, swim across a river and pick the scent up on the other side. When used by police to recognize a criminal, the identification is accepted in a United States court of law.
- bloody (British slang) very; a vulgar usage. He said to the guy—he said,

blue paint

a reference to an ancient practice of the Celts inhabiting Great Britain whereby they would paint their faces and bodies with a blue dye made from a plant called woad. The dye was intended to give the men a more formidable and terrifying aspect in battle. Celtic women would also paint their nude bodies with the dye before taking part in certain religious rites.

Bolivar, Simon

Venezuelan revolutionary and charismatic leader (1783@ 1830) who liberated the South American colonies from Spanish rule. The son of a wealthy Venezuelan aristocrat of Spanish descent, Bolivar was born to wealth and position. His parents died when he was young and after being tutored he was sent to Europe at the age of 16 to complete his education. Later in Paris he met a former childhood tutor, Simon Rodriguez, who exposed him to various writers (including Jean Jacques Rousseau) and their concepts on the rights of man to freedom and liberty. Back home he joined rebels in unsuccessful uprisings against the Spanish in 1806 and later in 1811. However, Bolivar persisted and after exile he trained an army, and in a series of battles, some of the most daring in history, was successful in driving the Spanish out of Venezuela. After a final victory in 1824, rebel leaders formed the nation of Great Colombia consisting of present day Venezuela, Ecuador, Colombia and Panama. Bolivar was at the height of his power. However, Bolivar, now president, favored and envisioned the establishment of large political units in South America with strong controlling central governments while other liberal leaders were in disagreement. Several strong rebellious leaders emerged at local levels who fought against Bolivar's authority and the concept of a unified South America. Racked by sickness and nearly assassinated by his liberal enemies in 1828 (saved only by Manuela Saenz, Bolivar's faithful mistress) a disillusioned Bolivar said, "We who have struggled for independence of America have plowed the sea." Bolivar died in 1830, the same year in which Ecuador and Venezuela withdrew from Great Colombia and declared themselves independent nations.

Bolsheviks

members of a radical political party in Russia that seized power in November, 1917. The Bolsheviks became the Communist Party in 1918. They have had now a long period of time here—they've had something on the order of, I don't know, 1917 forward; they've had time enough for all the old-time Bolsheviks to die

assembles these to create the message.

- Book of Case Remedies** a book by L. Ron Hubbard which gives the exact and precise ways of getting bugged preclears and students moving up the Bridge again. And it's contra everything else he has been taught, you see? So it's all going in sideways and backwards, and he's got preconceived notions, and he's actually in Remedy B of the Book of Case Remedies.
- Book of Knowledge** a well-known illustrated children's encyclopedia, first published in 1910 in Great Britain as *The Children's Encyclopaedia*. In 1912 it appeared in the United States as *The Book of Knowledge* published by Grolier (a large US publishing company).
- Book of the Dead** ancient Egyptian collection of texts made up of spells and magic formulas, placed in tombs and believed to protect and aid the deceased in the hereafter. Numerous authors, compilers and sources contributed to the work. So it is no wonder that we discover the various wisdoms of Egypt appearing as the earliest wisdoms of Greece; it is no wonder why we look into the Christian Bibles and find ourselves reading the Egyptian Book of the Dead.
- Book of the Law, The** a book by Aleister Crowley which, per Crowley, was dictated by Aiwass, an angel who described himself as isa messenger from the forces ruling this earth at present.l_ Aiwass purportedly came on three occasions and each time dictated a chapter of *The Book of the Law*. This book was the text behind Crowley™s magic and his philosophy, which he summed up in the phrase, ihDo what thou wilt shall be the whole of the Law.ld See also Crowley, Aleister in this glossary.
- book on it, kept** a coined phrase used to mean having maintained a written record of something, as for the purpose of documentation or preservation of data. For example, during an experiment or test, if one had entered written notes into a book or had recorded specific responses to the test, one would have kept book on it.
- Book One™** Dianetics The Modern Science of Mental Health.
- book, by the** according to the rules; in the prescribed or usual way. No matter where you are or what your auditing room is, you set up the session and the meter always the same and always by the book.
- book, close the (my, etc.)** to consider a matter ended; to declare something finished; to bring to a conclusion. This phrase alludes to ceasing to enter items into an account book so that one can balance the accounts, draw up statements, etc.

Glossary for use by Translators – Side Checkers – Editors only.

book-auditing	of or pertaining to applying Dianetics and/or Scientology technologies from a book to help someone else. And, yeah, somebody in a co-audit; yes, sure, somebody in a-doing a book-auditing job; yeah, somebody, some student in the Academy; yeah, these people, oh, yes, these guys will be able to make progress with this thing. -The Itsa Line (20 Aug. 63)
boomp in the night, things that go	a reference to a phrase appearing in a
boot	to drive, force or move (something) by or as if by kicking. Used figuratively in the lecture.
boot school	n. a reference to boot camp, a basic training center where recruits are put through a program of military training and drilling. Boot is a term used to describe a new recruit in the United States Navy or Marines, undergoing basic training at boot camp. The term is thought to come from the leggings (boots) that newly recruited sailors used to wear during such training.
Booth, John Wilkes	(1838–1865) the assassin of President Abraham Lincoln (sixteenth president of the United States from 1861 to 1865). On April 14, 1865, at Ford's Theatre in Washington, DC, Booth gained entry to the president's private box where he found the president and his guests unguarded. Booth shot Lincoln in the back of the head and jumped to the stage, breaking a bone in his leg in the process. He still managed to escape on horseback, and President Lincoln died from the wound the next morning. Booth was an outspoken advocate of slavery and sympathized with the South during the American Civil War. He also believed Lincoln to be responsible for the war. In the months preceding the assassination, Booth had plotted unsuccessfully to kidnap the President, but with the American Civil War (1861–1865) ending, Booth changed his plans to murder. He led a small group to the Ford Theatre where Lincoln, Vice- President Andrew Johnson, Secretary of State William Seward and General Ulysses Grant were all to be killed by his men; however, only Booth succeeded among the group. Following his escape, Booth was trapped by authorities 12 days later, and refusing to surrender, was shot to death.
boots, pair of	figuratively, a position, status, or obligation to be fulfilled. For example, to fill someone else's boots means to take the place of someone, do their functions and assume their obligations.
bootstraps, by (one's)	(informal) by (one's) own efforts, in spite of disadvantages. And that way, why, you can lift man up by his bootstraps.

bother one's head	to trouble oneself with pondering or thinking (about something).
bottom dollar, count your	a coined variation of you can bet your bottom dollar, meaning you can be very certain or sure of something. Bottom in this case means the last in one's possession and originally referred to the last or bottom of a pile of gambling chips. Thus the phrase means one can be so sure of something that one can bet his/her last chip (dollar) on something and know it won't be lost. This phrase originated in America in the mid-nineteenth century.
botulinus	<p>a small organism, living in soil, water, on plants, animals and organic matter. When eaten by man and various animals this organism causes a food poisoning known as "botulism." This name comes from the Latin word for sausage "botulus," so named as it was first recognized in patients that had eaten sausage. Most often present in improperly home-canned food, and unwashed farm vegetables, it can also be found in meats, fruits and other foods. When infected the person can suffer headaches, disturbances of vision, weakness, paralysis and sometimes death. Brrrrrr, boom! "Oh, I'd say that was botulinus poisoning, Joe.</p> <p>a bacterium sometimes found in improperly canned or preserved foods which produces the toxin that causes botulism, an often fatal type of poisoning characterized by muscular paralysis and disturbances of vision and breathing. "Oh, I'd say that was botulinus poisoning, Joe." ⇐Study and Education (13 Aug. 64)</p> <p>n. a small organism, living in soil and water, and on plants, animals and organic matter. Bovril	a trademark for a commercially produced beef extract produced in England. It is used as the fundamental element in seasoning soups, gravies and beef tea.
bow, stretching (drawing, etc.) a	a coined variation of drawing a longbow.
Bow-Face	a made-up name for a criminal character in the comic strip Dick Tracy. Dedicated to the eradication of the crime in his city, Tracy is an incorruptible plain-clothed police detective. His enemies all possess faces as repulsive as their character, such as the skin-blemished Wormy, Mrs. Pruneface and Flyface.
bowl over	to astonish or surprise greatly; to overwhelm. This term originated in the mid-1800s in the game of cricket where a bowler bowls the ball and tries to knock the bails off the wicket behind the batsman, so as to get the batsman out of the game. The bails are little four-inch bars that rest on top of the wicket, a framework consisting of three stumps with grooves in the top, that are stuck into the ground. Literally to bowl over means to succeed in knocking all the bails off; figuratively, it means to knock over as if with a bowled ball.
bowler's box	n. a reference to the pitcher's mound in baseball, which is a slightly raised piece of ground on which the pitcher stands. From this mound the pitcher throws a ball that an opposing player tries to hit with a bat. In the game of cricket, a bowler is the equivalent of a pitcher and delivers the ball to a batsman.
bowling ball	a heavy ball used in the game of bowling which is rolled down a long wooden alley to knock over ten large wooden pins which are set upright at the far end. And you get this state as a huge bowling ball running down across the little ant or the individual citizen and he is smashed and he is smashed right now.
box canyon	a narrow canyon having a comparatively flat bottom and vertical walls.
box off	block so as to keep from passing or achieving better position.
box top	n. the very top part of a box containing a commercial product (such as a breakfast cereal), usually bearing the brand name of the product. Box tops are sometimes used in promotions to attract consumers where a free gift, prize, or reduced-price item is offered in exchange for a designated number of box tops or a certain number of box tops with a small amount of money. In order to receive the advertised item, the consumer must purchase the product, tear off the box top(s)—which acts as proof of purchase—and send it (or some other proof of purchase) in to the

breath test	a test done by an auditor using the E-Meter to measure the preclear's basal metabolism the basic chemical change in the body between oxygen and fuel. The test is done by having the preclear take a deep breath, hold it for just a moment and then let it out through his mouth. When the sufficiently fed and rested preclear takes in oxygen, it combines with the fuel and you will see a surge of physical energy on the meter. The needle will give a fall. For further information, read the book E-Meter Essentials by L. Ron Hubbard.
breath, paying a	a possible coined variation of pay lip service.
breathe down someone's neck	to stand close to someone in order to see (or oversee) what they are doing.
breather	(colloquial) a pause as for rest. (colloquial) a pause as for rest. You take a breather. îCreate and Confront (3 Jan. 60) (colloquial) a pause as for rest. You take a breather. ðCreate and Confront (3 Jan. 60)
breathing cone	n. a reference to an apparatus used in the medical profession in the mid-1900s to test a person's metabolic rate and basal metabolism. A person was connected to the apparatus by a mouthpiece and was told to breathe normally. The results of which were recorded and then used in determining different diseases, state of patient, etc.
bred in the bone	firmly instilled or established as if by heredity. The running of a truck company some guy who knows how but can't tell you how, and that sort of thing=got it bred in the bone, and all that sort of thing=you better not count on him in any push. =Methods of Education (25 Oct. 56)
breechclouts	cloths worn to cover the loins; loincloths. Also breechcloths.

(photography) a very involved and complicated process for developing photographs that uses oil pigments. Let's take an esoteric process like bromoil. ⇐A Summary of Study (4 Aug. 64)

n. a reference to a special process of producing a photographic print that is essentially a painting. The name comes from brom-, a prefix used in denoting something which contains an acid called bromine (such as bromide, a chemical in the original photographic paper used in this process) and oil. The steps of making a bromoil are many and detailed but include bleaching the color from the original photograph and then re-creating it by painting the photograph with oily ink. This ink tends to stick to the darker areas of the photograph and be repelled by the lighter areas, with the intermediate portions varying between these two extremes, resulting in a unique print.

bronchitis

an illness in which the lining of the bronchial tubes (the two large, main branches of the windpipe and their branching tubes), is inflamed and there is painful coughing.

an illness in which the lining of the bronchial tubes (the two large, main branches of the windpipe and their branching tubes), is inflamed and there is painful coughing. Sees a child coughing and whooping and coughing and just having a terrible time, and turns around very learnedly to the mother and says, "Bronchitis—acute," and walks away. -- Scientology and Effective Knowledge

a proprietary name of a simple box-like camera produced in 1909 by the Kodak company and which was extremely popular in the first half of the twentieth century. These cameras usually had a fixed focus and single shutter speed and were later available with flash attachments.

browning n. a substance, such as a liquid or paste, used in staining leather shoes

Browning machine gun a machine gun (an automatic gun, usually with a cooling apparatus, firing a rapid stream of bullets fed into it by a belt) which was developed by the famous American gun designer, John Moses Browning (1855 - 1926). Under tests in 1917, one of these guns fired over 600 rounds of ammunition per minute.

a reference to the automatic weapons designed and manufactured by American arms designer John Moses Browning (1855–1926). The Browning automatic rifle, pistol and machine guns were developed at the start of the twentieth century and were widely used by the United States and many other countries in both World War I (1914–1918) and World War II (1939–1945). The two most typical machine guns made by Browning were a .30 caliber, having a bore (inside diameter of barrel) of three tenths of an inch, and the larger .50 caliber, with a bore of one-half inch. Specialized versions of these were used on both tanks and aircraft.

a machine gun (an automatic gun, usually with a cooling apparatus, firing a rapid stream of bullets fed into it by a belt) which was developed by American gun designer John Moses Browning (1855–1926).

bruise off figuratively, to put or beat down, subdue or suppress something completely, as an idea, movement, etc. To bruise as used here means to crush as with heavy blows or pounding, and off here means fully or completely.

brung up (dialect) brought up (cared for in childhood; educated; trained).

brush (it) off dismiss (it) as unimportant; make light of (it).

dismiss (it) as unimportant; make light of (it). So it's not just "Well, he's running without tone arm action," and brush it off, you see? -The Itsa Line (20 Aug. 63)

brush country	sparsely settled country, covered with wild scrub growth. Rudiments, Valences Approved April 1991 sparsely settled country, covered with wild scrub growth.
brush off	to dismiss someone or something as unimportant; to not take seriously or think important; to put aside or pay no attention to. The term is thought to refer to the action of brushing unwanted dirt off of clothing; however, it is also possibly an allusion to the action of a Pullman porter (a railroad employee who waits on passengers in a Pullman car, a passenger car with especially comfortable furnishings for day or especially for night travel) who, sensing a poor tip from one of his passengers, gave that person just a few flicks with his clothes brush, then passed on to the next customer. to dismiss someone or something as unimportant; to not take seriously or think important; to put aside or pay no attention to. The term is thought to refer to the action of brushing unwanted dirt off of clothing.
brush one's hands of	a coined variation of wash one's hands of, meaning to dismiss or renounce interest in; refuse to have any further connection with; or take no responsibility for. To wash one's hands of comes from a story in the Bible where at Jesus' trial the Roman governor (Pontius Pilate), seeing that he could not save Jesus, took water and washed his hands before the multitude
brush war	n. same as brushfire war.
brush wars	warfare carried out by guerrillas (small defensive forces of irregular soldiers, usually volunteers, making surprise raids). warfare carried out on by guerrillas (small defensive forces of irregular soldiers, usually volunteers, making surprise raids).
brush, beat up the	a coined variation of beat the bushes, meaning to search through all places or areas for something or someone; to search diligently. This phrase is an allusion to people called beaters, who were hired to go along on a hunting trip and literally beat the bushes in an attempt to flush game from hiding so that the hunter could shoot it.
brushes	close approaches, especially to something undesirable or harmful.
brushing (someone) up refreshing (someone's) memory or skill.	
brush-off	a dismissal as unimportant or inconsequential.

bub	<p>[short for bubbly] brother, lad, boy—used chiefly as a form of address and with an implication of superiority to the one addressed. [ex - Come on, bub, make it snappy.]</p>

Do not distribute

n. a form of familiar address to boys or men; fellow. This term is thought to either be an alteration of the word brother or to have come from the German bube, meaning little boy. In addition to being used as a familiar address, as in “See you around, bub,” it can also be used to imply superiority over the one being spoken to, such as “Listen bub, you’d better make it quick.”

bubble octant

n. an instrument used to determine the altitude of a heavenly body (sun, moon or star) for the purpose of navigation. An octant is an instrument so designed that one can look through an eyepiece and (by the action of mirrors) see the horizon while at the same time viewing a heavenly body. This enables one to measure the heavenly body’s height in the sky (and thus get information to determine one’s position in relation to it). When the horizon is not visible, as at night or when weather conditions are unfavorable, one can use a bubble octant to make a similar measurement. This device contains a chamber of liquid with a bubble of air in it. The bubble octant is held so that the bubble lies in a certain position that shows the instrument is being held level to the horizon. The heavenly body is then viewed and measured similarly to how it is done with a regular octant.

bubonic plague

a very dangerous contagious disease, accompanied by fever, chills and swelling of the lymphatic glands. It is carried to humans by fleas from rats or squirrels.

a very dangerous contagious disease, accompanied by fever, chills and swelling of certain glands in the body. It is carried to humans by fleas from rats or squirrels.

Buck Rogers

the main character of a popular American comic strip, later made into motion pictures. The stories were science fiction, set in the twenty-fifth century.

a comic-strip character who sailed off to Mars or Venus and had incredible adventures. -Handbook for Preclears

the main character of a science-fiction comic strip of the same name. The strip, which originally appeared in 1929, tells the adventures of a twentieth-century American air force officer (Buck Rogers) who awakens after being caught in suspended animation for five centuries. With the help of superscientific equipment and futuristic weapons, Buck travels through space fighting the forces of evil. The comic strip ran until 1967 and the adventures of Buck Rogers were also adapted to radio and appeared on television.

same time which are very close, but not quite the same.

built down2

a reference to “building an organ down,” which is a method of producing a deeper tone by combining the sounds of two pipes that when played individually are not as low. When sounded together the resulting frequency gives an illusion of a deeper sounding tone.

Bulawayo

a city in southwest Zimbabwe in southern Africa. (Zimbabwe was called Rhodesia at the time of the lecture.)

a city in Zimbabwe, a country in southeast Africa.

the second largest city in Zimbabwe, a country in southeast Africa. It is an important commercial, railroad and industrial center.

the second largest city in Zimbabwe, a country in southeast Africa. It is an important commercial, railroad and industrial center. Its name, a Zulu word meaning “the place of the killing,” commemorates the mass execution of some rebellious natives in 1837 and 1838 on the site where the city now stands.

Bulge, Battle of the

the last major offensive by the German army in World War II. In late 1944, the invasion of Belgium by the Allies (including Great Britain, France, the Soviet Union and the United States) was temporarily stopped by a German counterattack in which the German lines formed a “bulge” into the Allied defenses. The Allies drove the German forces back with heavy casualties on both sides. See also war, last in this glossary.

the name of an important battle during World War II (1939–1945). In December 1944, German troops and tanks secretly gathered in western Germany to launch an attack against Allied forces in Belgium. (The Allies consisted primarily of Great Britain, France, the United States and Russia.) Allied intelligence had earlier reported a buildup of German forces in this area. The report was ignored, however, by Allied commanders (under the charge of US General Dwight D. Eisenhower, 1890–1969) as the Germans were thought incapable of staging a major offensive at that point in the war. Intending to push Allied forces back from German home territory and capture Antwerp (the Allies’ most vital supply port), the attack was a complete surprise and broke through the middle of the Allied army’s defensive lines, creating a “bulge” deep into Belgium. Although US troops succeeded in driving the German forces back, the casualties were heavy. Close to 20,000 US soldiers were killed, another 20,000 captured and

reacting to the coach. Bullbaiting is done by the coach in specific Training Routines. The word bullbait is derived from an English and Spanish sport of baiting which meant to set dogs upon a chained bull. See also Training Routines in this glossary.

in coaching certain drills, attempting to find certain actions, words, phrases, mannerisms or subjects that cause the student doing the drill to become distracted from the drill by reacting to the coach. As a bullfighter attempts to attract the bull's attention and control the bull, so does the coach attempt to attract and control the student's attention, however the coach flunks the student whenever he succeeds in distracting the student from the drill and then repeats the action until it no longer has any effect on the student. Taken from a Spanish and English sport of "baiting" which means "to set dogs upon a chained bull," but mainly "to attack or torment especially with persistent insult, criticism or ridicule." Also "to tease."

earlier post title for Flag Representative. See Flag Representative in this glossary.

Burgoyne, Johnny	John Burgoyne (1722 - 1792); British general at the time of the American Revolutionary War. See also American Revolution in this glossary.
Burkowitz, Joe	a made-up name.
burlesque	imitate comically, especially in order to ridicule.
Burma	a country in southeast Asia, to the south of India.
Burma Shave	<p>the brand name of an American shaving cream which was advertised using sequences of roadside billboards. Each sign had a phrase on it, and each set of signs communicated a witty saying, with the last sign saying “Burma Shave.”</p> <p>a brand name for an American shaving cream developed in 1925. Burma Shave was a shaving cream that did not require a brush be used in its application. It was produced by the Burma-Vita Company of Minnesota, USA, and was popularized by advertisements placed on the roadsides of America. The advertisements consisted of a progressing series of six signs. Each sign could be read in three seconds at 35 miles (56.3 km) per hour and each contained a simple line of a humorous rhyming jingle. Eventually, some 35,000 individual Burma Shave signs dotted US roads. However, by the midtwentieth century the jingles had worn out, increased road speed made them hard to read and by 1965 the Burma Shave signs were dropped entirely.</p>
burn the midnight oil	(informal) study or work very late at night. —see MIDNIGHT OIL, BURN THE.
burn the midnight-dawn	see MIDNIGHT-DAWN, BURN THE.
burn the tires	see TIRES, BURN THE.
burned	consumed rapidly, especially squandered.
burned off highlight	a reference to a light area of a photograph that has been exposed to too much light, causing it to appear unusually bright and without detail.
burned out all of the highlights	(photography) exposed a photograph, or portions of it, to too much light, causing it to appear unusually bright and without detail. This is brought about by setting the aperture (the

Do not distribute

opening in a camera through which light passes into the lens) too wide or allowing the shutter (which lets in the light when one takes a photo) to remain open for too long. The photographic film inside the camera is coated with emulsion which reacts to light. If too much light hits the film, then the resulting image is too bright and has very little detail in that area of the film. This is called "burn-out" as the details and shadows of the photograph are "burned out" by too much light. Reversely, a photograph which has not been exposed to enough light will appear shadowy and too dark. See also emulsion in this glossary. I'd say, "Look-a-there. You've burned out all of the highlights. You just burned them right straight through. Why? You might even have at least remedied it in the darkroom, for heaven's sakes."

burning	of the utmost seriousness or importance.
burning (something) up	consuming (something) rapidly, especially squandering (something).
burning deck	see BOY STANDS (STOOD) ON THE BURNING DECK..., THE.
burning pot	reference to a censer a container, usually covered, in which incense is burned, especially during religious services.
burning under the collar	—see COLLAR, BURNING UNDER THE.
burnisher	a tool or machine which polishes (a surface) by friction.
burp gun	(military slang) any of various automatic pistols or submachine guns.
burro back	riding on the back of a burro (a small type of donkey).
Burroughs, Edgar Rice (1875 - 1950)	American writer of adventure stories; known chiefly as creator of Tarzan.
bury beer	a reference to an ancient practice used in the process of making beer. Beer has long been a popular beverage as it does not deteriorate during long periods of storage and is adaptable to all climates. In making beer, one adds yeast to the ingredients to allow the mixture to ferment, that is, to turn into alcohol. As part of this fermentation process the liquid was placed in a container and buried in the ground. Keeping it in the earth (which is cool) ensured a correct and stable temperature for the process. Civilizations since ancient times have put beer into earthen vessels and buried it in the earth, or into wooden barrels and half-buried them in the floors of cellars, where it remains cool.

Glossary for use by Translators – Side Checkers – Editors only.

by touching one factor.

things in particular that each human being finds aberrative and has in common; those computations, foibles or quirks of the human mind which get wrong and which can be righted merely by touching one factor. (Chapter 5, #47)

buy a pup (colloquial) be deceived; be sold something which one believes is better than it really is. Probably originally referring to the sale of a dog to someone who thought it was of a pure breed but found later that it was not.

buzz bomb a type of self-steering aerial bomb launched from a large land-based rocket platform. This type of bomb was used by the Germans in World War II over England and was noted for the loud buzzing sound that came from its engine.

buzzed flew very low over an area.

by and large in general; on the whole.

by golly a mild exclamation expressing surprise, wonder, puzzlement, pleasure or the like; euphemistic alteration of by God.

(slang) a mild exclamation of surprise, wonder, puzzlement, pleasure or the like.

by rote by memory alone, without understanding or thought.

bypass jump the proper person in a chain of command.

(noun) the state or condition of being ignored or not consulted;
(verb) ignore, fail to consult, etc.

(1) (verb) to set aside or ignore (someone or something) in order to reach a desired objective. The basic definition of the word bypass is ``a way or path between two points that avoids or is auxiliary to the main way." To bypass a person or group means to jump the proper terminal in a chain of command; to ignore the junior or juniors normally in charge of an activity and handle it personally. (2) (noun) the action of bypassing.

(1) to set aside or ignore (someone or something) in order to reach a desired objective. The basic definition of the word bypass is ``a way or path between two points that avoids or is auxiliary to the main way." To bypass a person or group means to jump the proper terminal in a chain of command; to ignore the junior or

juniors normally in charge of an activity and handle it personally.
(2) the action of bypassing.

bypass circuit see demon circuit. bypassed charge when one gets a lock, a lower, earlier incident restimulates. That is bypassed charge. It isn't the auditor bypassing it. One handled later charge that restimulated earlier charge. The auditor touches on A, and B goes into restimulation out of the pc's consciousness. This causes an irritated, ARC-breaky, upset feeling. The pc reacts very badly. He has been hit by a mystery. There is no apparent reason (to him) why he feels this way. This is what bypassed charge means. "Earlier charge restimulated and not seen" would be another name for it. See also ARC break; charge; restimulation. C

see demon circuit.

bypassed neglected or ignored, usually intentionally.

bypassed charge assessment an action done by an auditor using an E-Meter, in which the auditor reads a list of questions (issued in an HCO Bulletin) to the preclear so as to locate and handle bypassed charge. Various lists have been issued which cover the types of charge that can be missed in different auditing activities, and the list appropriate to the auditing the preclear has been receiving would be used. In doing this action, the auditor cleans each read (reaction of the needle on the E-Meter) on a question before going on to the next question (as different from an ARC break assessment, where reads are not handled, but only indicated to the preclear). See also ARC break assessment, bypassed charge and clean in this glossary. There is a thing called an ARC break assessment and there's a bypassed charge assessment and hardly one of you monkeys have ever been able to tell the two apart or do either one of them.

byroad n. a side or secondary road; a minor road that does not form a main road or highway; an out-of-the-way and less traveled road. By here means side or secondary, and road means a strip of ground appropriated for travel. Byroad can be used figuratively to mean a course of action, investigation, etc., which is minor or less important when compared to others.

by-your-leave with your permission.

C abbreviation for Communication, one of the three things (along with Affinity and Reality) that make up the ARC triangle and together equate to understanding. See also ARC triangle and communication in this glossary.

Canadian Mounted Policeman	<p>a member of a constabulary (a police force organized like an army) organized in 1873 as the Northwest Mounted Police to bring law and order to the Canadian Far West and especially to prevent Indian disorders. In 1904 the name was changed to the Royal Northwest Mounted Police and in 1920 to its present title, the Royal Canadian Mounted Police.</p> <p>a member of the Royal Canadian Mounted Police, a police force established in Canada in 1873. Having also been known as the Northwest Mounted Police, the Royal Northwest Mounted Police and, popularly, the Mounties, their original purpose was to bring law and order to the Canadian west and to prevent the incursions of some Americans who traded whiskey for buffalo hide, causing trouble with the Canadian Indians and inciting them to violence. The initial complement of Mounties was 300 men who were the only authority in a wilderness area of more than 300,000 square miles. Their duties expanded to include carrying mail to distant settlements, surveying, reporting on the condition of roads, bridges and crops, fighting forest fires and acting as judges between quarreling settlers. They also served to help travelers and care for the sick. The daring exploits of the original Mounties in pursuing and capturing offenders gained the force quite a reputation and they were the subject of many stories and movies. The familiar phrase “The Mounties always get their man” originated in the 1930s via the cinema and is a tribute to the fact that few criminals escaped the Mounties once they were on the trail.</p>

a contract with the patient that whatever the auditor says will not become literally interpreted by the patient or used by him in any way. It prevents accidental positive suggestion. As a matter of fact, do you remember the old canceller way back when? –Levels of Skill (6 July 1957)

a contract with the preclear that whatever the auditor says will not become literally interpreted by the preclear or used by him in any way. It prevents accidental positive suggestion. A canceller is worded more or less as follows "In the future, when I utter the word cancelled, everything which I have said to you while you are in a therapy session will be cancelled and will have no force with you. Any suggestion I have made to you will be without force when I say the word cancelled" .See also auditor and preclear in this glossary.

a contract with the preclear that whatever the auditor says during a Dianetics session will not become literally interpreted by the preclear or used by him in any way. It prevents accidental positive suggestion. A canceller is worded more or less as follows "In the future, when I utter the word cancelled, everything which I have said to you while you are in a therapy session will be cancelled and will have no force with you. Any suggestion I have made to you will be without force when I say the word cancelled."

Cancer Society

a reference to the American Cancer Society, a national volunteer health organization that supports education and research in cancer prevention, diagnosis, detection and treatment. Founded in New York City, New York, USA, in 1913 as the American Society for the Control of Cancer, it was renamed the American Cancer Society in the mid-1940s and grew to become one of the largest voluntary health agencies in the United States.

candle isn't worth the

the return or benefit from something—such as a game, activity or endeavor—is not worth the amount of effort, labor or time that one has to put into it, or literally, that the profit is not worth the small amount of money needed to supply the (candle) light necessary to see by while doing it. This phrase is of French origin and is hundreds of years old. It is an allusion to gambling by candlelight, which involved the expense of buying the candles for the needed illumination. If one's winnings were low, the profit wouldn't even equal the money spent for the candles by which the game was played. This expression came to be used to refer to any object, aim, endeavor, action, etc., that is not worth the effort or investment necessary to its attainment.

Stormfield's Visit to Heaven, written by American author and humorist Mark Twain (1835–1910). It tells of a ship's captain who, after being dead for thirty years, visits heaven. The captain gets a comprehensive briefing on the rules and customs of heaven by an older inhabitant, Sandy McWilliams. The story goes on to tell of the captain's adventures and experiences there, such as helping the choir, learning what his wings are for and welcoming new arrivals (which number sixty thousand a day). The story was written in 1868 but went unpublished for forty years.

captains	military officers in the US armed forces who are in charge of specific groups or divisions.
captain's chairs	chairs which have a rounded back formed by a heavy rail resting upon vertical spindles and coming forward to form the arms.
capturing a garrison and carrying off everything.	His reply was “Oh, I just took the shortcut and got there first with the most men.” From this answer get there first with the most men became one of the most frequently quoted statements of the war.
caravan	of a group of travelers, as merchants or pilgrims, journeying together for safety in passing through deserts, hostile territory, etc.

made of carbon, carbon and graphite, or carbon and copper.

Usually it's a grain of dust or something has gotten into the tone
arm swing, but we've put a new tone arm carbon-brush
arrangement in there, and they don't do too much of this now. –
Meter Training (12 July 62)

n. having or containing a carbon brush, a small, block-shaped
piece of material made of metal or carbon that serves to relay an
electrical current between stationary and moving parts of a
mechanical device, machine, etc. The carbon brush is attached to
one part of the machinery and brushes or slides against the second
part continually as it moves. Since carbon is a conductor, it allows
electricity to flow from one part, through the carbon brush, into
the other part.

Carborundum	(trademark) a hard compound of carbon and silicon used for polishing and grinding things. Used figuratively in this lecture.
card	a calling card (a small card with one's name, and sometimes one's address, on it, used in making visits).
cardinal	of prime importance; chief; principal.
cards and spades, give	1. to give a generous advantage to an opponent. This term alludes to a card game called Cassino, where the object of the game is to take as many cards as possible, specifically those cards which have scoring value. The score is counted in numerous ways, such as points given for the greatest number of spades held by a player or for other specific cards held. Thus, a person who has the most cards (or spades) has an advantage over the other players. 2. to beat or outdo someone or something despite their having an advantage.
Cards, football	a reference to the Cardinals, the oldest professional American football team, originally established in Chicago in 1899. The name was adopted due to the color of the team's jerseys, a faded maroon which the owner of the team called "cardinal." Later, the cardinal (an American bird with bright red feathers) was adopted as the symbol for the team. Having been relocated several times, the team has had many names, including the Chicago Cardinals, the St. Louis Cardinals as well as the Phoenix Cardinals.

Carnegie Hall a large historic concert hall located in New York City, New York, USA. Opened in 1891, the hall was originally named the Music Hall, this changed however in 1898 to Carnegie Hall in honor of Andrew Carnegie (1835–1919) Scottish-born American industrialist and philanthropist who funded the majority of its construction. In addition to its main auditorium, that seats nearly 3,000 people, the building contains several smaller halls, numerous studios, offices, apartments and stores. The famous Russian composer, Tchaikovsky (1840–1893), served as the guest conductor during the hall's opening week and since that point many important and distinguished musicians have performed there.

Carnegie, Dale (1888 - 1955) American lecturer and author; wrote a book called *How to Win Friends and Influence People* (1936). His ideas were based originally on public speaking—later he extended it to include salesmanship and psychology.

a seaport in West Morocco, Africa where Arabic is the official language.

a port city on the north African coast of Morocco, and site of an historic British, French and US conference to decide upon the future course of World War II (1939–1945). At this conference in January of 1943, United States President Franklin D. Roosevelt and English Prime Minister Winston Churchill discussed the strategy for the North Africa campaign and, apparently in an attempt to satisfy allied Soviet leader Joseph Stalin (1879–1953) that no compromise would be accepted in achieving peace, President Roosevelt publicly announced that the war would end only with an unconditional surrender by Germany, Italy and Japan. Uncle Joe Stalin and the rest of the boys wished it off on him down there at Casablanca, and he went along with it and so they decided that Germany had to unconditionally surrender and Japan had to unconditionally surrender and that was going to be the end of war.

a port city on the north African coast of Morocco, and site of an historic British, French and US conference to decide upon the future course of World War II (1939-1945). Case of Sergeant Grischa, The	a novel written in 1927 by German novelist, Arnold Zweig (1887 - 1968). It is about a Russian prisoner of war, Sergeant Grischa Paprotkin, who escapes from a prison in Germany and takes the identity of a dead Russian soldier, but later is recaptured by the Germans and sentenced to death as a spy. Although his identity is cleared up, he is still executed as an example.
	a novel written in 1927 by German author Arnold Zweig (1887–1968). The novel, based on Zweig's own experiences in the German army during World War I (1914–1918), tells of a Russian prisoner of war, Sergeant Grischa Paprotkin. Grischa escapes from a prison in Germany and takes on the identity of a dead Russian soldier. He is later recaptured by the Germans and claims to be a Russian deserter, not knowing that Russian deserters are required to turn themselves in to the Germans after three days or be considered spies. Grischa is thus sentenced to death as a spy. Although his identity as an escaped prisoner of war is cleared up, his reprieve never reaches the authorities and he is executed.

cases, get (come or go) down to to come to the point; attend to or deal with the essential facts or the actual matter at hand; come down to specifics. The expression dates back to about 1900 and alludes to a card game in which cards are drawn from a box containing the dealer's pack, and players place bets on a special board or layout. When only one card is left in the box, it is known as the case card and thus down to cases means down to the last card in play.

cases, get down to (informal) come to the point; attend to the facts or the matter at hand.

cash-bills the statistic of the Executive Council, which is responsible for the solvency of the org. This statistic is the ratio of the amount of cash on hand (cash that exists in actuality and which can be expended) to the amount of bills owing. If the cash-bills statistic shows there are more bills owing than there is cash on hand, the org is considered to be insolvent. If it shows there is more cash on hand than bills owing, the org is considered to be solvent. See also Executive Council and statistic in this glossary.

cat will be out of the bag, the a secret will have been found out.

(slang) a secret will have been found out. The expression, cat's out of the bag goes back to the 8th century when it was illegal to sell and eat pork. Pork lovers had to purchase their pigs in bags under the cover of darkness. Frequently, dishonest farmers would place a cat in the bag instead of a pig. So when the unsuspecting pork lover returned home, he was incredibly surprised when he literally let the cat out of the bag.

cat, dragged in by the a humorous coined variation of the phrase look like something the cat dragged in, meaning someone or something looks disheveled, unkempt, bedraggled, etc. The phrase look like something the cat dragged in is often used as an exclamation to express one's surprise when somebody with the above-mentioned qualities has just entered a room and alludes to the things cats drag into houses, such as dead mice and birds.

cat, line of (informal) a variation of breed of cat type; sort; variety. Example The new airplane is a completely different breed of cat from any that has been designed before.

a coined variation of breed of cat, an informal phrase meaning a type, sort, kind, etc. Line here means the descendants of a common ancestor or of a certain breed.

- catch (someone or something) out a chiefly British term meaning to detect or discover (someone or something) in error or in wrongdoing. This phrase comes from the game of cricket, baseball, etc., in which a player, known as a batsman, attempts to hit a ball thrown toward him. If he hits the ball, he can be put out of play by a player on the opposite side catching the ball before it touches the ground.
- catch (someone) out To detect (another) in the act or process of wrongdoing.
- catch or discover (someone) in deceit or an error.
- (colloquial) cause notice to be taken of (someone) due to error, inconsistency or unacceptable action.
- catch him out (colloquial) take notice of a person's error, inconsistency or unacceptable action.
- catch one's death (of cold) get such a bad cold that one might die of it. Now, Roger, you know you're gonna catch a death of cold if you keep going out like that without your rubbers and without your raincoat.
- get such a bad cold that one might die of it. You're gonna catch your death of cold going out like that.
- catch phrases phrases intended to draw attention to something and to be easily remembered.
- phrases that catch or are meant to catch the popular attention.
- catch the ball see BALL, CATCH THE.
- catch them out (British) find out or discover (a person) in a mistake, etc.
- catch-a-lots a made-up name for a team in a game.
- catcher's mitt (baseball) a padded glove with a thumb but usually without separate fingers used by the catcher (the player who is stationed behind the batter and catches pitched balls not hit away by the player batting).
- catching (someone) out (colloquial) taking notice of (someone's) error, inconsistency or unacceptable action.
- (colloquial) taking notice of (someone's) error, inconsistency or unacceptable action. So you see once more we're catching man out.

catfit	(slang) a violent outburst of rage or other strong feeling. n. any emotional outburst stemming from anger, extreme disappointment, etc.
catfootedly	noiselessly, stealthily. Used figuratively in this lecture.
Catherine	Catherine II (1729 - 1796), empress of Russia (1762 - 1796) who was also known as Catherine the Great.
Catherine I	a reference to Catherine II (1729–1796), empress of Russia from 1762 to 1796, known as “Catherine the Great.” During her reign, Catherine built schools and hospitals, promoted education and extended Russian territory; however, she did little to grant basic civil rights to the Russian people, carried out few social reforms and left the vast majority impoverished. In 1773, a peasant uprising swept across Russia, almost advancing to Moscow, and became the greatest Russian rebellion up to that time. Catherine crushed this revolt with government troops and thereafter instituted more systematized control of the peasants, nearly eradicating what freedom they had, and divided the administration of the various areas of Russia between her favorites and ministers.
Catherine, Saint	Saint Catherine of Alexandria (died ca. 310), a virgin martyr of Alexandria. According to legend, she rebuked the emperor for persecuting the Christians and, though only eighteen, converted a number of the learned philosophers he assembled to dispute with her. When the spiked wheel on which she was then sentenced to die broke in pieces, she was beheaded. The legend contends that her body was carried away by angels. See also martyr in this glossary.
cathode-ray machine	reference to an oscilloscope a machine that visually displays an electrical wave on the fluorescent screen of a cathode-ray tube (a vacuum tube, such as a television picture tube, in which beams of electrons are directed against a fluorescent screen where they

a succession of incidents, occurring at various intervals along the time track, that are related to one another by some similarity of either subject, general location, people or perception. Such a succession of similar incidents may span a brief period or a very long period of time.

a series of incidents of similar nature or similar subject matter. And if you want to know what the basic on the chain was, this person carried around the idea that "on posts, she failed," and that was—her relationship to a post was something on which one failed.

a series of incidents of similar nature or similar subject matter. You find yourself fifth on the chain. -Handling ARC Breaks (28 May 63)

a series of similar engrams, or of similar locks. -HCOB 15 May 1963.

a series of incidents of similar types. Supposing you had to run it as an engram then run off all the chain of all the implants there were on the track.

chain fission

fission (a splitting apart or dividing) of larger atoms such as atoms of uranium into smaller atoms such as atoms of iodine and bromine. This process can be designed so that each fission will cause another fission, thereby setting off a chain reaction. The atomic bomb is an example of a chain fission.

(fission means a splitting apart, dividing) larger atoms such as atoms of uranium can fission (split) into smaller atoms such as atoms of iodine and bromine. This process can be designed so that each fission will cause another fission, thereby setting off a chain reaction. The atomic bomb is an example of a chain fission. Used figuratively.

chain locker

the compartment below the deck where the anchor chain is kept when the anchor is raised.

chain store

a number of retail stores under common ownership or management, or any of the individual stores of such a chain.

chair

the office or position of a professor.

Chaka (Shaka or Tshaka) (1787–1828) Zulu warrior chief who created the Zulu empire. Chaka was a military genius known for his brutality.

Do not distribute

Chaka ruled the Zulu with an iron hand from the very beginning, ordering death as a punishment for the slightest opposition. Reorganizing the Zulu army, he transformed the small Zulu tribe of about 1,500, into a huge nation with an army numbering some 40,000. In the years from 1816 to 1827, he led the Zulu armies in many victories as he continued his strategy of expansion with war. In 1827, following his mother's death, Chaka became more violent than ever, killing 7,000 Zulus including all pregnant women, who were slain with their husbands. No crops were planted, and milk, a staple in the Zulu diet, was forbidden. Obsessed by his mother's death, he pushed his armies to extreme limits until finally, in 1828, a small group of his close associates, including two of his half-brothers, murdered him and ended his reign of terror.

chakra (yoga) any of the points of spiritual power located along the body. The points are personified by gods and, according to yoga, can be released through the proper exercises.

(yoga) any of the seven centers of spiritual energy in the human body.

(yoga) points along the spine supposed to contain certain powers, personified by gods, and able to be released through the proper exercises. Also known as cakra.

(yoga) any of the seven centers of spiritual energy in the human body. As a matter of fact, the doctrine of the chakra is an interesting one because that talks about Theta Clearing.

(yoga) any of the seven centers of spiritual energy in the human body. Let's take the subject of the chakra—very interesting.

Chaldean of Chaldea, a region in the southern part of Babylonia, the ancient empire in southwest Asia which flourished from 2100 - 538 b.c. The Chaldeans were famous for studying the stars to foretell the future. Many present forms of fortunetelling were practiced by the priests and scholars of ancient Chaldea.

of or belonging to Chaldea, an ancient region in south Babylonia. The Chaldean people formed the dominant element in Babylonia. See also Babylon in this glossary.

chalice a vessel like a large goblet for holding wine; especially one from which consecrated wine is drunk at the Eucharist (the Christian sacrament of Holy Communion, in which bread and wine are consecrated and consumed).

into a position where the opponent cannot save or protect it from being taken.

a game of skill played on a checkered board (divided into 64 squares), by two players, each possessing an initial force of 16 pieces, including a piece called a “king.” There are individual rules of movement for each different kind of piece. Players make alternate moves, each seeking to attack the other's king in such a manner that no escape or defense is possible, thus ending the game.

- Chevalier, Maurice (1888 - 1972) French singer and film star. He was known throughout the world for his accent, his straw hat and his jutting lower lip. He became famous in Paris during the 1920s, went to Hollywood in the 1930s, remained in Europe during the 1940s, then re-emerged as an international star.
- (1888–1972) French actor and singer, who became known for his characteristic straw hat and his charming, light-hearted manner. Chevalier began in show business as an acrobat at a young age and later switched to singing in Paris caf s and music halls. In 1908, he appeared in the first French silent films, and then returned to the stage, where he gained international fame wearing his trademark straw hat and bow tie. His American motionpicture debut came in 1929 in the musical *Innocents of Paris*. Between 1929 and 1935, he starred in eleven other American film musicals. His greatest international success was the film musical *Gigi* (1958), which was released when he was seventy.
- (1888–1972) French singer and film star. He was known throughout the world for his accent, his straw hat and his charming, lighthearted manner. These factors led to his popularity and wide imitation of him by others.

chew discuss at length.

meditate on; consider deliberately.

chew (it) around (or, over) a variation of the phrase *chew the cud*, meaning to think deeply and continuously about something; to reflect or mull over in one’s mind. The phrase *chew the cud* was first seen in use in the late fourteenth century and referred to the practice of cows who, after chewing and swallowing food, would bring it back up into their mouths again and chew it up more (*cud* means the mouthful of food that is chewed in this manner). Its figurative meaning came into use around the end of the sixteenth century.

a religion that views the Bible as the ultimate authority, believes God is wholly good and all-powerful, and which stresses spiritual healing as part of its teaching and practice. Founded by American religious leader and author Mary Baker Eddy (1821–1910). Christian Science denies the reality of the material world, arguing that sin and disease are illusions to be overcome by the mind, and thus Christian Scientists often rely on spiritual healing rather than medical help in fighting sickness.

an exceptionally precise clock, watch or other timepiece. And I have had the unfortunate experience of having had to navigate in many oceans off the cuff, on my own, inadequate equipment, stopped chronometers and all of this sort of thing, and missing tables and so forth. ⇐Study and Intention (18 Aug. 66)

n. a timepiece that meets certain strict standards of accuracy. The chronometer (chrono- means time and -meter means measure) was created to fulfill the need of navigators for a very accurate timepiece by which to determine their position while at sea. The first such chronometer was developed by English clockmaker John Harrison (1693–1776) and perfected in the late 1700s, losing only 15 seconds in 156 days at sea (about 2 seconds a month). As the British government was offering a reward to encourage development of such a timepiece, Harrison received 20,000 pounds for his work. Later in the twentieth century, even more accurate means of determining a ship's position were developed and the chronometer was no longer essential in determining a ship's position at sea.

Chrysler Building

the second tallest building in New York City at the time of this lecture. It was completed in 1929. It is 1,046 feet high and has 77 stories and terminates in a needle-like spire. It houses the New York offices of the Chrysler Corporation and other business organizations.

cinch, lead-pipe	(slang) a doubly sure or a doubly easy thing. The phrase derives from a trick used in tightening down the cinch (saddle strap) on an uncooperative horse, employing a so-called lead pipe to turn the strap like a tourniquet. After the strap was cinched tight, the pipe was then tucked between the strap and the horse's belly, "double-cinching" the horse.
cinchona bark	the bitter bark of a tropical South American tree from which quinine is obtained. See also quinine in this glossary.
cinder	a partially or mostly burned piece of coal, wood, etc.
cine	short for cinema a film; motion picture. short for cinema movie, film; motion-picture.
Cinerama	(trademark) a motion-picture medium that uses three projectors and a large, three-paneled, curved screen to produce the illusion of three dimensions, and a system whereby sound is reproduced from the direction of its original source. in motion pictures, a process which uses three synchronized movie projectors, each of which project one-third of the picture on a wide, curving screen.
CineScope	a reference to CinemaScope, a trademark for a system of filming and projecting motion pictures that employed special lenses and a wide screen. Introduced in the early 1950s, CinemaScope consisted of a camera fitted with a special lens that took a wide picture and condensed it ("squeezed" it) so that it fit onto a standard size of motion picture film. When the final film was presented to an audience, a special lens on the projector expanded the picture back to the correct proportions so it could be viewed on a wide, slightly curved screen. a shortening of CinemaScope, a film-making process in which a motion picture is projected on a screen, with the width of the image two and a half times its height.

characteristics.

- Class 0** an auditor who has completed Level 0 of the Academy and is trained to audit others to Communications Release.
- an auditor who has completed Academy Level 0, the first of the auditor classification levels. This course trains a student to audit processes which address communication and makes an auditor who can process another to gain the ability to communicate freely to anyone on any subject.
- Class Eight) Class VIII** belonging to the Class VIII Course, which teaches exact handling of all cases up to 100 percent result. The graduate of this course is a Hubbard Specialist of Standard Tech.
- Class IIb** at the time of this lecture, a student who had completed the study of all bulletins and tapes pertinent to the skills required of a Class II auditor, and done all the demonstrations called for on the checksheet, but had not yet passed his final Class II examination and was thus not certified as a Class II auditor. See also Class II in the glossary. Some people with Class IIb who are so far from Clear they would have to have a moonshot to comprehend it-I'm talking about cases now, see, just casewise, bleuuhh! -Training Duplication (24 Jan. 62)
- Class IV orgs** Churches of Scientology which are qualified to deliver a certain level of services (up to Level IV training and Grade 4 Release) to its parishioners. See also Classification and Gradation Chart in this glossary.
- Class Sixes) Class VI**s Hubbard Senior Scientologists, graduates of the Saint Hill Special Briefing Course. This course consists of the full practical application of Scientology grades, repair, setups, assists and special cases technology up to Class VI.
- Class V Organizations** Churches of Scientology that deliver all training and auditing services up to the point where a person is ready to being his OT levels or start advanced training and auditing. The highest level of auditor training delivered in these churches are referred to as Class V services, thus these churches are referred to by Scientologists as Class V Organizations.
- Class VI Course** Saint Hill Special Briefing Course. The auditor training course on which one studies the chronological track of the discoveries and development of Dianetics and Scientology, from 1948 up to present time. On this course one can see how the subject progressed and so is able to gain an full understanding of the

technology, from the lowest to the highest levels, and become a truly top-grade, expert auditor. This course is delivered by Saint Hills and other advanced Scientology organizations around the world.

Class VIII

Hubbard Specialist of Standard Tech Auditor, a graduate of the Class VIII Course, which teaches exact handling of all cases up to 100 percent result.

Hubbard Standard Technical Specialist, a graduate of the Class VIII Course, which teaches exact handling of all cases up to 100 percent result.

Hubbard Standard Technical Specialist, a graduate of the Class VIII Course, which teaches exact handling of all cases up to 100 percent result. Right now, amazingly enough, you find me restoring Class VIII technology.

an auditor who has completed the Class VIII Course, which teaches exact handling of all cases up to 100 percent result. The graduate of this course is a Hubbard Specialist of Standard Tech.

an auditor who has completed the Class VIII Course, the eighth of the auditor classification levels. The Class VIII Course is unique to all auditor training courses in that it brings the auditor to a standard of perfect understanding and application of the basics of auditing. Leading to Class VIII, in each training level the auditor learns different styles of auditing, processes, techniques and theory. On the Class VIII Course, he develops an exact, unvarying standard of application of every fundamental of auditing and the mind, in order to achieve stellar results on any preclear.

Hubbard Specialist of Standard Tech Auditor, a graduate of the Class VIII Course, which teaches exact handling of all cases up to 100 percent result. @``Your Class VIII is appointed HCO ES Canada."

Class XII

an auditor trained to the level of Class XII and able to audit flublessly, L12—the Flag OT Exec Rundown delivered at Flag only.

class-conscious

aware of belonging to a class in the social order, with definite economic interests and a sense of class solidarity (complete unity, as of opinion, purpose, interest, feeling, etc.).

Classification and Gradation Chart	<p>short for Classification, Gradation and Awareness Chart the route to Clear and the states beyond, also called The Bridge to Total Freedom, or the Bridge. Classification means that there are certain actions required to be done or conditions to be attained before an individual is classified for a particular training level and allowed to progress up. Gradation means a gradual grade up, just as there are grades to a road or there are grades to steps. Awareness refers to one's own awareness, which improves as one progresses up. On the right side of this chart there are various steps called the States of Release. The left-hand side of the chart describes the very important steps of training on which one gains the knowledge and abilities necessary to deliver the Grades of Release to another. It is a guide for the individual from the point where he first becomes dimly aware of a Scientologist or Scientology and shows him how and where he should move up in order to make it. Scientology contains the entire map for getting the individual through all the various points on this gradation scale and for getting him across the Bridge to higher states of existence.</p>
clause	<p>a group of words containing a subject and verb, usually forming part of a compound or complex sentence.</p>

materials, adding mass to the significance of the materials and working things out. The student is given a word or situation to demonstrate. He does this in clay, labeling each part. The clay SHOWS the thing. See also demonstration, mass and significance in this glossary.

a model made out of clay by a student to demonstrate an action, definition, object or principle. Also called a "clay demo."

a model made out of clay by a student to demonstrate an action, definition, object or principle. Also called a "clay demo."

clay pigeon

(slang, informal) a person who, like a clay pigeon in target practice, is immobilized or is in a sensitive position and is therefore easily criticized or otherwise victimized.

(slang) someone who is in a position where he can be easily victimized or taken advantage of by others. The term comes from the sport of trapshooting, in which a device called a trap is used to hurl disks of baked clay or other material (called clay pigeons) into the air as targets for shooting.

n. a saucer-like disk of baked clay or other material that is hurled into the air by a machine called a "trap" and which serves as a moving target (somewhat like a bird in flight) for shooting practice or in the game or sport of trapshooting. Originally the targets shot at were live pigeons (or other birds) but were replaced with clay disks, hence their name. This term can also be used to refer to a person who, like a clay pigeon, has gotten himself into a vulnerable or disadvantageous position and is therefore open to being a "target," as for some criticism, action, discipline, etc.

Clay Table Clearing

a type of Clay Table processing in which the auditor (1) has the preclear find a subject or activity where the preclear has desired to improve himself; (2) establishes something about it the preclear didn't understand; (3) has the preclear reduce that idea to a single term; and (4) has the preclear represent that word in clay. The entire effort by the auditor is to help the pc regain confidence in being able to achieve things by removing the misunderstandings which prevented that achievement.

being able to achieve things by removing the misunderstandings which prevented that achievement. A process whereby you're trying to get them, you see, to define whole track@type words, like Clay Table Clearing or definitions of earlier subjects or something like this_._._. –The Failed Case (27 Oct. 64)

Clay Table Processing a particular process used in certain types of auditing.

clay, do (something) in make a model out of clay to clarify studies, definitions or confusions. Clay demonstrations (or “demos”) can be used to get mass and reality on what one is studying or trying to develop or to demonstrate out a procedure or a set of actions one will be doing.

make a model out of clay to clarify studies, definitions or confusions. Clay demonstrations (or “demos”) can be used to get mass and reality on what one is studying or trying to develop or to demonstrate out a procedure or a set of actions one will be doing.
@If you understand all the above (it would be a good thing to do it in clay), you will have mastered the elements of coordination.

clean as a wolf’s tooth see WOLF’S TOOTH, CLEAN AS (SLICKER THAN) A.

clean hands To have clean hands is to be quite clear of some stated evil. Hence to keep one’s hands clean, not to be involved in wrongdoing.

freedom from guilt or dishonesty; innocent.

clean slate a record unmarred by discreditable acts or failures.

n. a new start or fresh chance, sometimes after offenses or debts of the past have been handled or forgiven; a record of creditable conduct without errors or bad deeds. This nineteenth-century idiom comes from the use of slates and chalk in schoolrooms and taverns. (Slate is a type of dark-colored rock that splits easily into flat plates, used to write on with chalk.) Children used to do class assignments on slates and by wiping their slate clean they were rid of any evidence of a mistake. In taverns the slate was used to keep track of debts owed by customers. Once the debt was paid, it would be wiped off the slate and the customer had a “clean slate.”

clean sweep an entire, complete or thorough victory or success. if you make a clean sweep of something, such as a series of matches or tournaments, you win them all [ex - ...the first club to make a clean sweep of all three trophies.]

a complete or thorough victory or success.

an entire, complete or thorough victory or success.

(slang) complete change.

(slang) complete change. It's the most clean sweep that you ever had much to do with.

clean the decks (nautical) get everything finished off, completed. But it does follow that an individual, if he's on a sort of a routine job where he's trying to get something done that is somehow sort of a task—it should follow that an individual should get enough done in the allocated length of time to clean the decks and permit himself free time.

(nautical) get everything finished off, completed.

cleaned off shut off. Variation of cut off.

cleaning a clean attempting to clean up or deal with something that has already been cleaned up or dealt with or that wasn't troublesome to the person in the first place.

attempting to clean up or deal with something that has already been cleaned up or dealt with or that wasn't troublesome to the person in the first place.

Clear a being who no longer has his own reactive mind. He therefore suffers none of the ill effects that the reactive mind can cause. The Clear has no engrams which, when restimulated, throw out the correctness of his computations by entering hidden and false data. Becoming Clear strengthens a person's native individuality and creativity. It is a highly desirable state that is attainable by virtually anyone through auditing. And you wait until you've gone through VII, and you've gotten yourself well up the line on Clear, and you can handle Power Processes, which give you total dominion over any type of case there is.

the name of a state achieved through auditing or an individual who has achieved this state. A Clear is a being who no longer has his own reactive mind. A Clear is an unaberrated person and is rational in that he forms the best possible solutions he can on the data he has and from his viewpoint. See also reactive mind and aberration in this glossary. "... we're charging—we're charging only fifty cents for ten thousand hours of processing plus—plus a promise to Clear and OT."

distributing and selling their soft drink in every country in the world.

Coca-Cola girl

any one of the models shown on calendars, posters, etc. advertising Coca-Cola in the late nineteenth and early twentieth centuries. See also Coke in this glossary.

a reference to any of various women portrayed on posters, calendars, as well as other items advertising the soft-drink Coca-Cola, beginning in the late 1800s and continuing through the 1900s.

any one of the models shown on calendars, posters, etc., advertising Coca-Cola in the late nineteenth and early twentieth centuries. See also Coke in this glossary.

cocked 'at, knock into a (slang) damage or spoil completely; ruin. ('at is a dialect form of hat.) A cocked hat was a type of three-cornered hat worn in the 18th century. It was made by folding the edges of the round hat worn in the 17th century into corners. The phrase first meant to change something completely and later to defeat someone or something completely, and thus to damage, spoil or ruin.

(slang) damage or spoil completely; ruin. (at is a dialect form of hat.) A cocked hat was a type of three-cornered hat worn in the 18th century. It was made by folding the edges of the round hat worn in the 17th century into corners. The phrase first meant to change something completely and later to defeat someone or something completely, and thus to damage, spoil or ruin. Do you intend to improve this person's itsaing ability, or do you intend to knock it into a cocked 'at? -The Itsa Line (cont.) (21 Aug. 63)

cocked hat, knock (something) into a (slang) damage or spoil (something) completely; ruin or beat or defeat (something) completely. A cocked hat was a type of three-cornered hat worn in the 18th century. It was made by folding the edges of the round hat worn in the 17th century into corners. The phrase first meant to change something completely and later to defeat someone or something completely, and thus to damage, spoil or ruin.

cocked hat, knock into a figuratively, to knock out of shape, to change beyond recognition; to render useless; to defeat completely. This can also be used to mean to be of much higher quality or value than. A cocked hat was a hat worn especially in the eighteenth century, having a stiff, wide brim turned up on two or three sides giving a three-cornered appearance. The phrase knock into a cocked hat is thought to have come from a bowling game where three out of the

colonies	the 13 British colonies in North America that won their independence in the Revolutionary War (1775 - 1783) and became the United States.
color	general nature or character.
color bar, run the	a variation of draw the color line observe a color line, a social or political restriction or distinction based on differences of skin pigmentation as between white and black people.
color card	n. a piece of card exhibiting one or more strips of various shades representing the available colors of a paint, floor covering, cloth or similar item.
color darkroom	n. a room that is almost or totally dark and specially equipped to develop negatives and final prints from color photographic film. A darkroom contains various chemicals, sinks, timers and other equipment to process film and create a final picture. Processing color film is a more involved and timeconsuming procedure than handling black and white film, it requires additional chemicals, lights and equipment. Thus, a color darkroom would be more complex than one set up to process only black and white film.
color flash	a system of different colors for each division of an org. It is derived from the military use of the word as a colored patch of cloth on a uniform, etc., such as distinguishing emblems of units, etc.
Colorado River	the chief river of the arid southwestern United States, which flows from the Rocky Mountains of northern Colorado to the Gulf of Mexico. The course of the river cuts through deep canyons, including the Grand Canyon.
colored couplers	chemicals which react during the developing of color film to give certain color dyes. They are called “couplers” because they

Do not distribute

couple with a chemical in the developer to produce the color you see in the final image. Different couplers are used to produce the different colors-red, green, blue, yellow, etc. Now right in the middle of that sentence you've got a word like ``colored couplers."

n. a reference to tiny particles in color film which, during development of a picture, form colored dyes that make up the image of the subject photographed. Color film is made up of three separate layers, each of which records a different color of light when exposed, i.e., one records red, another blue, and the last green (combinations of which can produce any other color). When the picture is being developed, the colored couplers in each layer combine with developing chemicals to produce a colored dye in exact proportion to the exposed areas in each layer of film. Together these dyes reproduce all the colors one sees in the final photograph.

coloron n. a made-up word for a unit of color.

Colosseum the great amphitheater (oval building with an open space surrounded by rising rows of seats) of ancient Rome built ca a.d. 75 - 80, seating 50,000, where games and contests were staged for the entertainment of the people.

colossus a nation vastly larger and more powerful than those near it.

Colossus of Rhodes a giant statue of the Greek sun god Helios, known by the Romans as the god Apollo. Considered one of the Seven Wonders of the World the statue stood at the entrance to the harbor of Rhodes (a Greek island) for approximately 55 years. It was built in 280 BC to commemorate the island's survival of a yearlong siege. Made of bronze and stone with reinforcements of iron inside, the Colossus measured around 37 meters (120 feet) in height. It is sometimes said to have straddled the harbor so that ships sailing in and out went under its legs, and is depicted in one account as shielding its eyes from the sun with one hand. During an earthquake in 225 BC the statue fell and was left in place until AD 653 when the Arabs raided Rhodes and had it broken up and the bronze sold for scrap.

Colter John Colter (ca. 1775–1813), American explorer and fur trader, and the first white man to have seen and traveled (in 1807) through the area which became Yellowstone National Park, the first national park in the United States, located in the state of Wyoming and well known for its geysers, buffalo and bear. A year later Colter explored an area of Montana later known as

Do not distribute

Three Forks, and one of the tales from this exploration relates how Colter narrowly escaped from certain death. The area was guarded by the Blackfeet Indians who captured Colter, took all his clothes and told him to run for his life. Colter ran, and after a harrowing chase through the wilderness he managed to escape. The story of this dramatic run has become famous.

Columbia Pictures a film company established in Hollywood, California, USA, in 1920 as CBC Sales Film Corporation to produce low-budget westerns and comedies, etc. (CBC are the initials of its three founders, Harry Cohn, Joe Brandt and Harry's brother Jack Cohn.) In 1924 the company changed its name to Columbia Pictures and began producing successful major films. Columbia also took advantage of the introduction of television, and through a subsidiary called Screen Gems produced and sold programs of old movies to television stations, soon becoming one of the top film companies in Hollywood.

Columbia River a waterway over 1,200 miles long, that starts in southwestern Canada, flows through Washington and Oregon in the northwestern United States and then empties into the Pacific Ocean. The river has various falls on and around it, including Multnomah Falls (located in northwestern Oregon), which starts in a snow-fed stream that flows in a series of rapids and then plunges over a cliff, falling 850 feet into a pool which drains into the Columbia River.

combat or battle for a long time.

n. same as combat fatigue.

Combat Information Center an agency found on most major combat vessels which coordinates the activities of naval departments and divisions during preparations for battle and in actual battle. The Combat Information Center (abbreviated CIC) is the sensory center of the ship, the place in which tactical information is gathered and evaluated, and action coordinated. Specifically, CIC is charged with the responsibility of gathering all possible information concerning friendly or enemy ships or aircraft within range of the equipment, evaluating this information, delivering parts of the evaluated information to appropriate stations aboard ship and controlling tactical units.

an area in a ship or aircraft manned and equipped for gathering tactical information regarding enemy positions and activities. The Combat Information Center (CIC) displays, evaluates and distributes information and, as on a combat vessel, it coordinates the actions of various departments or divisions of the ship both before and during battle. Abbreviation CIC.

combative ready or inclined to fight.

combined they equal white light. Light is made up of three primary colors red, green and blue. Their respective complements are cyan, magenta and yellow. For example, a blue photographic filter absorbs its complement, yellow light, and passes blue light. Since yellow is made up of the other two primary colors of light, red and green, all other light is absorbed.

combusting burning.

come (through, in spite of, etc.) hell or high water see HELL OR HIGH WATER, COME (THROUGH, IN SPITE OF, ETC.).

come clean, to to tell the whole truth; to make a frank admission; to reveal everything.

come closer home to (informal) be more fully understood by.

(informal) be more fully understood by. Now, this will come closer home to you when I tell you that if there were two electrical lines leading out to two different objects, and you took those two lines and crossed them, you would get sparks. – Auditing and Assessment (3 Mar. 64)

spotting and taking action to get rid of) unusual and unnecessary traffic on the executive's lines and for ensuring compliance with the executive's orders.

communism

a political, social and economic system in which the state, governed by an elite party, controls production, labor and distribution, and, largely, the social and cultural life and thought of the people. (Communism and socialism are systems of social organization under which the means of production and distribution of goods are transferred from private hands to the government. The classic difference between the two systems lies in the different means they take to establish themselves communism emphasizes the impracticability of replacing the existing social order by any means other than armed force or outside intervention; the advocates of socialism seek to establish it by peaceful means, through legislation rather than force.)

a theory or system of social organization based on the holding of all property in common, actual ownership being ascribed to the community as a whole or to the state.

a theory which advocates a state of society in which there should be no private ownership, all property being vested in the community and labor organized for the common benefit of all members, the professed principle being that each should work according to his capacity and receive according to his wants. See also Marxist in this glossary.

a theory or system of social organization based on the holding of all property in common, actual ownership being ascribed to the community as a whole or to the state. Communism is not communication. – Third Dynamic and Communication –High School Indoc Demo (6 July 1957)

a theory or system of social organization based on the holding of all property in common, actual ownership being ascribed to the community as a whole or to the state. . . . and why are the Russians so silly as to evolve a slave economy such as communism, and so forth? -The Itsa Line (cont.) (21 Aug. 63)

a theory or system of social organization based on the holding of all property in common, actual ownership being ascribed to the community as a whole or to the state.

a theory or system of social organization based on the holding of all property in common, actual ownership being ascribed to the community as a whole or to the state. So, the communist, being a

only be achieved through revolution and dictatorship.

communotomy

n. a made-up word.

Como, Perry

(1912–2001) a popular American singing star from the 1930s through many decades. Como got his start in music by accepting a friend's challenge to audition as vocalist for a band. He traveled with the band for many years until it disbanded during World War II (1939–1945) at which time he returned to his home state of Pennsylvania to resume his earlier profession as a barber. Upon his return, however, he was offered a position on a radio show. He accepted and rapidly became famous for his relaxed style, good looks and his crooning. (Crooning is singing in a low murmuring manner with the mouth very close to the microphone; especially when singing sentimental songs in a smooth voice). Como became a recording star of the 1940s and an idol of young girls and women. He appeared in numerous musical films and by the 1950s he had his own television show which ran until the 1960s.

companion-at-arms

n. a fellow soldier. A companion is an associate or one who accompanies, and at arms refers to being at battle or engaged in war.

company

a military unit, usually commanded by a captain.

any relatively small group of soldiers.

Company

the first national telephone company in the United States.

comparable magnitude

A datum can only be evaluated by comparison with another datum of comparable magnitude. This means that the basic unit must, therefore, be two.

similar importance.

similar importance. It is so effective that a person can be sitting there running a problem of comparable magnitude to his job or something of this character –running problem of comparable magnitude to the office, see. –Training Drills Demonstrated (5 July 1957) complex - (psychology) a system of interrelated, emotion-charged ideas, feelings, memories and impulses that is usually repressed (prevented from becoming conscious) and that gives rise to abnormal behavior. See also libido theory in this glossary. He's very cross and he's having a great deal of "libido complex," or something of the sort, or he can't control his constipation or something. –Child Scientology (7 July 1957)

Confessional

a Scientology action which asks a person to straighten out his interpersonal relationships with others. A Confessional is usually addressed to the individual versus the society or his family. It addresses the Now-I'm-supposedtos which the individual has transgressed against (violated). A Confessional remedies the compulsion or obsession to commit actions which have to be withheld. In other words, it remedies unreasonable action. Also called Security Check.

a thought or belief about something.

thinking, believing, supposing. Consideration is the highest capability of life, taking rank over the mechanics of space, energy and time.

(1) an enduring or continuing postulate. That is all a consideration is. It is a postulate that continues or endures. When we say, "That's his consideration," we don't mean a hit-and-run consideration in Scientology. We mean that is his enduring opinion. (2) a fixed or continuing idea or opinion. A consideration is different than a postulate. A consideration includes the acceptance of, or agreement with, an idea. In other words, somebody postulates something and then you consider that this is so—you agree with it. You then have a consideration which you did not postulate. Therefore, a consideration has some slight difference from a postulate. All a consideration is, is a continuing

Do not distribute

idea, which you might say more aptly, “a fixed idea,” since all continuance is in itself an illusion. A postulate can be of very finite or almost infinite duration. The whole subject of considerations is contained within the subject of “postulate” so that consideration is a specialized behavior of a postulate. (3) the highest capability of life, taking rank over the mechanics of space, energy and time. That is a wide definition. A consideration actually includes such things as postulates, commands, thoughts, worries. It is a blanket word, and it means that quality of considering. You can consider something with a postulate, and you can consider it with a command.

considerations	thoughts or beliefs about something.
	thoughts or beliefs about something. Consideration is thinking, believing, supposing, postulating. It is the highest capability of life, taking rank over the mechanics of space, energy and time.

who copied manuscripts for people to read, some of whom developed highly elaborate styles. In order to print multiple copies, such lettering was commonly reproduced on copper printing plates, and this style of writing thus came to be known as copperplate. Well, maybe he could write in a flowing, copperplate hand everything else, but if he couldn't sign his name he'd have a hard time convincing people he wasn't illiterate.

a fine, elegant style of handwriting. Well, maybe he could write in a flowing copperplate hand everything else, but if he couldn't sign his name he'd have a hard time convincing people he wasn't illiterate. ⇐Study and Education (13 Aug. 64)

n. an elegant and ornate style of handwriting, that became popular in the 1700s, characterized by a slant to the right, regular loops and vertical strokes that are thicker than the horizontal strokes. Taught to schoolchildren in Europe and the United States during the 1700s and 1800s, copperplate was based on models of handwriting created by masters in the seventeenth and eighteenth centuries. Their works were engraved onto polished copper printing plates (hence the name) and used to make books and manuals which demonstrated styles of handwriting as well as proper presentation and layout for formal correspondence.

a handwriting characterized by lines of sharply contrasting thickness achieved through the use of a very fine pen applied with varying pressure.

a fine, elegant style of handwriting. Well, maybe he could write in a flowing, copperplate hand everything else, but if he couldn't sign his name he'd have a hard time convincing people he wasn't illiterate. ⇐Study and Education (13 Aug. 64)

cops-and-robbers	a children's game in which players enact the pursuit and capture of outlaws by policemen.
copy master	n. a recording made of an original tape, used only to make further
corbitron	n. a made-up word.
corbitrons	a coined word for a hypothetical particle.
	a coined word for a hypothetical particle. (Chapter 14, #1)
Corcoran	the Corcoran Gallery of Art, a gallery that exhibits American art; located in Washington, DC.

Do not distribute

a reference to the Corcoran Gallery of Art in Washington, DC, USA, founded in the late 1800s by American art collector, financier and philanthropist, William Wilson Corcoran (1798–1888). The Corcoran holds collections of paintings, sculptures, tapestries, photographs and ceramics. It also houses one of the world’s most important American art collections from the colonial period to modern art.

cord	n. a tendon, nerve, or other similar structure in a body that is somewhat like a cord, such as the spinal cord.
cordite	a smokeless explosive used as a propellant in bullets and shells.
cordwood	wood stacked or sold in cords, a term used for the measurement of piles of wood. A cord is eight feet long, four feet high and four feet wide.
Corfam	a trademark for a synthetic material developed in the 1900s and used in the manufacture of shoes, belts, handbags, etc. Produced by the E. I. du Pont Nemours & Company (a large American manufacturer of chemical, plastic and synthetic products), Corfam was similar to leather but had many advantages. It was lighter, more flexible, required no polishing and “breathed” easily, meaning moisture and air could travel through it. However it did not stretch or conform to the foot as leather did. Its manufacturing expenses also increased beyond expectancy and production ceased in 1971.
cork, blow one's	to lose one’s composure or mind; to become crazy. Although the origin of this expression is uncertain, it alludes to the cork in a bottle or cask blowing out of its hole, as from pressure that has built up inside.
cork, blown its	(informal) become ruined; ended suddenly.
corn (something) up	to add ridiculously old-fashioned, sentimental, exaggeratedly theatrical or overdrawn dramatic elements to something. Corn is something that is corny, meaning lacking in subtlety; unsophisticated; of a type that appeals to people from a rustic area, etc. The origin of this term is uncertain but it first came into use in the early 1930s by musicians referring to old-fashioned music.
corn and games	free food and entertainment; reference to the practice of ancient Rome of feeding people and providing official public amusement (circuses in the arena) in an attempt to prevent unrest. Also known as “bread and circuses.”

Do not distribute

the practice in ancient Rome of feeding people and providing official public amusement (circuses in the arena) in order to prevent unrest. Also known as “bread and circuses.”

a coined variation of the phrase, bread and circuses, which literally means mass entertainment provided by the government to prevent the population from causing trouble. This phrase refers to the practices of ancient Rome of providing official public amusements and feeding the people as a means of keeping the populace happy. Bread and circuses has come to be used more generally to refer to government policies that seek short-term solutions to public unrest.

corn around (slang) a variation of mess around, engage in idle or purposeless activity.

a coined variation of mess around, meaning to fool around or engage in silly, idle or purposeless activity. Corn in this sense refers to silly humor.

cornea of the thrombosis a made-up name for a disease. The cornea is the transparent outer coat of the eyeball, covering the iris and pupil. Thrombosis is the blockage of an artery by a clot of blood.

corned up (slang) made corny (inferior; trite; stale).

Cornell Cornell University, a private university in New York which is known for its medical college and school of nursing.

Cornell University, a private university in the state of New York, USA, which is known for its medical college and school of nursing.

a two-seat trainer airplane introduced in 1940 by the American Fairchild Engine and Airplane Corporation. The Cornell was the primary training plane for US and Canadian pilots during World War II (1939–1945), and it is estimated that one million pilots were trained with it.

corner a monopoly acquired on a stock or a commodity so as to be able to raise the price.

cornered-rat effect n. a reference to the actions of a rat, which, once trapped in a position from which it cannot escape (such as a corner), will turn and fight against the aggressor, even if the aggressor is much larger, such as a man.

cows come home, till the (colloquial) endlessly; for an immeasurable period. From the slow way a cow returns when it is time for it to be milked.

cows come home, until (till) the endlessly, forever or for an immeasurably long period of time. This expression dates back to the late 1500s, and alludes to cows that, having been out to pasture, faithfully return each morning and evening to be milked. The expression till the cows come home particularly refers to the cows' morning appearance because it implies that some activity (such as partying or revelry) would go on all night until the early morning, literally when the cows would come home.

cow's dinner a variation of the phrase dog's breakfast. See dog's breakfast in this glossary.

Do not distribute

(slang) a variation of the phrase dog's breakfast, a mess.

a humorous coined variation of dog's breakfast.

a variation of the phrase dog's breakfast. See dog's breakfast in this glossary. Their administrative records must look like a cow's dinner. -Sec Checks in Processing (12 Dec. 61)

coyote a mammal similar to the wolf, common in western North America and noted for its nighttime howling. A coyote?

crab apple a small, very sour apple, used for jellies, etc. Do you like crab apples?

crack at it chance of doing it.

crack at, had a (colloquial) made an attempt at (doing something, especially something difficult).

crack out of the box, first (slang) immediately; before anything else.

crack the back (of something)(figurative) to solve the greatest or most difficult part of
Crosby, Bing
(1904-1977) American singer and motion-picture star whose real name was Harry Lillis Crosby; one of the most popular singers of his generation. His more than 1,000 records have reportedly sold over 300,000,000 copies. He also appeared in more than 50 films, and won an Academy Award in 1944. Crosby remained a very popular entertainer until his death in 1977. Data series a series of policy letters containing the technology of evaluation, wherein one learns to think. The Data Series is a tool to discover causes and is applied to find what is logical by ferreting out what is illogical, using this to reveal the greatest outness which, when remedied, will resolve the scene.

deep-six, giving the

a variation of giving (someone) the deep-six, rejecting, negating or abandoning; disposing of definitively. The origin of this phrase is nautical; burials at sea are made in water more than six fathoms deep (a fathom is a nautical unit of length equal to six feet of water).

Dept of Estimations

short for Department of Estimations, a former department in the Technical Division which was responsible for student and preclear administration matters, including testing and interviewing students and preclears.

Detroit

Do not distribute

the largest city in the US state of Michigan. In July 1977, racial riots broke out resulting in several deaths, many injured people, and over \$150 million in property damages.

Dianetic Triples the action of running Dianetics on three flows. By "flow" is meant a directional thought, energy or action. The three flows are inward to oneself, outward to another or others, and crossways, others to others. Examples Flow 1, to self, drinking. Flow 2, self to another or others, pc giving them drinks. Flow 3, others to others, people giving other people drinks.

Dillinger, John

(ca. 1902-1934) an infamous American bank robber and murderer who was declared "public enemy number one" by the Federal Bureau of Investigation (FBI) in 1933 for his role in numerous bank robberies and a string of murders.

Diogenes

(ca. 412-323 b.c.) Greek philosopher who taught that the virtuous life is the simple life. He is said to have once wandered through the daylight streets of Athens with a lantern, searching for an honest man.

(figurative) to puzzle out and solve the greatest or most difficult part of; to complete the principal or hardest part of (a project, one's work, etc.).

(figurative) to solve the greatest or most difficult part of; to complete the principal or hardest part of (a project, one's work, etc.).

(figurative) to solve the greatest or most difficult part of

crack up

(slang) solve; resolve.

solve; resolve.

(slang) solve; resolve. There isn't a case in the world that wouldn't crack up on GF 40 Expanded, which has in it the running of engrams, narrative—and of course, when it goes into drugs that's also with somatics (the full Drug Rundown can be done from it)—and listing, which is Grade III, Class III, Level III material.

lose emotional control, willpower or sanity.

cracked

broke through the difficulties of; managed to solve.

mentally unbalanced, crazy.

a section in the Qualifications Division (Division 5, Department 15) of a Scientology org where staff and executives receive corrective instruction on administrative errors and auditors and Case Supervisors are corrected if they make errors when auditing or case supervising. This is also the section where a public student is given intensive instruction at his own cost after being found slow in study or when failing his examinations. See also Qualifications Division in this glossary. @[Distribution at top of issue] Cramming Officers

cramming

(1) an action where a student is given intensive instruction at his own cost after being found slow in study or when failing his examinations.

an action where a student is given intensive instruction at his own cost after being found slow in study or when failing his examinations.

the action of handling auditors and Case Supervisors with special corrective instruction if they make errors when auditing or case supervising. These actions are done by the Cramming Officer in the Qualifications Division of a Scientology organization.

Do not distribute

the action of giving intensive instruction (to) in order to correct errors made when studying, auditing or supervising and in order to give corrective instruction on administrative errors to church staff and executives.

Crane, Stephen (1871 - 1900) an American writer and war correspondent who is most known as the writer of the novel Red Badge of Courage. See also Red Badge of Courage in this glossary.

craniosacral that portion of the autonomic nervous system (also called the parasympathetic system) which produces involuntary responses from the body such as dilation of the blood vessels, an increasing of the activity of the digestive and reproductive organs and glands, contraction of the pupils of the eyes, slowing down of the heart beat, and many others. See also autonomic in this glossary.

n. pertaining to the craniosacral system, that part of the body's nervous system mainly concerned with handling the body's everyday function of excreting waste products. This system is most active during sleep and acts to subdue heart rate and to stimulate the organs of the digestive system, such as the stomach and intestines. It is called the craniosacral system because the nerves of this system originate from the cranial (cranial meaning of the skull) and sacral regions (sacral meaning in the area of the sacrum, a bone at the lower end of the spine).

cranium the part of the skull that encloses the brain.

crank up (informal) increase.

crannies small, out-of-the-way places or obscure corners; nooks.

crash wagon n. an ambulance or other emergency vehicle especially equipped to provide aid to victims of airplane crashes, etc. A wagon is a strongly built, four-wheeled vehicle for carrying heavy goods, either designed to be pulled or equipped with its own motor.

crash, at a (colloquial) using all possible resources, effort and speed.

(colloquial) using all possible resources, effort and speed. And everybody was going by the TRs at a crash, you see, and so on. – Styles of Auditing (17 Nov. 64)

crash-wagon an emergency vehicle equipped for aid after an airplane crash, automobile accidents, etc; an ambulance.

a book written by L. Ron Hubbard, first published in England in 1954. It contains processes designed to restore the power of a thetan over his own decisions and to understand his nature as a being.

a book written by L. Ron Hubbard, first published in England in 1954. It contains processes designed to restore the power of a thetan over his own decisions and to understand his nature as a being. Creation of Human Ability, published here in England ages ago, got the steps in it which you now undertake.

Creative Processes processes that LRH researched between the years 1952–1959, aimed at making a Clear by getting him to take over the creating of the time track. This approach was accomplished through various procedures which rehabilitated and exercised the thetan's ability to create and direct the placement of energy. In Creative Processing the pc was gotten to directly mock up the bank. Though many successes and results were attained, LRH discovered on rare occasions that when the preclear improved his ability to create something in the bank, the bank would start getting more "solid" causing some discomfort. For this reason, Creative Processing was superseded by more workable techniques and discontinued in 1959. The discoveries LRH made in Creative Processing were invaluable as they led to the development of Havingness, Confront and Responsibility techniques and the modern Grade Chart. It was done with Creative Processes.

exercises by which the preclear is actually creating the physical universe. They consist of having the preclear make, with his own creative energies, a mock-up. See also mock up and preclear in this glossary.

a type of processing that LRH researched between the years 1952–1959, aimed at making a Clear by getting him to take over the creating of the time track.

Creative Processing an exercise by which the preclear was actually putting up the physical universe. It consisted of having the preclear make, with his own creative energies, a mock-up. See also mocks up and preclear in this glossary.

hung on the door of a home where a person has died.

n. a reference to mourning crepe, a black dull silk fabric with deep grooves pressed into its surface and which is used as part of funeral wreaths or for bands worn on the arm. Mourning means the expression of grief after death, such as through denial of amusements, avoidance of certain food and the wearing of special clothes. Up until the mid-twentieth century, Americans and Europeans grieving the dead hung funeral wreaths on their door and wore black crepe armbands. The word crepe itself is the term for fabrics that have crinkled or rippled surface and comes from the Latin *crispere*, meaning to curl.

reference to mourning crepe a black, dull silk with deep grooves pressed into the surface. It is used for mourning bands worn on the arm, as part of funeral wreaths and for streamers hung on the door of a home where a person has died.

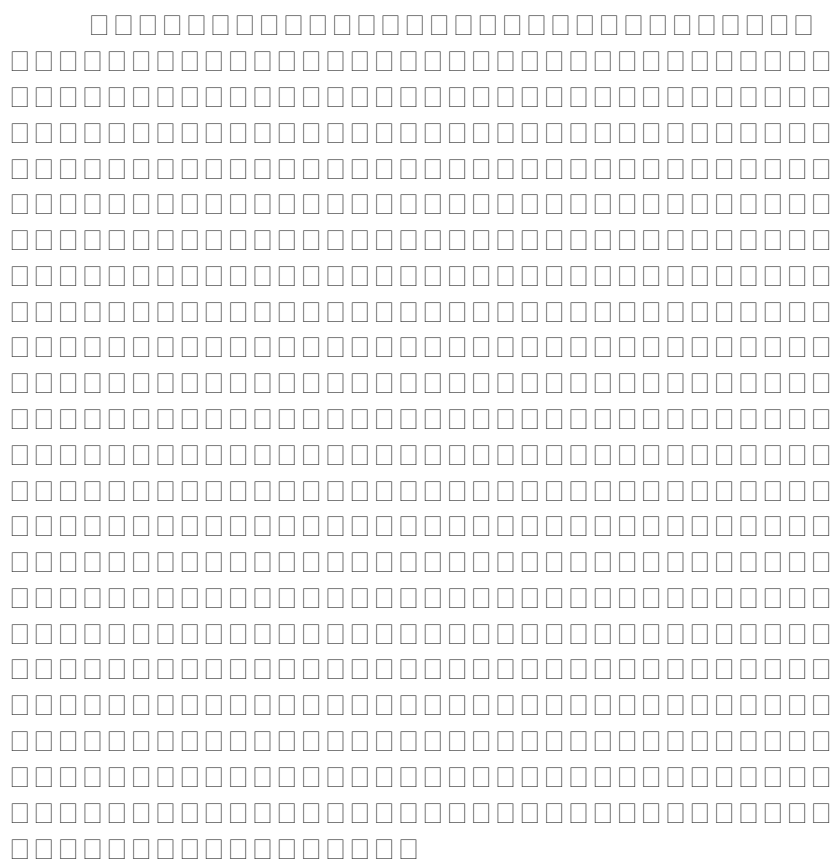

crescendo the climatic point in a steady increase in force or intensity; peak.
As the fury of interest and demand for Dianetics reached a
crescendo, Ron was placing the final touches on the manuscript.

Crest a trademark for a brand of toothpaste made by the Procter & Gamble Company (a major American manufacturer of cleansers, soaps and other various household products). Introduced in 1955, Crest quickly became a leader in the toothpaste market. It was positioned as a scientific breakthrough as years of meticulous research experiments proved the toothpaste reduced tooth decay. In 1960, Procter & Gamble won the endorsement of the American Dental Association (ADA) for Crest toothpaste and used this heavily in their advertising. Other brands then attempted to get ADA acceptance, and though some did, their tests were inconclusive and they were not allowed to advertise the endorsement. Crest subsequently became the largest selling brand of toothpaste in the United States.

crime (1) the reduction of the survival level along any one of the eight dynamics. (2) in the Scientology Ethics Codes, an offense normally considered as criminal; an act or omission which is more serious than a misdemeanor, but not as serious as a high crime.

Crime and Punishment a novel by Feodor Dostoevski wherein Raskolnikov, a student, plans and carries out the murder of an old woman pawnbroker. Raskolnikov's anguished mind, before, during and after the crime, is depicted. See also Dostoevski, Feodor in this glossary.

crime-ridden controlled or ruled over by crime.

crimes confession trials a reference to a series of widely publicized and a series of closed unpublicized trials held in the Soviet Union in the late 1930s. In 1927 when Stalin's most vocal opponent, Leon Trotsky, attempted to turn the celebration of the Russian revolution into a mass demonstration against party leader Stalin, he and seventy-odd members were expelled from the Communist Party. In the following three years more than 6,500 members were exiled, banished or imprisoned for supporting the views of Trotsky. Stalin continued to carry out his plan to purge the Communist Party, and by the late 1930s three widely publicized trials were held in which many prominent Soviet officials freely confessed to crimes of treason, were found guilty and executed or imprisoned. However, it was later established that the confessions were false, the accused were innocent, and had confessed under pressure of intensive torture and intimidation. A series of unpublicized trials of top Soviet military leaders were also held, in which a number of prominent military leaders were eliminated accompanied by a massive purge throughout the Soviet armed forces.

cross-pile	a nuclear reactor an apparatus in which an atomic fission chain reaction can be initiated, sustained and controlled, for generating heat or producing useful radiation. The term cross-pile comes from the fact that the first reactors were constructed of uranium and graphite bricks arranged in layers that crossed each other. n. a possible reference to a nuclear reactor or “pile,” an assembly of materials and equipment used to initiate, sustain and control atomic fission and thus create energy. The term pile came from the fact that the first reactor ever built consisted of uranium and graphite blocks stacked into a large “pile.” It was found that when pieces of uranium of a certain size were brought together, a fission reaction took place which created a large amount of energy. However, if the fission was not controlled, the uranium would explode. In the original pile, the graphite blocks served to slow down the reaction between the blocks of uranium (by absorbing some of the particles released through fission) and thus kept them from exploding. reference to the construction of early nuclear reactors (devices in which an atomic fission chain reaction can be initiated, sustained and controlled), which consisted of uranium and graphite bricks arranged in layers that crossed each other.
crossruffed	(in card games) subjected to a crossruff, a sequence of plays in which each of two partners in turn leads a card which the other can trump. Used figuratively in the lecture.

animals with a hard shell, jointed body and appendages and gills that live mostly in water. Crabs, lobsters and shrimp are crustaceans.

cry wolf	to give alarm without cause or reason; to raise a false alarm. This phrase comes from a fable of a young shepherd who, either as a joke, for attention or due to loneliness and fear (depending on the rendition), would cry “Wolf! Wolf!” to get people to come and help him. After people came to his aid several times but found no wolf, they ignored his plea for help when a wolf really did attack and kill his sheep. Since the mid-1800s, the phrase cry wolf has been used to denote any sort of false alarm.
cry, a far	only remotely related; very different.
cry, in full	at the most exciting, noisy or important part of a chase, attack, etc. Referring to hunting dogs, which make a characteristic noise when they get the smell of the animal that is being hunted. Used figuratively in this lecture. see full cry, in in this glossary.
crying out loud, for	an exclamation expressing anger, frustration, disbelief, or surprise, often at another’s stupidity. This expression dates from the early 1900s or before and is a milder and more polite form of the irreverent, for Christ’s sake.
cryptic	mysterious in meaning; puzzling; ambiguous.
crystal ball	a ball of rock crystal or glass typically used by fortunetellers to gaze into and predict the future.
crystal-balling	a coined word for the practice of gazing into a large glass ball (crystal ball) and claiming to see images, especially of future events.
crystallizing	giving a definite form to.
CS	abbreviation for Commodore’s Staff, the personal aides to L. Ron Hubbard, the Commodore of the Sea Organization. The Commodore’s Staff Aides had the primary purpose of forwarding the actions and targets established by the Commodore and assisting him in accomplishing them. The functions of the Commodore’s Staff Aides are now held by Aides at Flag Bureaux. See also Aide, Commodore and Flag Bureaux in this glossary. The debrief folders are then handrouted immediately to CS-4, CS-2, CS-1 and then routed to the Commodore.

Cuban business	<p>reference to the involvement of Cuba in the events of the Spanish-American War (a war fought in 1898 between Spain and the United States). See also war between Spain and the United States in this glossary.</p> <p>a reference to the involvement of Cuba in the events of the Spanish-American war (1898). For several years prior to 1898 Cuba had been at war with Spain in an effort to obtain independence. Public opinion in the United States was outraged at the news stories of Spanish ruthlessness in combating the Cuban rebels and demanded action. Meanwhile pro-Spanish mobs in Havana were rioting and the US battleship, the Maine, was sent to Cuba to protect American citizens there. While in Havana, on February 15, 1898, the ship was torn apart by an explosion. The Spanish, who controlled Havana at the time and who denied responsibility, were blamed and the act precipitated the Spanish-American War (April to August 1898) which resulted in Spain finally giving up Cuba.</p>
Cuban situation	<p>reference to the fact that Cuba, under the leadership of Fidel Castro (1926 -), had become a firm ally of Russia and the only communist state in Latin America in 1959. As a result relations between the United States and Cuba began to deteriorate with the Cuban government confiscating American property in Cuba and the United States suspending further purchases of Cuban sugar. In January, 1961 the United States broke diplomatic relations with Cuba in an effort to isolate Cuba from the rest of Latin America. In 1898, the United States had engaged in and won a war with Spain on behalf of Cuba.</p>

Curtis (steam) turbine a steam turbine introduced by American inventor, Charles Gordon Curtis (1860–1953), widely used in electric power plants and in marine propulsion. A turbine is a machine that takes moving water, wind or steam and channels it onto blades mounted on an axle, causing the axle to spin around often at high speed. This motion is then transmitted through the axle to drive other parts, machines, etc., such as for generating electricity. In the steam turbine, steam at high temperatures and high pressure rushes through the turbine causing the turbine blades to spin. Some turbines have several stages in them, with the steam expanding at each stage and, each time, doing further work in turning the axle.

curve a curved line or similar graphic representation showing variations occurring or expected to occur.

(colloquial) a deception or trick. The origin of the term is possibly the ``curve ball" in the sport of baseball, a method of pitching (throwing) the ball in such a way that it swerves just before it reaches the batter, making it difficult for him to hit. Our understanding must include the understanding of whether this is good dope or bad dope, whether this is the straight data or this is data with a curve.

a change in the form of (a word) as in number, case, gender, etc. You start dropping s's off of everything; or get somebody with a Japanese curve; you get somebody doing something that is a little bit offbeat in pronunciation -somebody from Boston. -Comm Cycles in Auditing (25 July 63)

an unexpected contrary datum; a shift in reality. Curve itself is also the ordinary dictionary meaning. -LRH Definition Notes.

(colloquial) a deception or trick. From the term ihcurve balllv in the sport of baseball, referring to a method of pitching (throwing) the ball in such a way that it swerves just before it reaches the batter, making it difficult for him to hit.

curve on, put a a coined phrase meaning to add some unexpected thing or datum into something; to alter or change something from its normal course of action or state. This phrase alludes to the game of baseball in which a player (called the pitcher) throws a ball towards a member of the opposite team who tries to hit it with a bat. To make it difficult for the batter, the pitcher can throw the ball so that it “curves,” and does not follow a normal or expected course.

- cycle of communication the action of a communication being sent and received.
- the action of a communication being sent and received. Example Joe originates a communication addressed to Bill. Bill then receives Joe's communication and sends back an answer or acknowledgment, thus ending the cycle. See also communication and two-way comm in this glossary.
- cycle of survival, 25 emotion(s), col agreement and, 161
- cylinders, cook on all eight a coined variation of hit on all cylinders used figuratively to mean to think, operate or function well; to use all of one's skill, ability, etc. Literally it refers to the operation of an automobile engine, in which a fuel mixture is ignited consecutively in each of several chambers (called cylinders). The action of the fuel being ignited is called hitting. The amount of cylinders an engine has varies from 2 cylinders up to some of the most powerful engines having 10 or 12. In order for the car engine to run properly, each cylinder must operate as intended in coordination with all the other cylinders. Thus, if an automobile is hitting on all cylinders, it is running smoothly or at full power. If the fuel in a cylinder fails to ignite and explode (miss), the automobile will not function properly and will not run smoothly. To cook means to do exceedingly well or to work or perform in the correct way and with vigor, enthusiasm, etc.
- cylinders, hitting on all four (informal) thinking or working well; using all one's ability. The phrase comes from a description of the proper operation of an automobile engine in which the fuel mixture is ignited in each of several chambers (called cylinders) in turn, allowing the engine to run smoothly or at full power. So you gently infer to him in the next five or six questions that he is not quite hitting on all four cylinders. -Postulates 1, 2, 3, 4 in Processing-New Understanding of Axiom 36 (14 Sept. 55)
- cylinders, missing on most not operating properly. From an automobile engine where one or more spark plugs fail to ignite (miss) and so do not cause an explosion in the cylinder properly or at the right time. The more this occurs, the worse the car will run. But the truth of the matter is that- apparently, whoever was giving you a Prepcheck was missing on most cylinders. - 7V Demo Prepchecking, Part I (2 May 62)
- Czar Pixie a made-up name.

Dalton, Jack	<p>member of an outlaw gang in the nineteenth-century American West; also a character in early westerns.</p> <p>a character from an old-fashioned melodrama titled Curse You, Jack Dalton! It is a one-act play from the early twentieth century with a villain, Egbert, and Jack Dalton, the hero. Jack falls in love with his family's maid much to the dismay of his aristocratic mother and the Spanish adventuress (Anna) who herself loves and wishes to wed Jack. The villain plots with Anna how to remove the maid from the scene by drugging her and shipping her to a lunatic asylum, thus enabling Anna to have Jack as her own. Jack foils their plot and finally ends up with his love, Bertha, the maid.</p>
dam, busted the	<p>a coined phrase used figuratively to mean to break or burst (something) open so that things can flow freely, such as ideas from the mind.</p>
damages	<p>money claimed by, or ordered paid to, a person to make up for injury, loss, etc., that is another's fault.</p>

(colloquial) a euphemism for damn; used to make a statement more intense.

(colloquial) an exclamation of disappointment, irritation, frustration, etc.

(colloquial) damn; used to make a statement more intense.

(slang) an exclamation of disappointment, irritation, frustration, etc.

Daniel (Bible) a prophet who, during the captivity of the Israelites in Babylon in the sixth century B.C., continued to pray to his God against the express command of the king. He was thrown into a lions' den to be devoured but per the story in the Bible, God sent an angel to protect him and he emerged miraculously unharmed the next day.

a Hebrew prophet captive in Babylon who, according to the Old Testament book of Daniel, was delivered by God from the lions into whose den he had been thrown for refusing to obey a decree of the king. -Webster's Biographical Dictionary; Bible, Daniel 6 9-22

a character in a book of the same name in the Bible. The Book of Daniel contains six stories of the life of Daniel, a Jew who lived in the sixth century B.C., all of which show how he clung to his faith despite a hostile environment and extreme measures taken to prevent him from doing so. The most famous story is that of him being thrown into a den of lions by the king of Babylon (an ancient city of SW Asia), who has been told by Daniel's enemies that he has been worshiping God, directly against the law which states no one could be worshiped except the king. While in the

Do not distribute

lion's den, Daniel is visited by angels who close the mouths of the lions so they cannot eat him. When the king finds Daniel unhurt the next day, he has him taken out of the den, and throws Daniel's enemies into the den, where they are devoured.

Daniel Starch & Staff	an American marketing research company established in the mid-1920s by Daniel Starch (1883–1979), a pioneer in marketing research and popular author on the subject. The company conducted research studies on commercials, consumer and business publications and newspapers, etc., and published the findings in what was called a "Starch Report." The report gave results on advertising effectiveness and readership; for example, on an advertisement in a publication, it reported the percentage of readers who viewed the ad, the percentage of readers that read half or more of the ad, the percentage of readers that associated the ad with the advertiser, etc. In the late twentieth century, after several mergers, the company became Roper Starch Worldwide, Inc., and continued in the marketing research field.
Dante	originally Durante, Alighieri (1265 - 1321) Italian poet. Wrote <i>Divina Commedia</i> , recounting an imaginary journey by the author through hell, purgatory and paradise.
Dante's Inferno	the first part of <i>The Divine Comedy</i> , the greatest work by the Italian poet, Dante Alighieri (1265 - 1321). <i>The Divine Comedy</i> is an epic recounting an imaginary journey by the author through Inferno (hell), Purgatorio (purgatory) and Paradiso (paradise). In the Inferno a description of hell is given as being made up of different levels, including a level of fire and one of ice, which descend conically into the earth.
Danube	<p>a river in southern Europe flowing from southwest Germany eastward into the Black Sea. It is Europe's second longest river and has been an important avenue of migration, conquest and trade throughout European history.</p> <p>a river in southern Europe flowing from southwest Germany eastward into the Black Sea.</p> <p>a river in southern Europe flowing from southwest Germany eastward into the Black Sea. 	(colloquial) deal with or discuss (something) until it is no longer in any way interesting. A variation of flog (something) to death.
	a variation of flog to death or do to death, meaning ieoverdo or repeat too often; deal with or discuss (a subject) till it is no longer in any way interesting.
death-bent	m. characterized by a disposition or tendency toward dying; marked by a determined, resolute direction towards death. Bent here means marked by a strong inclination or leaning towards something, said of the mind, or of one's character or desires. If someone is bent on something he has a determination or intention to do or attain that thing, as in "he is bent on destruction."
debacle	a complete collapse or failure. Ron's Journal 67 Approved April 1991
	a complete collapse or failure.
debarring	shutting out or excluding from a place or condition.
debasing	making lower in value, character, dignity, etc.
debilitated	reduced to debility, the condition of being weak or feeble; weak intellectually or morally.
debug	an action taken to get the snarls or stops out of something.
Decameron	a collection of 100 stories written by Italian poet and author Giovanni Boccaccio (1313–1375). The Decameron is composed of stories related by ten young people (three men and seven women) who, during a plague in Florence, Italy, leave the city for the fresh air of a country villa. To entertain themselves, over a stretch of ten days, each tells one story a day to the rest of the group. The witty stories with their alternate humorous and tragic views of life total 100 in all. The work, composed between 1348 and 1353, is considered Boccaccio's masterpiece and had enormous influence on the style and standards of European literature. (Decameron comes from the Greek words deka "ten" and hemera "day," and means, literally, "ten days" work.)
deceitful	tending to deceive (make [a person] believe what is not true); apt to lie or cheat.
deceltful	dishonest, deceptive; false.

Deck Court Martial	a military trial or court of little formality, usually held with just one officer, for judging minor offenses. In the Navy these would be held by the Deck Officer (the officer on watch and representing the captain).
deck court-martial	<p>a military trial or court of little formality, usually held with just one officer, for judging minor offenses. In the Navy these would be held by the Deck Officer (the officer on watch and representing the captain).</p> <p>n. a justice procedure formerly used in the United States Navy and Marine Corps in which a court was convened by a Commanding Officer to try a person for offenses the officer felt demanded a more severe punishment than he was authorized to assign. The court was presided over by an officer appointed by the Commanding Officer. The penalties included such things as solitary confinement (for up to 20 days) or reduction to next inferior rating, as well as the possible assignment of extra duties or loss of pay.</p>
deck officer	(nautical) any officer whose responsibilities include navigation, cargo handling, etc.
deck pump	a portable pump (hand or motor driven) for fighting fire or pumping water from the ship.
deck sailor	a common sailor most of whose duties are performed on the main deck.

Do not distribute

deck, deal off the bottom of the	to do something deceptively; to swindle or cheat. This term comes from the act of cheating in a game of cards where the dealer covertly controls the game by giving a player (or players) cards from the bottom of the deck where they have been placed by him knowing they will be detrimental to the other player(s). Cards are normally dealt from the top of the deck and are, at that time, unknown to the dealer and other players.
decked out	dressed up or specially decorated for some purpose.
declaration	the act of making something clearly known, stated or announced.
declaration of independence	a reference to Ian Smith's proclamation of independence from Britain on 11 November 1965 which was declared illegal and invalid by the British government. See also Smith in this glossary.
declare	<p>an action done in Qual after a pc has completed a cycle of action or attained a state. The pc or pre-OT who knows he made it must be sent to Exams and Certs and Awards to attest. A declare completes his cycle of action and is a vital part of the action.</p> <p>an Ethics Order which declares a person or group as a suppressive person or group. good print, who the devils wants to know anything about chemistry, don't you see?

Devil and his dark angels a reference to Satan and the fallen or rebellious angels that work for him. Throughout history the devil has been portrayed as an evil angel who was banished from heaven and became the archenemy of God. Other corrupt, wicked and evil angels who were cast down from heaven joined the Devil and he became their prince. Used here the Devil and his dark angels refers to those individuals with such characteristics.

devil of a very bad; very great; extreme.

devil of it, the (slang) the worst part of something; what makes something very nasty.

devil out of, shoot the (colloquial) a variation of beat the living daylights out of, defeat or thrash thoroughly.

devil out of, the (informal) a variation of the hell out of, a phrase used to emphasize or intensify the action being described.

devil take the hindmost be unconcerned, especially about the consequences. The origin of the phrase is apparent in its more basic meaning not worrying about what happens to the slowest or last one; let each one shift for himself.

devil with (colloquial) I, we, etc., do not care about (a person or thing). You know, "Devil with the sofa pillow!"

devil with (it) (colloquial) I, we, etc., do not care about (a person or thing).

devil with (something) (colloquial) I, we, etc., do not care about (something).

devil with it, the (colloquial) I, we, etc., do not care about (a person or thing).

(colloquial) I, we, etc., do not care about (a person or thing). So I says, "The devil with it." - Union Station -R2-46 (30 Aug. 55)

devil with that (colloquial) I, we, etc., do not care about that.

devil with that, the (colloquial) I, we, etc., do not care about that.

devil, as the (colloquial) exceedingly.

to an excessive degree, exceedingly; with the violence, cleverness, desperation or other quality attributed to the devil.

Do not distribute

(colloquial) to an excessive degree, exceedingly.

a coined variation of like the devil, meaning extremely, excessively, very, etc. The devil is used here to intensify what is being said.

devil, going to the (informal) becoming bad or ruined; becoming useless.

(informal) becoming bad or ruined; becoming useless. Tone arm is hung up, you cant get it moving, everything is going to the devil, and so forth-well, you just better do a scout for wrong dates. -R2H Fundamentals (7 Aug. 63)

going to the dogs. See dogs, going to the in this glossary.

devil, hotter than the very hot; red-hot. A variation of hotter than a two-dollar pistol. See also pistol, hotter than a in this glossary.

a coined phrase meaning extremely hot; characterized by great force or speed; marked by great intensity, interest, enthusiasm, etc. Devil is used here to add emphasis.

devil, like the (slang) with violence, desperation, cleverness, or other quality attributed to the devil; extremely, excessively. Well, she's gotten to a point now where she runs into Mary Sue's room, looks demandingly at the mantle where she knows some candy is kept for her, you see, and then just barks like the devil!

(colloquial) as if in a state of torment or misery.

(colloquial) as in a state of torment or misery.

(colloquial) not so; untrue; an interjection indicating the speaker's lack of belief in what he heard.

(colloquial) very much, very hard, very fast, etc.

(slang) with violence, desperation, cleverness, or other quality attributed to the devil; extremely, excessively.

with great force, cunning etc.; extremely.

(colloquial) as in a state of torment or misery. Now, if the pc is feeling like the devil, pc's feeling miserable about an auditing session or auditor, or something like that . . . -ARC Breaks and the Comm Cycle (24 July 63)

Do not distribute

(colloquial) as if in a state of torment or misery. So eventually if you were stupid enough to force them into some word that they considered was wrong, which was way down the bank someplace, you'd bypass all that, they'd turn on a tremendous somatic and they'd feel like the devil. –The Failed Case (27 Oct. 64)

with great force, cunning, etc.; extremely. And the only way we can do that is try to go like the devil for the minimum period.

devil, raise any (informal) start an argument.

devil, raised (so much) the (colloquial) made (such) a great disturbance.

devil, raises the (colloquial) makes a great disturbance.

devil, raising the (colloquial) a variation of raising hell. See also hell, raising in this glossary.

(colloquial) making a great disturbance.

making a great disturbance.

(colloquial) making a great disturbance. We had somebody around here who was just having an awful time a few weeks ago, and the HCO Exec Sec and Area Sec and Ethics Officer were about to shoot this person down in flames for just raising the devil all over the place. –Out-Tech (21 Sept. 65)

(colloquial) making a great disturbance. For instance, our biggest contender up here on the council that was raising the devil with our Town and County Planning Commission now happens to be in a beautiful state of having lost the election. ⚡Psychosomatic Its Meaning in Scientology (30 July 64)

devil, sure as the most certainly; very sure; used to add emphasis and intensify what is being said.

devil, to the an expression of angry impatience and desire to be rid of the person (or thing) addressed.

(slang) thoroughly; irretrievably.

to ruin; to complete and irreparable loss.

devil, what the "what the hell," used to introduce emphatic questions, often showing surprise or annoyance. How—what the devil is all this?

Do not distribute

(colloquial) an expression used in emphatic answers to statements that the speaker disbelieves or feels anger at.

(slang) what (used emphatically).

“what the hell,” used to introduce emphatic questions, often showing surprise or annoyance.

what (used emphatically).

what (used emphatically) to show surprise or annoyance.

what (used emphatically). Used to introduce emphatic questions, often showing surprise or annoyance.

a slang phrase expressing impatience, dismay or strong surprise. The use of “devil” emphasizes the impatience, dismay or surprise but has no other precise meaning.

what (used emphatically). I don't care what the devil happens with the rest of the bank, the whole definition of bypassed charge is “partially detected.” -ARC Breaks and the Comm Cycle (24 July 63)

“what the hell,” used to introduce emphatic questions, often showing surprise or annoyance. What the devil was it? -The Itsa Line (cont.) (21 Aug. 63)

what (used emphatically) to show surprise or annoyance. What the devil did cause this? Because you may have the wrong idea of what caused it.

devilishly excessively; extremely.

devil's own (colloquial) very difficult or troublesome.

devil's own time, took the (colloquial) took an excessive amount of time.

Devonshire a county of southwest England, on the English Channel.

DEW line abbreviation for Distant Early Warning line, a line of radar stations in North America (near 70 degrees latitude), maintained by Canada and the United States, intended to give warning of hostile aircraft or missiles.

abbreviation for Distant Early Warning line, a net of distant early warning radar stations located at about sixty-nine degrees latitude

ranging from northwestern Alaska to northeastern Canada. In 1959 agreements were made by the US with Canada to take over the manning of the Distant Early Warning line designed to prevent any surprise attack across the region of the North Pole and for cooperation with Canada in atomic defense.

an abbreviation for Distant Early Warning line, a network of thirty-one long-range radar stations north of the Arctic Circle that stretched from northwest Alaska across northern Canada all the way to the eastern coast of Greenland. The purpose of these stations was to provide Canada and the United States with the earliest possible warning in the event of hostile attacks by planes, missiles, etc., routed over the North Polar region. The DEW line operated from 1957 to 1993, when it was replaced by an upgraded system called the North Warning System.

dew point	the temperature at which dew starts to form or vapor to condense into liquid.
dexterity	skill in the use of one's hands, body or mind. skill or adroitness in using the hands or body; agility; also, mental adroitness or skill; cleverness.
Dextra sugar	a reference to the former Dextra Corporation, a company of Florida, USA, that produced food and sugar products and which closed in 1980.
dey	(dialect) they. a variation of the word they or there. In some American dialects the letters “th” are often replaced with “d,” such as dere for there and dis for this.
Dhaka	the capital of Bangladesh, a country in southern Asia forming part of the eastern border of India; population 3,459,000.
Dharmapada	same as Dhammapada.
Dhyana	(Hinduism and Buddhism) profound meditation; contemplation.
di Diego	a student on the Saint Hill Special Briefing Course at the time of the lecture.
diabolical	fiendishly clever or cunning or annoying. having the qualities of a devil; fiendish; outrageously wicked.

Do not distribute

fiendishly clever or cunning.

like a devil, very cruel or wicked.

Dial an American manufacturing company founded in the late 1800s that produces and markets such well-known consumer products as Purex laundry detergents and Dial soap, the company's namesake product. Dial was used to identify the world's first antibacterial deodorant bath soap introduced in the mid-1900s.

dialectical materialism in logic, "dialectic" is the action and reaction between opposites, out of which a new synthesis (harmony of the two opposites) emerges. This was an idea originated by the German philosopher Georg Wilhelm Hegel (1770 - 1831). "Materialism" is a philosophy which maintains that there is nothing in the universe but matter, that mind is a phenomenon of matter, and that there is no ground for assuming a spiritual first cause. "Dialectical materialism" was an adaptation of these ideas by German revolutionary leader and founder of modern socialism Karl Marx (1818 - 83) into his own "general laws of motion which govern the evolution of nature and society." He held that a conflict of opposites in human society is the evolutionary process by which a classless society would eventually be reached.

Diamond Dick reference to Deadwood Dick, a popular dime novel hero of the 1890s, created by Edward L. Wheeler. Once a bandit, Deadwood Dick became a stage driver and detective. Deadwood refers to the town of Deadwood, South Dakota in the US. See also dime novel in this glossary.

reference to Deadwood Dick, a popular dime novel hero of the 1890s, created by Edward L. Wheeler. Once a bandit, Deadwood Dick became a stage driver and detective. Deadwood refers to the town of Deadwood, South Dakota in the US. See also dime novels in this glossary.

a reference to Deadwood Dick, a hero of a series of dime- novel adventure stories popular in the United States between the late nineteenth and early twentieth centuries. (A dime novel is an inexpensive sensational paperback novel, popular around the mid-1800s to the early 1900s and originally costing ten cents.) The character was created by American author Edward L. Wheeler in the 1800s and is said to have been based on Richard W. Clark, a colorful prospector and gambler of the city of Deadwood, South Dakota, who became an Indian fighter, a Pony Express rider and a scout for US General Custer (1839–1876).

way, have tested these techniques and they wouldn't have worked, because they didn't have a Dianeticist in the lot of them.

Dianetics

comes from the Greek words dia, meaning “through” and nous, meaning “soul.” Dianetics is a methodology developed by L. Ron Hubbard which can help alleviate such ailments as unwanted sensations and emotions, irrational fears and psychosomatic illnesses. It is most accurately described as what the soul is doing to the body through the mind.

from the Greek words dia, meaning “through” and nous, meaning “soul.” Dianetics is a methodology developed by L. Ron Hubbard which can help alleviate unwanted sensations and emotions, irrational fears and psychosomatic illnesses (illnesses caused or aggravated by mental stress). It is most accurately described as what the soul is doing to the body through the mind. I would like to be very definite about Dianetics and Scientology At no time should you infer, even vaguely, that we are talking about psychology.

Dianetics spiritual healing technology. It addresses and handles the effects of the spirit on the body and can alleviate such things as unwanted sensations and emotions, accidents, injuries and psychosomatic illnesses (ones that are caused or aggravated by mental stress). Dianetics means "through the soul" (from Greek dia, through, and nous, soul). It is further defined as "what the soul is doing to the body."

man's most advanced school of the mind. The word comes from Greek dia, through, and nous, soul. Dianetics is defined as what the soul is doing to the body. It is a way of handling the energy of which life is made in such a way as to bring about a greater efficiency in the organism and in the spiritual life of the individual.

the works of Charles Dickens (1812 - 1870), English novelist, which are noted for picturesque and extravagant characters in the lower economic strata of England at that time.

Charles Dickens (1812--1870), a prolific English author of the late nineteenth century and one of the most popular writers of all time. Born in Portsmouth, England, Dickens had little formal education and became a law clerk at the age of fifteen and later became a shorthand reporter, learning to write rapidly. Having a genuine love for people, he wrote mostly about the lower classes of people in England exposing social wrongs of his time. Portraying realistically the sufferings of children (based on his own experience of working in a factory at a young age) he attacked what he believed were the most serious abuses of the poor and through the vivid pictures in many of his books he convinced many people throughout Great Britain that such conditions had to be changed. Through his writings he created some of the best known characters in English literature. His novels included those such as the renowned David Copperfield, Oliver Twist, A Christmas Carol, Great Expectations and A Tale of Two Cities. From the professional writer's viewpoint this is the most reasonable statement ever made by anybody, because a pro, even-even Dickens would just think nothing of getting out a hundred thousand words in a month, see? Nothing!

an extremely large novel (more than 1,000 pages) written in the seventeenth century by Spanish novelist Miguel de Cervantes (1547– 1616). The story tells of an elderly country gentleman, Alonso Quijano, whose mind becomes so confused by reading romance tales he believes himself a knight destined to revive the golden age of chivalry. Changing his name to Don Quixote (don is a Spanish title of honor) he goes forth into the world with his attendant, Sancho Panza. Paying no heed to Panza's realistic warnings,

done (everyone) in	injured gravely or exhausted; wore out; ruined.
done for	dead, or in serious difficulty. (colloquial) dead, ruined, finished, etc.
done in	(colloquial) exhausted; worn out. (slang) ruined; destroyed. (slang) ruined or destroyed. (slang) killed or murdered.
donga	(South Africa) a channel or gully formed by the action of water; a ravine or watercourse with steep sides. n. an African term for a steep-sided and narrow ravine that has been formed over time by flowing water, but which is normally dry except during the rainy season. The word donga comes from the Zulu term u(lu)donga, meaning bank or steep side, such as that of a river.
donjon	the fortified main tower of a castle. n. a reference to the rooms in a donjon keep that were used for prisons, torture chambers, etc.
donjon keep	n. the main inner tower of a medieval castle that served as the living place for a lord and his family, and which was used as the final defensive stronghold when the castle was under siege. Castles were commonly built with a strong outer wall of stone encircled by a moat. Inside this wall was a second protective wall surrounding a large central structure called a donjon keep (or simply donjon or keep). Donjons were imposing stone towers rising fifty or sixty feet (15.2 to 18.3 m) into the air and were often rectangular or round in shape. They contained living

Do not distribute

quarters for both the lord of the castle and his family and the castle's soldiers. During an attack by an opposing army, if the outer defenses should fail, the donjon was the last place of refuge. Donjons were the most fortified part of the castle and could withstand an extended siege. They sometimes had rooms below ground level that were used for prisons, torture chambers, etc., and which were also called donjon keeps but eventually came to be known as dungeons.

ingredients formed into a soft, thick mass and used for baking bread or pastry.

Dover a seaport in southeastern England, noted for its chalk cliffs. It is twenty-one miles across the English Channel at this point to France.

a seaport in southeastern England; the point nearest France.

Dover sole a valuable food fish found in the offshore waters of the eastern Atlantic and Mediterranean oceans. The fish reaches 50 cm (20 in) in length and is brown in color with darker blotches and a black spot on certain fins. It is probably named after the town of Dover, located on the southeast coast of England.

dowager a widow with a title or property derived from her dead husband.

down (for) the third (or last) time, go figuratively, to sink into a disastrous state or condition from which one may not be saved. This is an allusion to a superstition that a drowning person actually drowns after he has struggled to the surface of the water three times and then finally sinks. (In truth, a person may struggle to the surface a few times, many times or not at all, depending on the circumstances of the drowning.)

down for the count, went right was utterly defeated. The count, in boxing, is the calling out by the referee of the numbers from 1 to 10 when a boxer falls or is knocked to the floor of a boxing ring. A boxer is declared defeated when he remains down for the count of ten.

Drunkard, The a play written by Welsh-born actor and stage manager William H. Smith (1806–1872), first produced in 1844 in Boston. This drama shows the evils of alcohol and the virtues of temperance (abstinence from alcohol). The story tells of Edward Middleton, an honest young man with a weakness for alcohol, and his evil family lawyer Cribbs. Upon the death of his father, Edward is asked by Cribbs to dispossess a mother and daughter, who are Middleton's tenants, of their home. Instead, Edward falls in love with the daughter and marries her. Cribbs, preying upon the Middleton family, encourages Edward to drink. Ashamed and seemingly impoverished, Edward flees, leaving wife and daughter behind. Cribbs follows him and tries, unsuccessfully, to involve him in forging a check. Edward's foster brother, however, finds Edward and rehabilitates and reunites him with his wife and daughter. Cribbs is finally forced to reveal that he has been hiding the will of Edward's grandfather and that Edward is still a wealthy man. The play was the first in American theater to run consecutively for more than 100 performances. Since opening in

ducks and drakes out of, make	throw away idly or carelessly; handle or use recklessly. From the game of ducks and drakes, which consists of tossing flat stones, shells, etc., along the surface of water so they bounce several times before sinking.
dud	(colloquial) a person.
dueling pistols	long-barreled pistols, made especially for dueling and usually in pairs.
Duesenberg	a well-known, high-quality line of cars manufactured between 1913 and 1937 in the United States by Duesenberg Motors Corporation. The first Duesenbergs were racing cars, but the company expanded into passenger vehicles and the cars became known for their powerful engines and beautiful designs. They were commonly bought by the wealthy and famous but by the mid-1930s production had begun to decline and by 1937 the Duesenberg was discontinued.
duffer	an old man, especially a dull or indecisive one.
dugout	(baseball) a roofed structure enclosed on three sides and with the fourth side open and facing the playing field, usually with the floor beneath ground level, where the players sit when not on the field.
Duke of Porkpie	a made-up title. A porkpie is a man's soft hat with a round, flat crown, so called from its resemblance in shape to a pork pie (a small, usually round baked pastry enclosing small pieces of cooked pork).
Duke, Doris	a made-up name. (1912–1993) former heiress and billionaire daughter of James Duke (1856–1925) founder of the American Tobacco Company, the principal cigarette manufacturer of the United States. At the age of 21 she inherited her father's estate and automatically became the richest girl in the world.
dull	mentally slow; lacking brightness of mind; somewhat stupid.
Dulles's	belonging to John Foster Dulles (1888@1959), American lawyer, U.S. secretary of state 1953@59. Dulles was credited with authoring foreign policy by which the U.S. was to prepare for massive retaliation against "communist aggression" rather than fight small, costly wars.
duly	in a proper or fitting manner.

a dynamic is a surge of energy within a person which is seeking to promote the survival of something. As one looks out across the confusion which is life or existence to most people, one discovers that there are eight main divisions. These are the eight urges (drives, impulses) in life. We call them the dynamics. These are motives or motivations. These are the eight dynamics. The purpose of setting forth this division is to increase an understanding of life by placing it in compartments. Having subdivided existence in this fashion, each compartment can be inspected as itself and by itself in its relationship to the other compartments of life. In working a puzzle it is necessary to first take pieces of similar color or character and place them in groups. In studying a subject it is necessary to proceed in an orderly fashion. To promote this orderliness it is necessary to assume for our purposes these eight arbitrary compartments of life and they are (1) first dynamic the first dynamic is self. This is the effort to survive as an individual, to be an individual. It includes one's own body and one's own mind. This dynamic includes the individual plus his immediate possessions. It does not include any other people. It is the urge to survive as one's self. Here we have individuality expressed fully. (2) second dynamic the second dynamic is creativity. Creativity is making things for the future and the second dynamic includes any creativity. The second dynamic contains the family unit and the rearing of children as well as anything that can be categorized as a family activity. It also incidentally includes sex as a mechanism to compel future survival. (3) third dynamic the third dynamic is group survival. This is the urge to survive through a group of individuals or as a group. A group can be a community, friends, a company, a social lodge, a state, a nation, a race or in short, any group. (4) fourth dynamic the fourth dynamic is species. Man's fourth dynamic is the species of mankind, meaning both men and women. (5) fifth dynamic the fifth dynamic is life forms. This is the urge to survive as life forms and with the help of life forms such as animals, birds, insects, fish and vegetation. (6) sixth dynamic the sixth dynamic is mest or the physical universe. Mest stands for Matter, Energy,

Do not distribute

Space and Time. These are the component parts of the physical universe. The sixth dynamic is the urge to survive of the physical universe, by the physical universe itself and with the help of the physical universe and each one of its component parts. (7) seventh dynamic the seventh dynamic is the spiritual dynamic, the urge to survive as spiritual beings or the urge for life itself to survive. The seventh dynamic is life source. This is separate from the physical universe and is the source of life itself. (8) eighth dynamic the eighth dynamic is the urge toward existence as infinity. The eighth dynamic is commonly supposed to be a Supreme Being or Creator. It is correctly defined as infinity. It actually embraces the allness of all.

the eight urges (drives, impulses) in life. These are motives or motivations. A dynamic is a surge of energy within a person which is seeking to promote the survival of something. Life or existence can be subdivided into these eight main divisions, known as the eight dynamics (1) the FIRST DYNAMIC is SELF. This is the effort to survive as an individual, to be an individual. It includes one's own body and one's own mind. It is the effort to attain the highest level of survival for the longest possible time for self. This dynamic includes the individual plus his immediate possessions. It does not include any other people. It is the urge to survive as one's self. Here we have individuality expressed fully. (2) the SECOND DYNAMIC is CREATIVITY. Creativity is making things for the future and the second dynamic includes any creativity. The second dynamic contains the family unit and the rearing of children as well as anything that can be categorized as a family activity. It also incidentally includes sex as a mechanism to compel future survival. (3) the THIRD DYNAMIC is GROUP SURVIVAL. This is the urge to survive through a group of individuals or as a group. A group can be a community, friends, a company, a social lodge, a state, a nation, a race or in short, any group. It doesn't matter what size this group is, it is seeking to survive as a group. (4) the FOURTH DYNAMIC is SPECIES. Man's fourth dynamic is the species of mankind, meaning both men and women. This is the urge toward survival through all mankind and as all mankind. Whereas the white race would be considered a third dynamic for a white person, all the races of man together would be considered the fourth dynamic. All men and women because they are men and women seek to survive as men and women and for men and women. (5) the FIFTH DYNAMIC is LIFE FORMS. This is the urge to survive as life forms and with the help of life forms such as animals, birds, insects, fish and vegetation. This includes all living things whether animal or

Do not distribute

vegetable, anything directly and intimately motivated by life. It is the effort to survive for any and every form of life. It is the interest in life as such. (6) the SIXTH DYNAMIC is MEST or the PHYSICAL UNIVERSE. MEST stands for Matter, Energy, Space and Time. These are the component parts of the physical universe. The sixth dynamic is the urge to survive of the physical universe, by the physical universe itself and with the help of the physical universe and each one of its component parts. (7) the SEVENTH DYNAMIC is the SPIRITUAL DYNAMIC, the urge to survive as spiritual beings or the urge for life itself to survive. Anything spiritual, with or without identity, would come under the heading of the seventh dynamic. It includes one's beingness, the ability to create, the ability to cause survival or survive, the ability to destroy or pretend to be destroyed. A subheading of this dynamic is ideas and concepts and the desire to survive through these. The seventh dynamic is life source. This is separate from the physical universe and is the source of life itself. (8) the EIGHTH DYNAMIC is the urge toward existence as INFINITY. The eighth dynamic is commonly supposed to be a Supreme Being or Creator. It is correctly defined as infinity. It actually embraces the allness of all.

the central drives of an individual. They are –numbered from one to eight as follows (1) Self survival; (2) Survival through children (includes sexual act); (3) Survival by groups including social and political as well as commercial; (4) Survival through mankind as a whole; (5) Survival through life, including any species, vegetable or animal; (6) Survival through MEST; (7) Survival through theta or the static of itself-, (8) (written as infinity) Survival through a Supreme Being. Each individual is surviving for all eight. But the third dynamic is an agreement, and all the dynamics are simply agreements. –Third Dynamic and Communication –High School Indoc Demo (6 July 1957)

there could be said to be eight urges (drives, impulses) in life, which we call dynamics. They are motives or motivations. We call them the eight dynamics. These are urges for survival as or through (1) self, (2) sex and family, (3) groups, (4) all mankind, (5) living things (plants and animals), (6) the material universe, (7) spirits, and (8) infinity or the Supreme Being. For more information on the dynamics, see the book Scientology The Fundamentals of Thought.

the forces or motivations at work in any area or field.

dynamitey	(colloquial) potentially dangerous. (colloquial) potentially dangerous. These words are pretty dynamitey. –Definition of Control (4 July 1957)
dynasties	successions of rulers who are members of the same family.
dysentery	a disease of the intestines in which there are loose bowel movements containing blood and mucus.
$E = mc^2$	<p>a mathematical equation derived by Albert Einstein as part of the general theory of relativity. The equation is energy (E) equals mass (m) times the speed of light (c) squared (multiplied by itself). See also Einstein in this glossary.</p> <p>a mathematical equation derived by Albert Einstein as part of the general theory of relativity. The equation is energy (E) equals mass (m) times the speed of light (c) squared (multiplied by itself). See also Einsteinesque in this glossary.</p> <p>the equation constructed by Alert Einstein expressing a specific relation between mass and energy, where E is energy, m is mass and c is the velocity of light. See also Einstein in this glossary.</p> <p>a mathematical formula developed in 1905 by German-born physicist Albert Einstein (1879–1955). E stands for energy. M stands for mass. C2 is the symbol for the speed of light (c) squared (multiplied by itself), which is 300,000 km per second times 300,000 km per second; in other words, an extremely large number. This formula states that the energy that could be released by a piece of matter is equal to the amount of the mass multiplied by this enormous number. Simply stated, this formula expresses that a tiny amount of matter can be converted into an enormous quantity of energy. For example, if one gram of mass (a very tiny amount) was converted into energy, it could supply more than that used in a large city in an entire day.</p>
e cum laude laureate	a humorous reference to a person who has been honored for achieving distinction in a specific field. Cum laude means with honor and is used in diplomas to grant the lowest of three special honors for grades above average. Laureate is to graduate or bestow a university degree upon, to confer honorable distinction upon.

East Indies	the islands of the Malay Archipelago. The Dutch possessions in this group were called the Netherlands Indies and are now known as the Republic of Indonesia.
East Lynne	a popular melodramatic and moralizing tale of the fall of virtue, written in 1861 by English novelist, Mrs. Henry Wood (1814–1887). The story tells of Lady Isabel Vane who, in her late teens, is left orphaned and penniless after her father dies, and her home, East Lynne, is sold to another character Archibald Carlyle. Her position in life however is restored when she marries Carlyle, and returns to her former home. Shortly thereafter, the villain Levison enters the scene and with the aid of a forged note, tricks Lady Vane into believing her husband wants to get rid of her and marry another. Lady Vane leaves her husband and child and runs off with Levison. She soon discovers Levison's treachery and leaves him. She roams from one place to another and finally, broken in health and repentant, she returns to East Lynne disguised as an elderly governess to see her ailing child. The play ends with Lady Vane's true identity revealed and her happiness tragically restored on her death bed as she receives forgiveness from her former

Eastern of or in the countries of Asia; Oriental.

of or in the countries of Asia; Oriental. I'm not telling you now a bunch of Eastern superstition, I'm telling something that is probably much better founded than MV2. –Child Scientology (7 July 1957)

a well-known American airmail and passenger airline company. Formed in 1927 and originally named Pitcairn Aviation, Inc., its name was later changed to Eastern Air Transport and, in the 1930s, it controlled the lucrative route from the heavily populated northeastern region of the US to Florida. The airline was at its peak following World War II (1939–1945) but Eastern's competitive position deteriorated as new airlines began flying the same routes and a series of strikes weakened the company. By the mid-1960s it was suffering financial losses. With a new president the company launched a campaign to improve its image with a multi-million dollar advertising budget. Its first-class passengers no longer had to pay for their drinks, the food was improved and to advertise Eastern's new look, the planes' markings were streamlined. Eastern adopted "The Wings of Man" as its new motto. By the early 1990s the company was once again heavily in debt, and what had once been the most profitable air carrier, sold off what assets it did have and ceased to exist.

Edsel	Edsel Ford (1893 - 1943), son of Henry Ford (pioneer automobile manufacturer, organizer and president of the Ford Motor Company) who took over the presidency of the Ford Motor Company from his father in 1919 and ran the company until his death in 1943. In 1938 he ordered a specially designed car to be built for himself and his two sons. Two hundred orders for the car were received before the prototype was even completed, so he decided to place the car in production, and the Lincoln Continental was born.
-------	--

a line of cars produced between 1957 and 1959 by the Ford Motor Company, an American automobile company founded in 1903. Named after Edsel Ford (1893–1943), son of the company's founder, Henry Ford (1863–1947), the initial Edsel line featured eighteen different models. The cars, which were in the medium price range, were large, had modern features and a unique design and style. Despite heavy promotion before and after release, the Edsels were a failure on the market, producing very few sales. The unsuccessful line was discontinued in 1959 and cost the company huge losses.

eighteen-point caps	large capital letters, of the size used in printing for headlines. The point, 0.01383 inch, is the basic unit of type measurement. The usual size of type for the text of books or newspapers is eight to twelve points. Caps is short for iocapital letters.ly
eight-eighty) 8-80	short for Scientology 8-80, a book by L. Ron Hubbard in which he answers the riddles of life and its goals in the physical universe.
eight-pass	wide enough for eight lines of cars, trucks, etc.
eight-striper	n. a fictitious designation for a very high-ranking officer in the United States Navy. This comes from the stripes worn by officers on the sleeves of their uniforms to indicate rank. For example, a captain (rank just above a commander) has four gold stripes and is called a “four-striper” and a commander has three gold stripes and is called a “three-striper.” The highest ranking naval officer, a fleet admiral, has five stripes.
Eildon Dam	a reference to the Eildon Weir (a dam in a river or stream), located on the site of the Eildon Reservoir, northeast of Melbourne, Australia.
Einstein theory	<p>the general theory of relativity, proposed in 1905 by Albert Einstein. Although complete understanding of this theory requires a knowledge of the most exotic branches of mathematics, these are some of its basic points (1) Time is not an absolute. The faster a body moves, the slower its clock runs. A minute on Earth may pass in fifty-nine seconds or sixty-one seconds on planets traveling at speeds different from that of Earth. (2) The speed of light remains constant in all frames of reference. Whether you are moving toward a light source or away from it, the light will still reach you at the same speed (186,000 miles per second). (3) All motion is relative. Therefore, there can be no such thing as absolute rest. (4) Moving bodies acquire mass as they increase in speed. The faster a body travels, the heavier it becomes. As a body approaches the speed of light, it adds mass very rapidly. If it were to reach the speed of light, its mass would become infinite. If this were true it could be seen that no body could ever travel faster than the speed of light. The additional weight acquired by an accelerating body would make penetration of the light barrier impossible. (5) Mass and energy are mutually convertible. See also Einstein in this glossary.</p> <p>the special theory of relativity, proposed in 1905 by Albert Einstein. Emergency	the condition that a person or organization is in when the statistics of the organization, department or portion of an organization or a person are seen to be declining or when there are unchanging statistics of an organization or a portion of an organization or a person. the state or condition which applies when the statistics of an organization, department, portion of an organization or a person are seen to be declining or are unchanging. reference to the State of Emergency, a condition assigned to an organization or portion thereof when it has consistently down statistics or numerous noncompliances or offenses. This can be assigned to a unit, subsection, section, department, division or the entire organization. It is not assigned to a person. The state is not idly assigned and is assigned only after a steadily declining statistic resulting in overwork for seniors of the org or near catastrophe. By the way, organizations are beginning to move off of Emergency right now.

Do not distribute

Emergency, State of a condition assigned to an organization or portion of an organization when it has consistently down statistics or numerous noncompliances or offenses. This can be assigned to a unit, subsection, section, department, division or the entire organization. It is not assigned to a person. The condition is assigned only by the Office of LRH. The State of Emergency is a serious condition. It is not idly assigned and is assigned only after a steadily declining statistic or a series of noncompliances or offenses resulting in overwork for seniors of the org or near catastrophe. To end an Emergency condition, the portion to which it is assigned must follow closely the Emergency Formula. In addition to this, there are specific policies governing the handling of ethics, credit, personnel, rights and status, which apply to an area assigned a State of Emergency, as covered in HCO PL 30 April 65, EMERGENCY, STATE OF.

a condition assigned to an organization or portion thereof when it has consistently down statistics or numerous noncompliances or offenses. This can be assigned to a unit, subsection, section, department, division or the entire organization. It is not assigned to a person. The state is not idly assigned and is assigned only after a steadily declining statistic or a series of noncompliances or offenses resulting in overwork for seniors of the org or near catastrophe.

emergent arising unexpectedly or as a new or improved development.

Emerson, Ralph Waldo(1803–1882) American philosopher, essayist and poet. In 1841 he began writing different series of essays and in one entitled “Compensation,” he stated, “Every sweet has its sour; every evil its good,” and “For every thing you have missed, you have gained something else; and for every thing you gain, you lose something else.” Well, this is shades of Ralph Waldo Emerson. Nearly everybody has this “compensation phobia.”

(1803 - 82) one of American's most influential authors and thinkers, also a minister and noted lecturer.

Emersonian having to do with Ralph Waldo Emerson (1803 - 1882), American essayist, poet, lecturer and philosopher; one of America's most quoted authors. Though the main current of Emerson's thought was optimistic, some of his works showed a belief that faith came only in moments, whereas doubt was habitual, an acknowledgment that darker forces seemed to prevail.

of Ralph Waldo Emerson (1803 - 82) American essayist, poet and lecturer. Emerson was part of the transcendentalist movement,

Do not distribute

which advised people to look for God-given power within themselves. His best-known essay is “Self-Reliance.” Many in the nineteenth century took inspiration from Emerson, especially through his brief and pointed sayings and urgings, such as “Hitch your wagon to a star.”

Emersonian law of compensation a reference to a proposed law in the essay Compensation, written by American author, poet and philosopher, Ralph Waldo Emerson (1803–1882). Emerson writes of what he calls the “law of compensation” where everything has its opposite, every action has its reaction, etc. For example, he states, “Every sweet hath its sour; every evil its good,” as well as “For every thing you have missed, you have gained something else; and for every thing you gain, you lose something.”

reference to an essay entitled in Compensation It by American essayist, poet and lecturer Ralph Waldo Emerson (1803–1882), in which he stated, it Every sweet has its sour; every evil its good, li and in For every thing you have missed, you have gained something else; and for every thing you gain, you lose something else. li

E-Meter short for electropsychometer, a specially designed instrument used by a trained Scientology practitioner which helps locate long-hidden sources of travail. It does not diagnose or cure anything; it simply measures the mental state or change of state of an individual. engram a particular type of mental image picture which is a complete recording of every perception present in a moment of partial or full “unconsciousness.” Engrams are stored in the reactive mind. See also mental image pictures and reactive mind in this glossary.

short for electrometer an electronic device for measuring the mental state or change of state of Homo sapiens. It is not a lie detector. It does not diagnose or cure anything. It is used by auditors to assist the preclear in locating areas of spiritual distress or travail. [Definition of blowdown] E-Meter tone arm motion to the left, made to keep the needle on the dial.

an electronic device for measuring the mental state or change of state of Homo sapiens. It is not a lie detector. It does not diagnose or cure anything. It is used by auditors to assist the preclear in locating areas of spiritual distress or travail.

emotes (informal) expresses emotion in an artificial or exaggerated way.

emotion This word is redefined in Dianetics and is given an opposite for comparison, "misemotion." Previously the word emotion was never satisfactorily defined. Now it is defined as an organism manifestation of position on the Tone Scale which is rationally appropriate to the present time environment and which truly represents the present time position on the Tone Scale. Rational affect.

an organism manifestation of position on the Tone Scale which is rationally appropriate to the present time environment and which truly represents the present time position on the Tone Scale. Rational effect. This word is redefined in Dianetics and is given an opposite for comparison, misemotion. See also misemotion in this glossary.

a response by wavelength affecting an individual or another which produces a sensation and a state of mind.

a response by wavelength affecting an individual or another which produces a sensation and a state of mind. Emotion is a connector between thought and effort. ((Added for glossary entry only - not in footnote)) It is a manifestation of beingness, and closely related to motion. One handles motion on a direct ratio with his ability to handle emotion; the higher his emotion level, the more control he can exert over motion; the lower his emotion level, the more he succumbs to motion.

the catalyst used by the control center to monitor physical action. The relay system, via glands, interposed between "I" and self and, by thought, others. The main emotions are happiness,

Electronic and other equipment such as winches (see winch in this glossary) and pumps and service equipment in good repair are an important part of their product.

engine room inside the depths of the ship. For example when the bridge personnel wish to change speed they use the handle on the bridge telegraph which in turn moves the pointer in the engine room telegraph to point to the speed desired on its dial. (The pointer on the bridge telegraph, however, remains where it is.) Whenever such a signal is made, a bell also rings in the engine room alerting the engineers that a change is desired. Furthermore, the number of bell rings signifies the speed wanted. For example, three bells can signify full speed astern (backwards). To acknowledge receipt and execution of the order, the engineer moves the handle on his telegraph to match where the engine room pointer is. This moves the pointer on the bridge telegraph dial to correspond with the engine room's telegraph. Thus the bridge can see that the engine room received and executed the order correctly.

engineering the planning, designing, construction or management of machinery, roads, bridges, buildings, waterways, etc.

the science concerned with putting scientific knowledge to practical uses, divided into different branches, as civil, electrical, mechanical or chemical engineering.

England On festive occasions, to add further excitement to the activities, live birds (such as blackbirds) would be imprisoned in a pie after the pie crust was baked so once the pie was cut the birds would fly forth. (Blackbird is the name given to various birds of which the males are largely or entirely black.)

english (sports) the spin given to a ball by striking it on one side or releasing it with a sharp twist.

a twisting, spinning rotation made by a tennis ball, billiard ball, or the like, as it moves forward; the untrue bounce or carom caused by this motion.

enigma

a perplexing, baffling or seemingly unexplainable matter, person, etc.

enjoiner

emphatic directive or order.

enlarged

discussed at greater length or in greater detail.

enlarger

a machine used in photography to produce a picture larger than that of the original negative. A negative is a piece of photographic film (a base layer of material covered with tiny particles of silver that are sensitive to light and suspended in a jelly-like substance) that is placed in a camera and is exposed to light. When the light hits the light-sensitive particles on the film an image is created. The resultant image on the exposed film is "negative" as the light areas in the original scene photographed will appear dark and the dark areas will appear light. Because the image on the negative is usually smaller than the size people need the final photograph to be, it must be enlarged to be viewed easily. An enlarger enables one to take a negative and reproduce its image to any larger size needed. To do this, a negative is placed in the enlarger and a very powerful light, called an enlarger light, is projected through the negative onto a piece of photographic paper (paper that is sensitive to light, just as the negative originally was). The dark areas on the negative block the light and the light areas allow it to pass, thus creating an image on the light sensitive photographic paper at the bottom of the enlarger. The size of the image on this photographic paper is adjusted by moving the enlarger up and down on a column. By moving the enlarger up (farther away from the photographic paper), the size of the reproduced image can be increased, as this allows more light to be spread out onto the photographic paper. By moving the enlarger down towards the

Do not distribute

photographic paper, the size of the light hitting the paper is smaller and thus the size of the image can be decreased. See also negative in this glossary. I didn't even hold back the enlarger light on that burned-off highlight over at the side, and it completely washes out that bird's features over there.

n. a piece of equipment used in a darkroom to reproduce a picture larger than that of an original negative. As the image on a negative is usually smaller than the desired size of the final photograph, it must be enlarged to be viewed easily. An enlarger enables one to take a negative and reproduce its image onto photographic paper to any larger size needed through the use of a light (an enlarger light) and a lens. The enlarger is mounted on a column and is moved up and down in relation to the photographic paper to adjust the size of the reproduced image. Moving the enlarger up increases the images' size, and moving the enlarger down, decreases it. Additionally, corrective techniques exist by which the photographic prints or parts of it can be made lighter or darker.

enMEST

MEST which has been enturbulated by entheta or crushed too hard into theta and rendered less usable.

enturbulated mest mest that is confused; turbulent; disorderly. See also mest in this glossary.

mest which has been confused and enturbulated, and thereby rendered less usable. See also enturbulated and mest in this glossary.

short for enturbulated mest mest that is confused, turbulent, disorderly. See also mest in this glossary.

enmestified

a coined word meaning “invested with the attributes of enturbulated mest (mest that is confused; turbulent; disorderly).” See also mest in this glossary.

epic (figurative) a story or series of events worthy of being the subject of an epic a long poem that tells of the adventures of one or more great heroes, written in a dignified, majestic style, and often giving expression to the characters and ideals of a nation or race.

pertaining to or constituting an heroic poem, one which relates a series of heroic and noble achievements monitored and watched over by supernatural powers such as the gods in Greek mythology. Normally the epic poem is centered around a hero whose actions and fortunes are sometimes watched over and interfered with by gods and which actions form the core of the story. Hence the word can mean of heroic character or quality; bold, daring, noble or commanding in proportion or form; larger than life in size and magnitude.

epicenters sub-brains in various parts of the body, probably picked up on the evolutionary line, which have a monitoring effect on the body and the individual. These would be such parts of the body as the “funny bones” or any “judo sensitive” spots the sides of the neck, the inside of the wrist, the places the doctors tap to find out if there is a reflex. Used humorously in this lecture with no specific meaning. For more information on epicenters, see the book Scientology A History of Man.

epileptic	pertaining to or symptomatic of epilepsy, a disorder of the nervous system, usually characterized by fits of convulsions that end with loss of consciousness.
epileptiform	having the form of epilepsy, a disorder of the nervous system, usually characterized by fits of convulsions that end with loss of consciousness. resembling epilepsy, a disorder of the nervous system characterized by a tendency to recurrent seizures. During severe seizures, the person goes unconscious, and convulsive spasms of the muscles generally cause him to cry out and fall to the ground (if he was standing when the seizure started). The head is jerked towards one or the other shoulder, the breathing is for the moment arrested, and then the whole body is thrown into violent agitation, occasionally so great that bones are fractured or dislocated. The eyes roll wildly, the teeth are gnashed together, the tongue and cheeks are often severely bitten and foam (often tinged with blood) issues from the mouth.
episcopatory	n. a reference to a clergyman. This is probably formed from episcopate, meaning the office or position of a bishop (a senior member of the Christian clergy who supervises a number of local churches in his district).
epistle	a communication made to an absent person in writing; a letter. Chiefly (from its use in translations from Latin and Greek) applied to letters written in ancient times, especially to those which rank as literary productions, or to those of a public character or addressed to a body of persons. Used with a playful or sarcastic implication in application to ordinary (modern) letters.
epitomizing	being representative or typical of the characteristics or general quality of a whole class.
epizootic	n. a term for a disease that spreads rapidly amongst animals (similar to the word “epidemic” as applied to diseases of men). This term is sometimes used by LRH as a made-up word.

ethnic survey	a careful examination of the ethnics of an area. Ethnics are the mores and customs; what the people believe. Ethnic surveys are done to find out what the people like most and what they like least and to discover what they consider important about their own area or way of life. It is done by going out on a broad-scale basis and sampling enough of the population to find out what the current ethnic is or what the people's basic ethnics really are.
ethnology	the social science that analyzes cultures, especially in regard to their historical development and the similarities between them.
Eton	<p>a private (operated under a royal charter as a private foundation) preparatory school for boys in Eton (a town located in south-central England).</p> <p>a reference to Eton College, a private secondary school (known as a “public school” in England), located in the town of Eton, about 20 miles (32 km) west of London. Eton was founded in 1440 by Henry VI (1421–1471), King of England and is the largest and one of the most prestigious public schools in the country. It offers courses in such subjects as science, mathematics, ancient history, Latin, Greek and other languages, and sports such as cricket and rowing. The school teaches more than one thousand boys from the ages of twelve to eighteen, all of whom live at the school and receive personal tutoring and assistance outside their normal classes. These boys are generally from the wealthiest and most distinguished English families. Many of England’s most famous soldiers and statesman have been educated at Eton.</p>
etymology	an account of the origin and development of a word and its meaning.

considered a burden on society.” Certificate in Helby's office
“Euthanasia Research”

the act or practice of painlessly putting to death an individual who is suffering from a terminal or incurable illness; “mercy killing.” However, in the 1930s, a variation of euthanasia was used in Germany to rid the country of those considered burdens on society, including mentally defective people and alcoholics. Following on the heels of programs to sterilize people termed “unfit,” euthanasia programs were employed in murdering over 200,000 mental patients from 1939 to 1945. These programs further expanded in the 1940s to include others considered “unworthy of life.” PART ONE, CHAPTER 6, #3

evaluate	impose data or knowledge upon another. An example would be someone telling another why he is the way he is instead of permitting or guiding him to discover it for himself.

exchange	<p>a central office in a telephone system, serving a certain area.</p> <p>the action of producing a valuable final product for which one is then recompensed by support and goodwill, or in reverse flow, supporting and giving goodwill to the producer of the product. By definition, a valuable final product is something that can be exchanged with other activities in return for support. The support usually adds up to food, clothing, shelter, money, tolerance and cooperation (goodwill). On an individual basis this is easy to grasp. The individual produces a product or products which, flowed into the department, division, organization, company, community, state, nation or planet, then returns to him his pay and goodwill or at least sufficient goodwill to prevent his abandonment or destruction. Long-range survival of the individual is attained in this fashion. Parts of organizations or organizations, towns, states and countries all follow the principles which apply to the individual. The survival or value of any section, department, division or org is whether or not it follows these principles of interchange. The survival or value of any town, state or country follows these principles of interchange. Thus, if an individual or group is actually producing valuable final products, then it is entitled to support. If it is not producing an interchangeable commodity or commodities in volume or quality for which support can be elicited or even demanded, it will not be viable.</p>

execution the act of executing; specifically, a carrying out, doing, producing, etc.

executive one who holds a position of administrative or managerial responsibility in an organization. In a Scientology organization this is deemed to be the head of a department or above. See also administration; department.

one who holds a position of administrative or managerial responsibility in an organization. To give one some idea of the power associated with the word, Noah Webster, in 1828, defined it as “The officer, whether king, president or other chief magistrate, who superintends the execution of the laws; the person who administers the government, executive power or authority in government.” Executive is used in distinction from legislative and judicial. The body that deliberates and enacts laws is legislative; the body that judges or applies the laws to particular cases is judicial; the body or person who carries the laws into effect or superintends the enforcement of them is executive, according to its nineteenth-century governmental meaning according to Webster. The word comes from the Latin “Ex(s)equi (past participle ex(s)ecutus), execute, follow to the end ex-, completely + sequi, to follow.” In other words, he follows things to the end and gets something done.

one who holds a position of administrative or managerial responsibility in an organization. In a Scientology organization this is deemed to be the head of a department or above.

exotic striking or unusual in effect or appearance.

Expanded Grades six major auditing actions which are done as part of every preclear’s individual auditing program. Each grade consists of a series of auditing processes which enable an individual to rehabilitate or strengthen specific abilities needed to succeed in life. For example, Grade Zero consists of twenty-three individual processes which address a person’s ability to communicate, each of which is run in sequence to its proper result. These grades are called Expanded as each one uses all the processes developed for it and is run on all four flows (flow 1, something happening to self; flow 2, doing something to another; flow 3, others doing things to others; flow 0, self doing something to self).

Expanded Lower Grades each Grade is a series of processes which are run on a preclear with the purpose of bringing him to a particular state of Release. These are called "expanded" because they use all the processes of the level developed between 1950 and 1970 and are run on all four flows. The Expanded Lower Grades include Expanded ARC Straightwire® through Expanded Lower Grade IV, as given in the Classification, Gradation and Awareness Chart. See also Classification, Gradation and Awareness Chart; flow; Grades of Release.

noised about the Explorers Club. -A Review of Study (22 Sept. 64)

a private club based in New York City and founded in 1904 with the main object of promoting the science of exploration and dedicated to the search for new knowledge of the Earth and outer space. I was extremely pleased with this information and it got noised about the Explorers Club. ¶A Review of Study (22 Sept. 64)

an organization, headquartered in New York and founded in 1904, devoted exclusively to promoting the science of exploration. To further this aim, it provides grants for those who wish to participate in field research projects and expeditions. It has also provided logistical support for some of the twentieth century's most daring expeditions. L. Ron Hubbard was a member of the Explorers Club. It is always a matter of astonishment to some member of the Explorers Club to pick up all the information he needs about an area, which is new, wild and completely unexplored, from the white man or the Chinese—particularly the Chinese—who has been living there for the last forty years.

a private club based in New York City and founded in 1904 with the main object of promoting the science of exploration and dedicated to the search for new knowledge of the Earth and outer space. As a member of the Explorers Club, Ron had led expeditions to study different cultures and test his theories about the mind.

Explorers Log

a log published as part of the Explorers Club periodical publication, the Explorers Journal. The Explorers Log gave reports and updates on the various activities of club members around the world.

exposure meter

(photography) an instrument that measures the intensity of light in a certain place and indicates the proper exposure (the length of time that the film is exposed to the light). Also called a light meter.

(photography) an instrument that measures the intensity of light in a certain place and indicates the proper exposure (the length of time that the film is exposed to the light). Also called a light meter. So he breaks out a microscope and a telephoto exposure meter and so forth, and he looks around. -Wrong Target, Sec Check (29 June 61)

the act of moving oneself (as a spirit) out of the body; placing distance between oneself and the body.

the act of moving out of the body with or without full perception.

the act of the thetan moving outside the body. When this is done the person achieves a certainty of his beingness or identity completely apart from that of the body.

the act of the thetan moving outside the body. When this is done the person achieves a certainty of his beingness or identity completely apart from that of the body. See also thetan in this glossary.

the person is “outside” his body when returned to an incident. These exteriorized views of self have two explanations. One of them is valence, whereby the person has taken unto himself the identity of another person and sees the scene through that other person's eyes. The other is exteriorization, in which painful emotion is present in such quantity that the person cannot occupy himself. Today, the term means the action of moving out of one's body. One can view the body or control the body from a distance. It is the state of the thetan, the individual himself, being outside his body. When this is done, the person achieves a certainty that he is himself and not his body.

the state of the individual being outside his body. When this is attained, the person achieves a certainty that he is himself and not his body.

the state of the thetan being outside his body. When this is attained, the person achieves a certainty that he is himself and not his body.

the action of moving oneself (as a spirit) out of the body; the placing of distance between oneself and the body.

the phenomenon of being exterior to the body. The spirit has moved out of the body. He is able to view the body or control the body from a distance. -Lectures of 28 February 1957, 13 December 1966.

the act of moving out of the body with or without full perception. It is the fact of this act which proves that the individual is not a body but an individual. This discovery in 1952 proved beyond

fascistic	<p>of or having to do with a governmental system led by a dictator having complete power, forcibly suppressing opposition and criticism, regimenting all industry, commerce, etc., and emphasizing an aggressive nationalism and often racism.</p> <p>of or having to do with fascism, a governmental system led by a dictator having complete power, forcibly suppressing opposition and criticism, regimenting all industry, commerce, etc., and emphasizing an aggressive nationalism and often racism.</p>
fast	a period of abstaining from all food.
fast touch	(slang) an effort to get a loan or gift of money quickly and often dishonestly.
faster than scat	see SCAT, FASTER THAN.
fasting	abstaining from all food.
fat (stuff, one) out of the fire, pull thea	<p>coined phrase meaning to save someone or something from failure or ruin before any damage is done. This is possibly a combination of the phrases the fat's in the fire and pull something out of the fire. The first phrase means that the damage has already been done, things have been made worse and confusion has resulted. If fat is spilled on a flame a sudden blaze arises, smoke is created, and the fat and food are spoiled. Thus, if the fat is kept out of the fire it is out of harm's way and neither fat nor food are ruined. The second phrase means to save from disaster or to turn a precarious situation into an advantageous or successful one. It alludes to the action of hauling or yanking something out of a fire before it is burned.</p>
fat cats	(slang) wealthy people.
fat chance	(ironical) used to say that something is very unlikely to happen. (see Brewer and Longman)

sell the Coca-Cola; and then they have an Accounting Division to fend off income tax and that's it, no strain, no pain—all very smooth.

fender	<p>a buffer let down between the side of a vessel and an approached dock or other hard object such as another ship. They are traditionally made from granulated cork stuffed into canvas bags. They may take varied shapes and forms, such as plastic bumpers and old car tires.</p> <p>any one of the metal frames over the wheels of an automobile or other vehicle to protect against splashing mud, etc.</p> <p>a pad or a bundle of rope hung over a vessel's side to prevent damage when alongside a wharf or another vessel.</p>
Ferdinand	<p>the title character in a children's book <i>The Story of Ferdinand</i> by American author Munro Leaf (1905 - 1976). Ferdinand was a gentle bull who liked to sit quietly and smell the flowers under his favorite cork tree.</p>
Ferdinand (the bull)	<p>the main character of the children's story, <i>The Story of Ferdinand</i> (1936), written by American author and illustrator Leaf Munro (1905–1976). Ferdinand, a bull, unlike the other bulls who ran and jumped and butted their heads together, likes to sit under his favorite tree and smell the flowers. One day, some men appeared looking for the biggest, fastest and roughest bull to take to the bullfights. All of the bulls except for Ferdinand ran around snorting and leaping so the men would pick one of them. Ferdinand instead went to sit down, as he knew the men would not pick him—but he happened to sit on a bee. The bee stung him and Ferdinand leapt up snorting and butting. The men, seeing this, took Ferdinand off to the fights. On the day of the fight when “Ferdinand the Fierce” rushed into the arena, all the men were scared stiff and the crowd cheered and applauded as they thought Ferdinand was going to fight fiercely. Ferdinand, however, seeing the beautiful flowers in the women's hair, sat down quietly in the middle of the ring and smelled them. No matter what was done, Ferdinand wouldn't fight and just sat there. He was finally taken back home to continue happily smelling flowers.</p>
Fermi	<p>Enrico Fermi (1901 - 1954), American physicist; born in Italy then came to the United States in 1938. fingernails on the blackboard	reference to the screeching, irritating sound that is made when a blackboard is scratched by fingernails. Used figuratively in this lecture to mean something which strongly annoys or bothers one.
fingers on, have our	have identified or pointed out with precision. have identified or pointed out with precision. So, this factor we don't have our fingers on. –Tone 40 on an Object (6 July 1957)
finite	having definite limits; that can be measured. having bounds or limits; not infinite; measurable. having measurable or definable limits.

Do not distribute

finite physics	n. a reference to that portion of physics that deals with quantities that can be precisely measured, as opposed to physics that deals with infinite or theoretical measurements and calculations. Finite is a term used to describe something that is completely determinable, as through physical measurement.
Finneganized	written in a manner similar to <i>Finnegan's Wake</i> , a book published in 1939 by Irish author James Joyce (1882–1941). The book was composed in an elaborate language of Joyce's own creation, and included foreign words, Irish references, various literary, historical and philosophical allusions, slang and puns, as well as various phrases from popular songs, art and sports. The book ends with an unfinished sentence which is completed by a half-sentence at the beginning and took seventeen years to write. The story itself details the stream of nightmares and dreams of tavern keeper H. C. Earwicker and his family as they lie asleep. The name of the novel is derived from an Irish hero, Finn MacCool, who was supposed to return to life some day and be the savior of Ireland; and from Tim Finnegan, the hero of a ballad about a man who jumped up during his own wake (a watch held over a dead body before burial, sometimes accompanied by feasting or merrymaking).
Finnigin	<p>an allusion to a poem by American author Strickland Gillilan (1869 - 1954). Strickland once found a story telling of Finnigin, an Irish railroad worker who, when reporting on train wrecks, was told to keep it brief. Strickland turned one of the Irishman's telexes into a poem, which reads in part / "Off agin, on agin, / "Gone agin.</p> <p>an allusion to a poem called "Finnigin to Flannigan" by American poet Strickland Gillilan (1869–1954). Gillilan once ran across a story of an Irish railroad worker, Finnigin, who when reporting on train wrecks in his section of the track was told to keep it brief. Gillilan wrote a whole poem on this, which became one of his most well known. In the poem, Finnigin has a wreck in his section of track and after getting the train back on the tracks and moving on, he writes a ten-page report to his superintendent Flannigan. Unable to understand what Finnigin had written, Flannigan requested that in making such reports Finnigin be brief. Finnigin agrees, and after handling another train wreck, Finnigin</p>
fire and brimstone	promising damnation and punishment; raising visions of fire and brimstone, as the fire of hell.
fire drill in the Swiss Navy	a coined humorous expression, referring to a state of utter confusion. Switzerland is a landlocked (completely enclosed by

Do not distribute

land) country and has no navy.

fire drill, foul (someone) up like (slang) delay or stop (someone) in a confused mess.

A fire drill is a practice drill for a company of firefighters, the crew of a ship, etc., to train them in their duties in case of a fire. Fire drill on most ships is usually so bad it is a slang term for a confused mess.

fire drill, hangs up like delays or stops in a confused mess. A fire drill is a practice drill for a company of firefighters, the crew of a ship, etc., to train them in their duties in case of a fire. Fire drill on most ships is usually so bad it is a slang term for a confused mess.

fire drill, like (slang) in a confused mess. A fire drill is a practice drill for a company of firefighters, the crew of a ship, etc., to train them in their duties in case of a fire. Fire drill on most ships is usually so bad it is a slang term for a confused mess.

(slang) like a confused mess. A fire drill is a practice drill for a company of firefighters, the crew of a ship, etc., to train them in their duties in case of a fire. Fire drill on most ships is usually so bad it is a slang term for a confused mess.

(slang) like a confused mess. From the practice of drilling a company of firefighters, the crew of a ship, etc., to train them in their duties in case of a fire. Fire drills on most ships being usually so bad they are a mess.

fire drill, mess (one) up like a delay or stop (one) in a confused mess. A fire drill is a practice drill for a company of firefighters, the crew of a ship, etc., to train them in their duties in case of a fire. Fire drill on most ships is usually so bad it is a slang term for a confused mess.

short for Scientology V. See also Scientology V in this glossary.

Step V, DED - DEDEX Running, a step of Standard Operating Procedure for Theta Clearing. See Procedures for Theta Clearing in the Appendix for a description of this step.

five-and-dime	a five-and-ten-cent store—a store that sells a wide variety of inexpensive merchandise, originally with many articles priced at five or ten cents.
five-card stud	<p>a card game with wagering where each player is dealt two cards—one, face down and the other, face up. The player with the highest card showing opens the betting. Then a second round of cards is dealt face up, and the player showing the highest combination opens the betting. Play continues in this manner, with betting after each round until each player has five cards (four face up and one face down, known only to him). The best five-card hand wins.</p> <p>a card game where each participating player is dealt a total of five cards. The cards are dealt one at a time, with the first placed face down and the remaining four face up. Betting begins once the second card has been dealt, and continues on each round of the deal. There is then a final round of betting before the hidden card is shown and the player with the best combination of cards wins.</p>
five-ring circus	n. a circus having five separate rings where different acts can take place simultaneously. A ring is a circular area in which performances are given. A circus often takes place under one or more large tents and consists of acrobats, clowns, animal shows, etc. Each of these acts takes place in a ring established in the central portion of the tent with the audience seated around the perimeter. A circus commonly has three rings, which is considered spectacular, but may have as many as seven, allowing it to display a wide variety of action and entertainment all at one time.
five-way bracket	a bracket having the following form You—Terminal; Terminal—You; Terminal—Another; Another—Terminal; Terminal—Terminal. An example of a five-way bracket using change would be 1. How have you changed something? 2. How has something tried to change you? 3. How has something changed another? 4. How has another changed something? 5. How has something changed? Rudiments, Valences Approved April 1991
