

is making a contribution to the auditor as a person, even in meager ways, as asking advice about purchasing a toy for his child or even taking the preclear along on the shopping tour. Giving good present day is valid processing!

Validation technique seems to be of definite value as a tool for the auditor. It takes skill and ingenuity to use as does any tool, but you will enjoy its use.

LRH TAPE LECTURES

24 September—1 October 1951

** 5109C24A	OCTSER-OA	Effort Processing—Description of effort and life energy as it pertains to effort processing
** 5109C24B	OCTSER-OB	Effort Processing (cont.)—Behavior bands on tone scale explained and motion tolerance
** 5110C0I	OCTSER-OC	Self-Determinism—Effort Processing
** 5110C0I	OCTSER-OC	Self-Determinism—Effort Processing (cont.)

OCTOBER MIDWEST CONFERENCE LECTURES

Wichita, Kansas

8—12 October 1951

“October 8th, 1951, found the Foundation (Wichita, Kansas) host to a number of interested Dianeticists coming together from sections of the country to gather information on latest developments in Dianetics. Fifty-one persons were in attendance.

“Passed out to the attendees was a little paper-bound book called *Dianetics: Axioms*. This book was written as a text to the October Midwest Conference and consists of a limited and curtailed list of the logics and axioms of Dianetics. It was typed personally by Ron on mimeograph stencils and run off for the conferees.

“Central attention was focused on the Hubbard lectures, presented at 8:00 p.m. from Monday until Friday evenings. Mainly they presented a scholarly study of the axioms underlying the science of human behavior, and lifted up a newly developed technique for Dianetic processing: Self-determined Effort Processing.

“Mornings were devoted to staff-conducted discussions on recent developments. The conference personnel formed co-auditing teams in the afternoons in order to most effectively master the approved methods and to experiment with these techniques on their own somatics and aberrations .”
