

# SCIENTOLOGY 8-80

by

L. Ron Hubbard

Published

November 1952

**Scientology 8-80**, much expanded from *Technique 88*, is the long-awaited "How to Audit" which was to be the companion of *What to Audit* (later titled *A History of Man*). This work was delayed, according to L. Ron Hubbard, because of testing of the "Black and White" technique (a process included in *Technique 88*). This technique is a considerable extension beyond the data given in the Summer Session course (Phoenix, June 23-28, 1952), but has that course as its basic.

Working on the basis that the individuality and the actual substance of the person is an electronic field, L. Ron Hubbard spent considerable time investigating all the manifestations of energy and its behavior. These manifestations are few in number, and are readily identified. Once their manifestation on the life field is understood, the running of the basic incidents of the case becomes quite simple.

This book is an excellent rendition on the subject of the thetan and electronics. It also contributes something to the field of electricity

and nuclear physics by pointing out some omissions in fundamental electricity which, when remedied, make electricity more usable. It pokes a hole in the theory of alternating currents and then fills it. A contribution to basic science possibly comparable to some of Faraday's work, it should be in the know-how of those broadly interested in Dianetics and Scientology. It contains the entire technology of Black and White processing, the manifestations of energy (flows, dispersals and ridges), the tone scale for the thetan and other data. It is an extremely valuable text. The technology itself is essential to the education of an auditor.

112 pages, 10 drawings, hardcover with dust jacket, glossary. Available from your nearest Scientology Organization or Mission, or direct from the publishers: Scientology Publications Organization, Jernbanegade 6, 1608 Copenhagen V, Denmark; or Church of Scientology Publications Organization U.S., 2723 West Temple Street, Los Angeles, California, 90026, U.S.A.
